

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Rathbone UK Opportunities Fund (I Inc)

Fund Manager: Rathbones Asset Management Limited
I Inc ISIN GBOOB77H7W31

Objectives and investment policy

The objective of the fund is to deliver a greater total return than the FTSE All-Share Index, after fees, over any seven-year period.

There is no guarantee that this investment objective will be achieved over seven years, or any other time period.

We use the FTSE All-Share Index as a target for our fund's return because we want to offer you a better return than the UK stock market. We also use the FTSE All-Share ex Investment Trusts Equally Weighted Index as a comparator benchmark against which you can compare the fund's performance.

To meet the objective, the fund manager will invest at least 80% of our fund in UK-listed companies which are domiciled, incorporated or have a significant part of their business in the UK, with the remainder in global shares, cash, short-term deposits and UK government debt. While we invest in companies of all sizes, we gravitate towards small and medium size businesses. We define small and medium business as those outside

the FTSE 100, however, this does not preclude the fund from investing in those businesses within the FTSE 100. Derivatives may be used by the fund for the purposes of efficient portfolio management and hedging.

Our fund is designed for investors with a basic knowledge of shares who seek growth. You should intend to invest for longer than seven years, understand the risks of our fund and have the ability to bear a capital loss. For definitions please visit the glossary on our website. You can buy and sell units on each business day of the fund between 9am and 5pm.

Any income arising in relation to this unit class will be distributed to investors on a regular basis.

We actively manage our fund, which means we can choose what we invest in as long as it's in line with the investment objective and policy. Because of this, our fund's performance can diverge significantly from its benchmarks over shorter periods of time and therefore isn't appropriate for investors who plan to withdraw their money within 7 years.

Risk and reward profile

Typically lower rewards,
Lower risk

Typically higher rewards,
Higher risk

These numbers rate how the Fund may perform and the risk of losing some or all of your investment. In general the potential for higher returns also implies a higher level of risk.

This indicator is a measure of the fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the fund's future risk. The risk category shown is not a target or a guarantee and may change over time.

The risk category is calculated using historical data and may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time.

However, the lowest category (1) does not mean a risk free investment.

During unusual market conditions, the risks normally experienced by the fund may increase significantly, and in addition, the fund may be subject to the following risks:

Counterparty risk: A company that we deal with may renege on its

obligations, costing you money.

Liquidity risk: Some assets become hard to sell at their expected price, especially in times of market stress. This could mean we have to sell assets below their expected price resulting in a loss. In extreme circumstances, we may suspend the fund to protect your investment, resulting in you being unable to access your money.

Management risk: People make the investment decisions for our fund. If they make unfavourable decisions, you could lose money.

Operational risk: We rely on complex systems to ensure that trades are completed, our fund's assets are accounted for and that you can buy or sell our fund. If our systems fail, you could be inconvenienced or lose money.

Currency risk: We own assets valued in a currency other than sterling. Changes in the price of foreign currencies can result in gains or losses, even if underlying asset prices stay the same.

Concentration Risk: The fund invests in a small number of investments. This means that the performance of a single stock within the portfolio has a greater effect on the value of the fund. This can result in large gains or losses based on the performance of a single stock.

The risk indicator for this fund reflects the following:

- As an asset class, shares have greater risk than either bonds or money market instruments.

Charges

One-off charges taken before or after you invest

Entry Charge 0.00%

Exit Charge 0.00%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing Charges 0.58%

Charges taken from the Sub-Fund under certain specific conditions.

Performance Fee None

The Fund does not charge entry or exit charges.

For more information about charges, please see the "Charges" section of the fund's Prospectus, available by calling the Information Line or emailing RAM@Rathbones.com.

The charges you pay are used to pay for the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment. The fund manager receives an annual fee, which is included in the ongoing charges shown. Ongoing charges are the same for all investors in the same class. The charges shown are based on actual fees and expenses. The ongoing charges figure excludes portfolio transaction costs.

The value of investments in the fund and the income from them may go down as well as up and you may not get back your original investment when you sell your units.

Past performance

■ Rathbone UK Opportunities Fund (I Inc)
■ FTSE All Share Index

The performance of this Class is calculated in GBP

This share class launched on 01 March 2012.

The Fund launched on 13 July 2009.
