Jupiter Global Managed Fund I-Class

I-Class Accumulation Units, ISIN: GB00B6QMY217

The Manager is Jupiter Unit Trust Managers Limited.

Objectives and investment policy

Objective

The Fund objective is to provide a return, net of fees, higher than that provided by the FTSE World Index over the long term (at least five years).

Policy

At least 70% of the Fund is invested in shares of companies based anywhere in the world. Up to 30% of the Fund may be invested in other assets, including open-ended funds (including funds managed by Jupiter and its associates), cash and near cash.

Strategy

The fund manager takes a fundamental approach to selecting individual securities in order to construct a portfolio of shares in companies from a diversified range of sectors giving investors broad exposure to opportunities around the world. The fund manager invests in some of the highest quality companies in the world, believing that quality underpins durable and persisting long-term returns. The manager places particular emphasis on CEO remuneration, incentives and contribution to returns. A disciplined process is applied to identify shares of companies that offer strong growth prospects and/or dividend yield.

The Fund will tend to invest in a carefully selected number of companies where the manager has the highest conviction.

Benchmarks

Target benchmark - FTSE World Index

The FTSE World Index is an industry standard index and is one of the leading representations of global stock markets. It is easily accessible and provides a fair reflection of the Fund Manager's investment universe and a good relative measure to assess performance outcomes.

Comparator benchmark - IA Global Sector

Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to help investors to compare funds with broadly similar characteristics. This Fund is classified in the IA Global Sector.

Active Management

The Fund is actively managed. This means the fund manager is taking investment decisions with the intention of achieving the Fund's investment objective; this may include decisions regarding asset selection, regional allocation, sector views and overall level of exposure to the market. The fund manager is not in anyway constrained by the benchmark in their portfolio positioning, and will not hold all, or indeed may not hold any, of the benchmark constituents.

Any income arising in relation to this share class will be accumulated (i.e. automatically reinvested and reflected in the price of the shares).

Investors are able to buy and sell units during any business day between 9am and 5.30pm. If you tell us to buy or sell units before 12pm on any business day we will make the transaction on the same day. If you tell us to buy or sell units after 12pm we will make the transaction on the following business day.

Recommendation

This fund may not be suitable for investors who plan to withdraw their capital within 5 years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- Market and exchange rate movements can cause the value of an investment to fall as well as rise, and you may get back less than originally invested.

Charges

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment.

Charges taken from the Fund over a year

Ongoing charges	0.97%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
- The ongoing charges figure is based on the fixed annual charge as detailed in the Scheme Particulars. Where the Fund invests in other underlying funds, which may include closed-ended funds such as investment trusts, the ongoing charges figure will include the ongoing charges for those funds, and will therefore vary from year to year. The ongoing charges figure excludes portfolio transaction costs, except in the case of an entry/ exit charge paid by the Fund when buying or selling shares in another collective investment undertaking.
- Further information about charges is available in sections 18 and 19 of the Scheme Particulars which are available from Jupiter on request.
