## KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## OBJECTIVE AND INVESTMENT POLICY

### Objectives

The fund's objective is capital appreciation, measured in euros.

### Investment Policies

The fund invests primarily (at least 70%) in European equity securities. Some of the countries in Europe, primarily those in Eastern Europe, are currently considered emerging market economies. The fund generally focuses its investments in companies it believes to be undervalued compared to their intrinsic value (value companies). The fund may invest a relatively large percentage of the fund's assets in a small number of companies. The fund will promote an environmental characteristic under Article 8 of Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector ("SFDR") (see the fund's Prospectus and website for more information). The Investment Manager may also consider environmental, social and governance (ESG) factors in its fundamental analysis alongside other factors.

The fund's benchmarks, MSCI Europe Index (net div) and MSCI Europe Value Index (net div), are indicated for performance comparison only. Although the fund's investments will generally be represented in the benchmark, components are likely to be weighted differently from the benchmark and the fund is likely to invest outside of the benchmark to take advantage of attractive investment opportunities. The fund is actively

managed within its objectives and the investment strategy will not restrict the extent to which portfolio holdings may deviate from the benchmark. It is expected that the fund's deviation from the benchmark will be significant.

**Currency Hedging.** MFS will generally enter into currency hedging transactions for this class with the aim to reduce exchange rate and return fluctuations between the class and euros, the base currency class of the fund.

**Distributions.** Income will not be distributed to shareholders but reflected in the assets of the fund.

**Redeeming Shares.** You may sell your shares on each business day when banks in Luxembourg are open for normal business and the New York Stock Exchange is open for trading.

**Terms to Understand.**

**Equity securities** represent an ownership interest, or the right to acquire an ownership interest, in a company or other issuer.

**Derivatives** are financial contracts whose value is based on the value of one or more underlying indicators or the difference between underlying indicators.

## RISK AND REWARD PROFILE

This rating system is based on how much the returns of the class have varied over the past 5 years. Where 5 years' performance history is not available the data consists of historical returns representative of the fund, benchmark returns or returns for another class with the same currency as appropriate. Past returns may not be a reliable indicator of the future risk and reward profile of the class, and the rating may change over time based on the more recent returns. A fund in the lowest category does not mean a risk-free investment.

### Lower risk

Typically lower rewards

### Higher risk

Typically higher rewards

The fund is in category 5 because there has been medium high fluctuations in the fund's return historically.

**Equity Risk:** Prices of equity securities can vary significantly in response to issuer, market, economic, industry, political, geopolitical, public health, cybersecurity and regulatory conditions. This risk may be higher where the fund geographically concentrates its investments or invests in a small number of companies. The fund invests in companies believed to be

undervalued compared to their intrinsic value, which may underperform the broader market during certain stages of the market cycle.

**Emerging Markets Risk:** Emerging markets can be more volatile and less liquid than more developed markets.

**Currency Risk:** Changes in currency rates can significantly affect the value of your investment, and may also affect the financial condition of the issuers in which the fund invests.

### Other Risks

The rating does not reflect the risk that these factors, as well as other factors such as liquidity, counterparty, and operational risks change over time and can affect the fund's returns differently in the future.

The fund may not achieve its objective and/or you could lose money on your investment in the fund. For more information about the fund's risks, please see "Fund Profiles" and "Risk Factors" in the Prospectus.

The hedging strategy for the Hedged Share Classes will not completely eliminate the exposure to currency movements. There can be no guarantee that returns of Hedged Share Classes will exceed those of Unhedged Classes.
