

Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

IFSL

Fund Services

IFSL Marlborough Global Fund Class P Units

(ISIN Accumulation GB00B84KX912)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

The aim of the Fund is to increase the value of your investment, over any 5 year period. The Fund aims to outperform the average of the IA Global sector, after charges, over any 5 year period. However, there is no certainty this will be achieved.

At least 80% of the Fund will be invested in other funds, including exchange traded funds (which typically track an index) and investment trusts. This may include other funds operated by the Manager or its associates. Through these investments, the Fund will be exposed to a range of assets, creating a medium to high risk portfolio.

At least 80% of the Fund will be exposed to shares in companies, both UK and overseas.

Investments will span a range of developed and emerging markets globally with no particular maximum or minimum exposure to any one market or geographical region.

Through investing in funds, the Fund may also be exposed to other asset classes such as bonds, property, commodities (such as gold and oil), money market instruments, which are shorter term loans, cash and other permitted investments, although this is expected to be minimal. Funds purchased may also have the ability to use derivatives (investments whose returns are linked to another asset, market or other variable factor) to varying degrees, including funds which aim to deliver positive returns in a range of market conditions, often referred to as absolute return funds.

The Fund may also invest directly in shares up to a maximum of 20%.

The Fund is actively managed, which means the Investment Manager decides which investments to buy or sell and when. Investments will span a range of developed and emerging markets globally, with no particular maximum or minimum exposure to any one market or geographical region, but will maintain exposure to a range of countries.

Decisions around asset allocation are based on the Investment Manager's research process which considers the potential for loss as well as the overall return expectations for an asset class.

The Fund may invest in derivatives or forward transactions whose returns are linked to exchange rates in order to reduce currency risk (also known as hedging).

The performance target is the level of performance the Fund aims to deliver after changes and with income reinvested however there is no certainty this will be achieved.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors' as a way of dividing funds into broad groups with similar characteristics. This Fund aims to be in the top half of all funds included in the IA Global sector.

The IFSL Marlborough Global Fund does not pay income. Instead, any income received by the Fund is reinvested back into the Fund.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 5 because its investments have experienced moderate to high volatility in the past. The Fund's volatility is affected by various risks, including:

- The Fund will be exposed to stock markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
- The Fund has exposure to bonds, the prices of which will be impacted by factors including: changes in interest rates, inflation expectations and perceived credit quality.
- When interest rates rise, bond values generally fall. This risk is generally greater for longer term bonds and for bonds with perceived lower credit quality.
- The Fund invests in other currencies. Changes in exchange rates will therefore

affect the value of your investment.

The Fund may invest a large part of its assets in other funds for which investment decisions are made independently of the Fund. If these Investment Managers perform poorly, the value of your investment is likely to be adversely affected. Investment in other funds may also lead to duplication of fees and commissions.

Risks which are not adequately captured by the risk indicator include:

- In certain market conditions some assets may be less predictable than usual. This may make it harder to sell at a desired price and/or in a timely manner.
- In extreme market conditions redemptions in the underlying funds or the Fund itself may be deferred or suspended.
- The insolvency of any institution providing services, such as safekeeping of assets or holding investments with returns linked to financial contracts (known as derivatives), may expose the Fund to financial loss.
- The Fund may enter into various financial contracts (known as derivatives) in an attempt to protect the value of the Fund's assets or to reduce the costs of investing, although this may not be achieved.

A more detailed description of the risks that apply to this Fund can be found in the Fund's prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses for the year ending 31/12/2021. From 30 April 2021, the Ongoing Charge calculation has been extended to include, where relevant, charges incurred by closed-ended vehicles such as investment trusts. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the non-UCITS retail scheme when buying or selling units in another collective investment undertaking.

For more information about charges, please see Section 13 of the Fund's Prospectus, which is available at www.ifslfunds.com.

One-off charges taken before or after you invest

| | |
|--------------|-------|
| Entry Charge | 0.00% |
| Exit Charge | None |

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

| | |
|-----------------|-------|
| Ongoing Charges | 1.32% |
|-----------------|-------|

Charges taken from the fund under certain conditions

| | |
|-----------------|------|
| Performance Fee | None |
|-----------------|------|

Past Performance

Historic performance to 31 December 2021

| | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 | 2021 |
|-------------|------|------|------|------|------|------|-------|------|------|------|
| ■ Fund | 11.5 | 17.7 | 9.6 | 3.4 | 23.0 | 12.5 | -10.2 | 20.8 | 10.9 | 15.1 |
| ■ Benchmark | 9.7 | 21.8 | 7.0 | 2.9 | 23.9 | 13.9 | -5.7 | 22.0 | 14.8 | 17.6 |

Past performance is not a guide to future returns.

Performance figures are calculated in Sterling on a bid price basis and include net reinvested income. They include the annual management charge and all other Fund expenses but do not include the entry charge.

The Fund was launched on 18 May 1992.

This Unit Class was launched on 31 December 2012 and first priced on 2 January 2013. In the period to 02/01/2013, past performance is represented by the Fund's A class units.

Benchmark: IA Global.
