

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Legal & General Dynamic Bond Fund Class R Accumulation - ISIN: GB00B1TWMM97

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

OBJECTIVES AND INVESTMENT POLICY

- The objective of this Fund is to provide income and growth.
 - The Fund is actively managed and may invest at least 80% in investment grade (rated as lower risk) and sub-investment grade (rated as higher risk) bonds with a credit rating from a recognised credit rating service or which are listed or traded in an OECD Country (the Organisation for Economic Co-operation and Development). Bonds are types of loan which pay interest. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
 - These are bonds with a credit rating from a nationally recognised statistical rating organisation (NRSRO) or non-rated bonds that are assessed as being an equivalent rating by the Manager.
 - The bonds held may be issued by companies or governments and may be issued in the UK or overseas.
 - The Fund will have a net exposure of at least 80% to Sterling.
 - The Fund may also use a variety of derivative transactions (financial instruments whose value is linked to the price of an underlying instruments) for both investment purposes to enhance the performance of the fund and efficient portfolio management to reduce risk or cost.
 - Where considered in the interests of investors, derivatives may be used to synthetically alter the characteristic of the bonds, such as to protect against credit and duration risk. Duration risk measures the sensitivity of bond prices to changes in interest rates.
 - The types of derivatives used include credit default swaps, interest rate swaps, foreign exchange and other Over the Counter (OTC) instruments as well as exchange traded instruments including futures and options.
 - The use of derivatives for these purposes may be extensive and may affect the volatility or risk profile of the fund although this is not the intention.
 - The Fund may also invest in transferable securities, such as company shares, asset and mortgage backed securities and loans, contingent convertible bonds, collective investment schemes, money market instruments, cash and deposits. The collective investment schemes in which the fund may invest may include schemes which are managed or operated by the Manager or an associate of the Manager.
- Other information:**
- The Fund is actively managed as the Manager uses their expertise to select investments to achieve the Fund's objectives.
 - The IA Sterling Strategic Bond is a benchmark which is used as a performance comparator of the Fund. See the Past Performance section for further details.
 - Your units will be accumulation units. Income from the Fund's investments (interest) will be reinvested back into the value of your units.
 - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 3.00pm. This is the time we calculate unit prices for this Fund. If you contact us after 3.00pm, the units will be bought or sold at the next business day's price.
 - The Fund's base currency is denominated in sterling (British pounds).
 - This Fund is designed for investors looking for growth and income from an investment in a range of bonds, derivatives and/or cash.
 - Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
 - This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
 - If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

RISK AND REWARD PROFILE

Lower risk ← Higher risk
Potentially lower rewards ← Potentially higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
 - The Fund is in category 4 because it invests in company or government bonds which are sensitive to changes in interest rates, inflation and credit. This can be driven by political and economic changes and other significant events and may cause the value to go up and down. Bonds that are closer to their maturity date tend to be more stable in value. Bonds are generally considered to be higher risk investments than cash, but lower risk than company shares.
 - Even a fund in the lowest category is not a risk free investment.
 - The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.
- Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports. The risk and reward indicator may not take account of the following risks of investing in the Fund:
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
 - The Fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the Fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depositary.
 - The Fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the Fund may fall.
 - Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
 - Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
 - The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
 - We may take some or all of the ongoing charges from the Fund's capital rather than the Fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the Fund.

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested.

The price for buying and selling units is subject to a Dilution Adjustment See opposite.

Charges taken from the fund over a year

Ongoing charge	1.22%
-----------------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
------------------------	------

- There are no entry or exit charges.
- The ongoing charges figure is based on the latest available expenses at January 2022. This figure may vary from year to year.
- This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
- The ongoing charges are taken partly from the income and partly from the capital of the Fund.

Other costs:

- **Dilution Adjustment:** on any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'. This can vary but as an example for this Fund we estimate 0.22% for purchases and 0.22% for sales at 02 February 2022. The amount of the dilution adjustment may differ in future.
- For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at legalandgeneral.com/chargesandfees.

PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested.
- The performance has been calculated in Sterling (British Pounds).
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 2007.
- This unit class launched in 2007.
- To assess the performance of the Fund, it can be compared to the IA sector, Sterling Strategic Bond (referred to as the "Comparator" in the chart opposite).
