# J O Hambro Capital Management Global Opportunities Fund

Ip GBP Inc IE00B89PQM59

A sub-fund of Perpetual Investment Services Europe ICAV

Managed by Perpetual Investment Services Europe Limited

### Objectives and investment policy

- The investment objective is to achieve long-term total returns by investing in shares (i.e. equities) and similar investments of companies listed or located throughout the world.
- The Fund will invest at least 80% in shares and similar investments of companies listed on stock exchanges globally. If considered appropriate the Fund can invest up to 20% in cash or cash equivalent investments (such as treasury bills, which are short-term government bonds).
- The Fund may on occasion invest in fixed and/or floating rate convertible bonds. Any such bonds will have a minimum rating of BBB by Standard & Poor's and/or Fitch or at least Baa3 by Moody's or bonds that the Investment Manager determines to be of comparable quality.
- The Fund is actively managed and promotes ESG characteristics (within the meaning of Article 8 of Regulation (EU) 2019/2088). The Investment Manager selects the shares to invest in through a thorough analysis of a company's financial statements and an assessment of the cash flows that the company is likely to generate in the future; thereby selecting shares which are considered to offer the best opportunity for strong risk-adjusted returns. The Fund maintains a concentrated, high conviction portfolio consisting of companies which are believed to be undervalued relative to their growth prospects. The Fund will typically invest in the shares of fewer than 50 companies.
- The MSCI ACWI Standard Index with net dividends reinvested is a point of reference against which the performance of the Fund may be measured. While many of the Fund's investments may be components of the Index, its strategy allows for significant deviations. As a result, the Fund's performance can sometimes differ greatly from the Index.
- The mid-day index is a customised report that aligns with the funds mid-day valuation point.
- Portfolio transaction costs are paid out of the assets of the Fund in addition to the charges set out below, and may have an impact on the performance of the Fund.
- This share class distributes income generated by the fund to investors annually. Dividends will be automatically reinvested where a cash payment is not requested.
- You can buy and sell shares in the Fund on any day which is a working day in Dublin and the UK. Instructions received before 12:00 noon will be processed that day. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.
- Recommendation: The Fund may not be suitable for those investors who plan to withdraw their money within five years.

### Risk and reward profile

Lower risk			Higher risk			
Typically lower rewards			Typically higher rewards			
1	2	3	4	5	6	7

The calculated risk and reward category, as shown above, uses a method of calculation derived from regulatory rules. It is based on the rate at which the returns of the Fund have moved up and down in the past over the previous 5-year period (i.e. volatility) and is not a guide to the future risk and reward category of the Fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1. Where less than 5 years of historical performance data is available, simulated performance will be used.

- Funds in category 5 have in the previous 5-year period shown moderately high volatility. With a fund of category 5, you have a moderately high risk of losing money but your chance for gains is also moderately high. Higher volatility can result from investments in shares as their value may fluctuate more than other financial instruments, such as bonds.
- Investment risk** - there is no guarantee that the Fund will achieve its objective. A capital loss of some or all of the amount invested may occur.
- Company shares (i.e. equities) risk** - the value of Company shares and similar investments may go down as well as up in response to the performance of individual companies and can be affected by daily stock market movements and general market conditions.

- Emerging markets risk** - less developed countries may face more political, economic or structural challenges than developed countries. Emerging markets may have less stable legal and political systems, which could affect the safe-keeping or value of assets.
  - Concentration risk (number of investments)** - the Fund may at times hold a smaller number of investments, and therefore a fall in the value of a single investment may have a greater impact on the Fund's value than if it held a larger number of investments.
  - Liquidity risk** - some investments may become hard to value or sell at a desired time and price. In extreme circumstances this may affect the Fund's ability to meet redemption requests upon demand.
  - Currency risk** - the Fund can be exposed to different currencies and movements in foreign exchange rates can cause the value of investments to fall as well as rise.
  - Counterparty risk** - the insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.
  - Regulatory risk** - any change in the Fund's tax status or in legislation could affect the value of investments held.
  - Capital erosion risk** - the Fund takes its charges from the capital of the Fund. Investors should be aware that there is potential for capital erosion if insufficient capital growth is achieved by the Fund to cover the charges.
- Investors should note that a more detailed description of risk factors is set out in full in the Prospectus.

## Charges

One-off charges taken before or after you invest	
Entry charge	5.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money. Consult your financial advisor or distributor for the actual amount they may charge.	
Charges taken from the fund over a year	
Ongoing charges	0.74%
Charges taken from the fund under certain conditions	
Performance fee	
A performance fee of 15% is payable on the excess if the NAV outperforms the Index Adjusted NAV (as defined in the Prospectus) on an annual basis. The calculation is performed daily. Any underperformance is carried forward.	
During the year ended 31 December 2025 the performance fee amounted to 0.00%.	

The charges you pay as an investor in the Fund are used to cover the operational costs of the Fund, including marketing and distribution costs. These charges reduce the potential growth of your investment.

The ongoing charges figure shown here is an estimate of the charges.

This figure may vary from year to year and does not include Fund transaction costs.

For more information about charges see the Fund's prospectus, available at [www.johcm.com](http://www.johcm.com).
