CT RESPONSIBLE UK EQUITY FUND (THE "FUND")

Class 2 Income Shares (GBP) GB00B8BKZY38, a sub-fund of Columbia Threadneedle (UK) ICVC V (the "Company"), regulated by the FCA.

This sub-fund is managed by Columbia Threadneedle Fund Management Limited, (part of the Columbia Threadneedle Investments group of companies).

Objectives and Investment Policy

- The objective is to achieve capital growth with some income, over the long term (at least 5 years). The Fund also looks to outperform the FTSE All-Share Index over rolling 5-year periods, after the deduction of charges.
- The Fund invests only in assets which meet the Fund's predefined responsible investment criteria.
- The Fund invests at least 80% in shares of UK companies. These are companies in any economic sector and of any market capitalisation that may be listed, quoted or traded in the UK or elsewhere but which are incorporated, domiciled or conduct a significant portion of their business in the UK.
- To the extent that the Fund is not fully invested in shares of UK companies, the Fund may also invest in other transferable securities (including, from time to time at the Investment Manager's discretion, shares of non-UK companies), collective investment schemes (which may include schemes managed by Columbia Threadneedle Investments), money market instruments, deposits, warrants, cash and near cash.
- The Fund may use derivatives for the purposes of efficient portfolio management only.
- As part of its investment process, the Investment Manager integrates environmental, social and governance ("ESG") factors into its routine analysis. Through this process, the Investment Manager: (1) avoids investments that are contrary to the goals of making positive contributions to society and/or the environment, taking into account both product based exclusions and conduct based exclusions; (2) invests predominantly in companies that meet high standards in how they operate, based on an assessment of their policies and performance with respect to overall sustainability management; and (3) improves companies by selecting those that, in the Investment Manager's opinion, will benefit from active investor engagement, leading to reduced risk, improved performance, best practices and, overall, long-term investor value.
- The Fund is actively managed. The FTSE All-Share Index is regarded as an appropriate performance measure of the UK stock market. The Manager believes this is an appropriate target benchmark for reviewing fund performance, given the investment policy of the Fund and the approach taken by the manager. The Fund is not constrained by this benchmark and has significant freedom to invest in a portfolio that is materially different to the benchmark's own composition.
- Any income the Fund generates will be paid to you.
- You may buy or sell shares daily on demand (but not weekends or UK bank holidays or other days when the Fund is not open for dealing). Orders to buy or sell must be received by 12 noon (UK time) to receive the price calculated at that day's valuation point. We are not required to hold monies arising from the purchase and sales of shares in our funds in a client money bank account and hold these monies in our own bank account, utilising the FCA's permitted one-day window while carrying out a delivery versus payment transaction for the purpose of settling transactions in relation to units in the Fund. In the exceptional event that a transaction is not processed within this one-day window, any cash will be held in a client bank account. No interest will be paid to investors on cash held on a client bank account.
- Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Lower Risk, Typically lower rewards — Higher Risk, Typically higher rewards

- The Fund is rated 5 because historically it has shown a medium to high level of volatility (how much the value of the Fund goes up and down).
- The lowest category does not mean a risk-free investment.
- The indicator does not adequately reflect the following risks of investing in particular assets, which may impact on future investment return:
- Derivative Risk: derivative values rise and fall at a greater rate than equities and debt instruments. Loses can be greater than the initial investment.
- Liquidity Risk: the ability to buy and sell assets at a favourable price may be affected by a low level of counterparties willing to enter into a transaction with the Fund.
- Smaller Companies Risk: smaller companies carry a higher degree of risk and their value can be more sensitive to market movement.
- Ethical Screening Risk: the screening out of sectors or companies on ethical grounds may mean the Fund is more sensitive to price swings than an equivalent unscreened fund.
- ESG Investment Criteria Risk: The Fund may apply a range of measures as part of its consideration of ESG factors, including the exclusion of investments involved in certain industries and/or activities. This reduces the investable universe and may impact the performance of the Fund positively or negatively relative to a benchmark or other funds without such restrictions.
- The risks currently identified as applying to the Fund are set out in the "Risk Factors" section of the Prospectus.
