

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

CT MM NAVIGATOR DISTRIBUTION FUND (THE "FUND")

Class C Accumulation Shares (GBP) GB00B80KXN90, a sub-fund of Columbia Threadneedle (UK) ICVC VII (the "Company"), regulated by the FCA.

This sub-fund is managed by Columbia Threadneedle Fund Management Limited, (part of the Columbia Threadneedle Investments group of companies).

Objectives and Investment Policy

- The Fund aims to provide an income higher than the income generated by the composite index over rolling 3-year periods and a total return higher than the index over the long term (5 years or more), after the deduction of charges. The composite index currently comprises:
 - 15% FTSE All-Share Index;
 - 30% MSCI ACWI ex UK Index;
 - 35% Bloomberg Global Aggregate ex Treasury (GBP Hedged) Index;
 - 10% ICE BofA Global High Yield Constrained (GBP Hedged) Index; and
 - 10% Sterling Overnight Index Average (SONIA).
- The Fund is actively managed and invests at least 80% in collective investment schemes and closed ended funds such as investment trusts ("Underlying Funds") to gain exposure to a diversified portfolio of shares, bonds and alternative income producing investments. The Underlying Funds may include those managed by Columbia Threadneedle Investments.
- The shares held by Underlying Funds may include shares of companies anywhere in the world and in any industry sector. The bonds held by the Underlying Funds may include government, corporate bonds and other debt instruments from issuers anywhere in the world (which may include emerging market and high yield bonds). There may be an element of currency exposure from shares or bonds held by the Underlying Funds.
- The Fund may also invest in other transferable securities, money market instruments, deposits, cash and near cash. The Fund may use derivatives (an investment contract between the Fund and a counterparty the value of which is derived from one or more underlying equities) for investment purposes as well as for efficient portfolio management.
- The composite index is broadly representative of the Fund's investment exposure, although the Fund is not constrained by it. It provides a suitably weighted target benchmark of global equities (excluding the UK), UK equities, investment grade bonds (hedged to sterling), high yield bonds (hedged to sterling) and cash, against which Fund performance will be evaluated over time. Therefore, the composite is considered an appropriate target in relation to the income return as well as the Fund's overall performance.
- Any income earned by this share class will be reinvested back into the share class to help boost the value of a share.
- Income from investments in the Fund will be added to the value of your shares.
- You may buy or sell shares daily on demand (but not weekends or UK bank holidays or other days when the Fund is not open for dealing). Orders to buy or sell must be received by 12 noon (UK time) to receive the price calculated at that day's valuation point. We are not required to hold monies arising from the purchase and sales of shares in our funds in a client money bank account and hold these monies in our own bank account, utilising the FCA's permitted one-day window while carrying out a delivery versus payment transaction for the purpose of settling transactions in relation to units in the Fund. In the exceptional event that a transaction is not processed within this one-day window, any cash will be held in a client bank account. No interest will be paid to investors on cash held on a client bank account.
- Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Lower Risk, Typically lower rewards Higher Risk, Typically higher rewards

- The Fund is rated 4 because historically it has shown a medium level of volatility (how much the value of the Fund goes up and down).
- The lowest category does not mean a risk-free investment.
- The indicator does not adequately reflect the following risks of investing in particular assets, which may impact on future investment return:
 - Derivative Risk: derivative values rise and fall at a greater rate than equities and debt instruments. Losses can be greater than the initial investment.
 - Liquidity Risk: the ability to buy and sell assets at a favourable price may be affected by a low level of counterparties willing to enter into a transaction with the Fund.
 - Smaller Companies Risk: smaller companies carry a higher degree of risk and their value can be more sensitive to market movement.
 - Currency Risk: your investment may be adversely affected by changes in currency exchange rates.
 - Fixed Interest Securities Risk: changes in interest rates can affect the values of fixed interest holdings.
 - Emerging Markets Risk: this Fund invests in emerging markets which are less developed and have additional legal and political risks.
 - Credit Risk: receiving income or capital due from debt instruments is dependant on the provider's ability to pay.
 - Property Risk: the value of such securities is likely to reflect valuations of property assets as determined by professional valuers. Such valuations are the opinion of the valuer at a particular time, may not be supported by recent transactions and a liable to revision, up or down.
 - Leverage Risk: the use of derivatives to increase the exposure of the Fund to the market through either long or short positions will make the value of the Fund's investments more volatile than those of an un-leveraged fund.
- All the risks currently identified as being applicable to the Fund are set out in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

| | |
|---------------|-------|
| Entry Charge: | 0.00% |
| Exit Charge: | 0.00% |

These are the maximum charges that we might take out of your money before it is invested. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

| | |
|------------------|-------|
| Ongoing Charges: | 1.44% |
|------------------|-------|

Charges taken from the fund under certain specific conditions

| | |
|------------------|------|
| Performance Fee: | NONE |
|------------------|------|

The ongoing charges figure shown here is an estimate of the charges because recent changes made to the Fund mean that the historic figures do not accurately reflect its ongoing costs. The UK-non-UCITS' annual report for each financial year will include detail on the exact charges made.

For more information about charges please see the Fund's prospectus.

Past Performance

Past performance is not a guide to future performance.

Fund launch date: 01/10/2007

Share/unit class launch date: 29/06/2012

Performance is calculated in GBP.

All charges and fees, except any entry, exit and switching charge, have been included within the performance.

This chart shows how much the Fund increased or decreased in value as a percentage each year.

△ Before this date the Fund had different characteristics.

Please refer to www.columbiathreadneedle.com for further details.

Please note that the target benchmark performance data for this fund will not be shown until a full calendar year has passed. This benchmark was introduced on 01 July 2024, therefore the first target benchmark performance data will be shown from January 2026.
