Ardtur Eurozone Fund - GBP R (ISIN:IE000CJCC2I8)

a sub-fund of GenFunds Global Plc

The Investment Manager for this Fund is S W Mitchell Capital LLP

The Management Company is Fundrock Management Company (Ireland) Limited

Objectives and Investment Policy

Objective

The Fund's aim is long term capital appreciation through investing mainly in shares issued by companies which derive a significant proportion of their income from or whose principal offices are in the Eurozone i.e. current EU member countries using the euro (€) as their official currency ("Eurozone companies") which are listed or traded on one or more Recognised Exchanges

Investment Policy

The Fund invests primarily in shares of Eurozone companies. The Fund may invest up to 10% of its Net Asset Value ("NAV") in non-Eurozone companies and up to 20% of its NAV in emerging markets. The Fund may also invest up to 10% of its NAV in fixed and/or floating rate securities (such as bonds and commercial paper) issued by government/supranational entities and/or corporates which may be rated or unrated and which are listed or traded on one or more Recognised Exchanges or unlisted. The Fund may also hold up to 5% of its NAV in UCITS and non-UCITS collective investment schemes and up to 30% of its NAV (and up to 50% of its NAV in exceptional circumstances) in cash and/or cash equivalents. Essential features of the Fund:

- ▶ The Fund has the discretion to invest in a range of investments as described above.
- ▶ The Fund's performance is measured against the MSCI EMU Total Return Net Index GBP
- ▶ You can buy and sell shares in the Fund on each business day.

- ▶ The Fund is considered to be actively managed in reference to the MSCI EMU Total Return Net Index GBP (the "Index") by virtue of the fact that it uses the Index for performance comparison purposes. However, the Index is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Index.
- ▶ Derivatives are used for efficient portfolio management and to protect the fund against currency risk.
- ▶ This share class applies for "Reporting Fund" status, thus income from the Fund will be added to the value of your investment and may be distributed after year end.
- ▶ This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

- ▶ Historical data used may not be a reliable indication of the future risk profile of the Fund.
- ▶ This category is not guaranteed to remain unchanged and may change over time.
- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of this Fund. The risk and reward profile shown is not guaranteed to remain the same and may shift over time. Investors may not get back the amount originally invested and may lose money.
- ▶ This Fund is categorised in risk class 5 because, in accordance with the investment policy, the value of the investments may fluctuate somewhat sharply. Consequently, both the expected return and the potential risk of loss may be above average. This indicator is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.

The Fund is subject to the following risks:

- ▶ **Liquidity Risk:** At times, some shares may trade infrequently which means it may be more difficult for the Fund to buy and sell them. Prices may also be subject to short term swings.
- ▶ **Counterparty Risk:** As the Fund may enter into derivative agreements there is a risk that other parties may fail to meet their obligations. This may lead to delays in receiving amounts due to the Fund, receiving less than is due or receiving nothing.
- ▶ **Financial Techniques Impact:** The Fund may invest in derivatives, which may cause the Fund to be leveraged, i.e. the Fund's exposure is greater than its net asset value. A relatively small movement in the value of the derivative's underlying investment may have a much larger impact, positive or negative, on the value of the Fund than if the Fund were to hold the underlying investment itself.
- ▶ **Currency Risk:** At the portfolio level any currency hedging decisions with regards to non-base currency exposures are at the Fund manager's discretion. When the Fund is not hedged, as the Fund invests in overseas securities, any movements in exchange rates may cause the value of your investment to increase or decrease.
- ▶ **Market risk:** the value of investments and the income derived from them may fall as well as rise. There is no assurance that the investment objective of the Fund will be achieved.
- ▶ **Fixed Income Security Risk:** Fixed interest securities are affected by trends in interest rates and inflation. If interest rates go up the value of capital may fall and vice versa. Inflation will also decrease the real value of capital. The value of a fixed interest security is also affected by its credit rating.
- ▶ **Custody risk:** there may be a risk of a loss where the assets of the Fund are held in custody that could result from insolvency, negligence or fraudulent action of the custodian or sub-custodian.
- ▶ For full details of the Fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' overleaf.
