AXA Distribution Fund

A Sub-Fund of AXA Distribution Investment ICVC

Share class : AXA Distribution Fund Z Accumulation GBP (ISIN : GB0006160104)

This Sub-Fund is managed by AXA Investment Managers UK Limited, part of the BNP Paribas S.A. Group

Objectives and Investment Policy

Investment Objective

The aim of this Fund is to achieve income and capital growth over a period of 5 years or more.

Investment Policy

The Fund invests in a mix of shares in UK listed companies, UK Government bonds (the majority of which are linked to the rate of inflation) and cash. The Fund's typical asset mix would range between 50-60% investment in shares and 40-50% in UK Government bonds and cash. The fund manager selects shares in companies based upon their prospects for future growth of capital and dividend payments following an in depth analysis of the quality of their business model, financial status, and corporate governance arrangements. Investments in UK Government bonds are diversified across a range of maturities (i.e., the length of time for full repayment of the bond by the Government).

The fund manager considers ESG risk by applying AXA Investment Manager's (AXA IM's) sector specific investment guidelines. Such guidelines exclude investment in soft commodity derivatives or exposure to certain companies based on their involvement in specific sectors (such as tobacco production, natural ecosystem conversion and deforestation, controversial weapons and climate risks). The fund manager also applies the AXA IM's ESG Standards policy. This policy excludes investment in companies based on: (a) manufacture of white phosphorus weapons; certain criteria relating to human rights and anti-corruption as well as other ESG factors, (b) companies which cause, contribute, or are linked to violations of international norms and standards in a material manner or which are involved in incidents and/or events that pose a severe business or reputational risk to the relevant company due to the impact of its involvement on stakeholders or the environment and (c) companies with the lowest ESG score. AXA IM's ESG Standards policy and AXA IM's sector specific investment guidelines are subject to change and the latest copies are accessible via the links provided in the "Responsible Investment" section of the prospectus and are available from the fund manager on request.

The fund manager will undertake engagements with investee companies with the aim of preserving or enhancing long-term value and creating better ESG outcomes for its investors over the long-term. More details on the fund manager's approach to its engagement with companies are available on the website <https://www.axa-im.co.uk/> under the heading "Responsible Investing".

If the fund manager deems that an investment no longer meets the criteria set out in this investment policy or its expectations in terms of that investment's prospects for achieving the Fund's objective, the fund manager will disinvest as soon as practicable having regard to the best interests of the Fund's investors and in accordance with its best execution policy.

The fund manager has full discretion to select investments for the Fund in

line with the above investment policy and in doing so may take into consideration a composite benchmark made up of the following indices in the stated proportions: 55% FTSE All-Share Index; 17.5% FTSE Index Linked All Stocks; 17.5% FTSE Index Linked < 5 Years; 3.5% FTSE Gilts All Stocks; 3.5% FTSE Gilts < 5 Years; 3% SONIA Compounded Index (the "Benchmark"). This Benchmark best represents the types of bonds and companies in which the Fund predominantly invests.

The Fund may also invest at the fund manager's discretion in other transferable securities, cash, deposits, units in collective investment schemes and money market instruments. The Fund may use derivatives for investment purposes as well as for Efficient Portfolio Management. Use may be made of borrowing, cash holdings, hedging and other investment techniques permitted in the applicable Financial Conduct Authority rules.

This Fund is actively managed in reference to the Benchmark, which may be used by investors to compare the Fund's performance.

Risk and Reward Profile

The risk category is calculated using historical performance data and may not be a reliable indicator of the Fund's future risk profile.

The risk category shown is not guaranteed and may shift over time.

The lowest category does not mean risk free.

Why is this Fund in this category?

The capital of the Sub-Fund is not guaranteed. The Sub-Fund is invested in financial markets and uses techniques and instruments which are subject to some levels of variation, which may result in gains or losses.

Additional Risks (risks materially relevant to the fund which are not adequately captured by the indicator)

Counterparty Risk: failure by any counterparty to a transaction (e.g. derivatives and securities lending) with the Fund to meet its obligations may adversely affect the value of the Fund. The Fund may receive assets from the counterparty to protect against any such adverse effect but there is a risk that the value of such assets at the time of the failure would be insufficient to cover the loss to the Fund.

Inflation Linked Bond Risk: unlike other bonds, an inflation protected security (such as index linked gilts) reduces the negative effect of inflation on its real value. The market value of such securities will be affected both by the market's perception of future movements in interest rates and the future rate of inflation. Therefore the market value of such securities (and the value of the Fund) may not move in line with inflation rates in the short to medium term.

Interest Rate Risk: fluctuations in interest rates will change the value of bonds, impacting the value of the Fund. Generally, when interest rates rise, the value of the bonds fall and vice versa. The valuation of bonds will also change according to market perceptions of future movements in interest rates.

Further explanation of the risks associated with an investment in this Fund can be found in the prospectus.

Charges

The charges you pay are used to pay the cost of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	none
Exit charge	none

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over a year

Ongoing Charges	0.76%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	none
-----------------	------

The entry and exit charges shown are maximum figures. In some cases, you might pay less - you can find this out from your Financial Adviser.

The ongoing charges figure is based on expenses for the previous twelve month period. This figure may vary from year to year. It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please refer to AXA IM website: <https://www.axa-im.co.uk/important-information/fund-charges-and-costs> as well as the Fees and Expenses section of the prospectus which is available at <https://funds.axa-im.com>.
