

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Jupiter Global Leaders Fund T-Class

T-Class Accumulation Units, ISIN: GB00BFWVP888

The Manager is Jupiter Unit Trust Managers Limited.

SDR labels. Sustainable investment labels help investors find products that have a specific sustainability goal. This Fund does not have a UK sustainable investment label under the Sustainability Disclosure Requirements. This is because while the Fund has sustainability characteristics, it is not managed to meet a sustainability objective. The sustainability characteristics will be measured by Key Performance Indicators (KPIs).

Objectives and investment policy

Objective

The Fund objective is to provide a return, net of fees, that is higher than that provided by the MSCI AC World - Net Total Return Index over the long term (at least five years).

Policy

At least 70% of the Fund is invested in shares of companies which the Investment Manager considers to be leaders demonstrating high quality economic characteristics as well as environmental and/or social characteristics that support their leadership position (as further set out in the investment strategy) and offer the potential for growth, based anywhere in the world. The Investment Manager also takes environmental, social and governance ("ESG") risks and opportunities into account as part of its investment selection process. In assessing whether a potential investee company meets the Investment Manager's definition of a leader, the Investment Manager requires that a company either: (i) provides products or services that are, or operates in a way that is, aligned with the delivery of one or more of the United Nations Sustainability Development Goals ("UN SDGs") or (ii) aligns operationally with the temperature goals of the Paris Agreement, in each case, as set out in the investment strategy. The Investment Manager will not invest in a company that, in its opinion, is assessed as violating the principles of the United Nations Global Compact ("UNGC"). Up to 30% of the Fund may be invested in other assets, including shares of other companies, open-ended funds (including funds managed by Jupiter and its associates), cash and near cash, deposits and money market instruments. The Fund may use derivatives (i.e. financial contracts whose value is linked to the expected price movements of an underlying investment) with the aim of reducing the overall costs and/or risks of the Fund.

Strategy

The Investment Manager applies a disciplined process to identify shares of companies it considers to be leaders. Leaders are identified as companies with a history of high quality economic characteristics that align to good environmental and social outcomes. The Investment Manager assesses relevant ESG risks and opportunities on a case-by-case basis according to each company's specific circumstances. Leaders demonstrate high quality economic characteristics; (i) maintain strong competitive advantages leading to an attractive economic profile and strong competitive positioning within their sector, (ii) affordable levels of borrowing; and (iii) generate long term cash flow through an economic cycle. Leaders also demonstrate long termism (typically measured on at least a 5-10 year forward basis) in their stakeholder balance by

incorporating environmental and/or social outcomes. In making this assessment, the Investment Manager assesses relevant ESG risks and opportunities on a case-by-case basis according to each company's specific circumstances, typically determined by product(s), service(s), sector(s) and/or region(s). The Investment Manager reports KPIs against its sustainability characteristics in its Consumer Facing Disclosures to show how its investments align with positive environmental and social outcomes.

Benchmarks

Target benchmark – MSCI AC World - Net Total Return Index

The MSCI AC World - Net Total Return Index is an industry standard index and is one of the leading representations of global stock markets. It is easily accessible and provides a fair reflection of the Investment Manager's investment universe and a good relative measure to assess performance outcomes.

Comparator benchmark - IA Global

Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to help investors to compare funds with broadly similar characteristics. This Fund is classified in the IA Global.

Active Management

The Fund is actively managed. This means the Investment Manager is taking investment decisions with the intention of achieving the Fund's investment objective; this may include decisions regarding asset selection, regional allocation, sector views and overall level of exposure to the market. The Investment Manager is not in any way constrained by the benchmark in their portfolio positioning, and will not hold all, or indeed may not hold any, of the benchmark constituents.

Recommendation

This fund may not be suitable for investors who plan to withdraw their capital within 5 years.

Any income arising in relation to this unit class will be accumulated (i.e. automatically reinvested and reflected in the price of the shares).

Investors are able to buy and sell units during any business day between 9am and 5.30pm. If you tell us to buy or sell units before 12pm on any business day we will make the transaction on the same day. If you tell us to buy or sell units after 12pm we will make the transaction on the following business day.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- Currency (FX) Risk** - The Fund can be exposed to different currencies and movements in foreign exchange rates can cause the value of investments to fall as well as rise.

- Pricing risk** - Price movements in financial assets mean the value of assets can fall as well as rise, with this risk typically amplified in more volatile market conditions.
- Derivative risk** - the Fund may use derivatives to reduce costs and/or the overall risk of the Fund (this is also known as Efficient Portfolio Management or "EPM"). Derivatives involve a level of risk, however, for EPM they should not increase the overall riskiness of the Fund.
- Counterparty Default Risk** - The risk of losses due to the default of a counterparty e.g. on a derivatives contract or a custodian that is safeguarding the Fund's assets.
- ESG Equity Data** - The Fund uses data from third parties (which may include providers for research, reports, screenings and/or analysis such as index providers and consultants) and that information or data may be incomplete, inaccurate or inconsistent
- ESG and Sustainability** - Investments are selected or excluded on both financial and non-financial criteria. The Fund's performance may differ from the broader market or other funds that do not utilise ESG/Sustainability criteria when selecting investments.
- For a more detailed explanation of risk factors, please refer to the "**Risk Factors**" section of the Scheme Particulars.

Charges

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out. In some cases, you might pay less and you can find out the actual entry and exit charges from your financial adviser or distributor.

Charges taken from the Fund over a year

Ongoing charges	0.71%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	None
-----------------	------

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
- The ongoing charges figure is based on the fixed annual charge as detailed in the Scheme Particulars. With effect from 23/02/24 the fixed annual charge may be subject to a discount based on the value of the Fund's scheme property. The current discount rate, if applicable, can be found at www.jupiteram.com/uk/en/professional/tiered-pricing-on-the-fixed-annual-charge/. Where the Fund invests in other underlying funds, which may include closed-ended funds such as investment trusts, the ongoing charges figure will include the ongoing charges for those funds, and will therefore vary from year to year. The ongoing charges figure excludes portfolio transaction costs, except in the case of an entry/ exit charge paid by the Fund when buying or selling shares in another collective investment undertaking.
- Further information about charges is available in section 18 of the Scheme Particulars which are available from Jupiter on request.

Past performance
