Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Vanguard ESG Global Corporate Bond Index Fund (the "Fund")

A sub-fund of Vanguard Investment Series Plc

GBP Hedged Accumulation Shares

ISIN: IE00BNDS1195

Manager: Vanguard Group (Ireland) Limited ("VGIL")

Objectives and investment policy

- The Fund employs a passive management – or indexing – investment approach and seeks to achieve the performance of the Bloomberg MSCI Global Corporate Float Adjusted Bond Screened Index (the "Index").
- The Fund invests in a multi-currency portfolio of investment grade corporate fixed-rate bonds from both developed and emerging market issuers that consists of a representative sample of the component securities of the Index.
- The Index is constructed from the Bloomberg Global Aggregate Float-Adjusted Corporate Index (the "Parent Index") which represents a similar investment universe which is then screened for certain environmental, social, and governance (i.e. controversy-related) criteria (the "screening criteria"), by Bloomberg as the sponsor of the Index, which is independent of Vanguard. Through the screening out of bonds issued by corporate issuers from its portfolio based on the potentially detrimental impact of the relevant corporate issuer's conduct or products on society and / or the environment, the Fund promotes certain environmental characteristics and social characteristics relating to social norms and standards. The Index methodology excludes the bonds of corporate issuers that MSCI determines (a) to be engaged in activities in or involved in specific parts of the supply chain for, and/or (b) derive revenue (above a threshold specified by the Index provider) from, certain business segments of activities related to the following: (i) adult entertainment, (ii) alcohol, (iii) gambling, (iv) tobacco, (v) nuclear weapons, (vi) controversial weapons, (vii) conventional weapons, (viii) civilian firearms, (ix) nuclear power, or (x) fossil fuels (which includes thermal coal, oil, or gas., oil sands, arctic oil or arctic gas). The index provider defines what constitutes "involvement" in each activity. This may be based on percentage of revenue or any connection to a restricted activity regardless of the amount of revenue received, and will relate to specific parts of the supply chain. The Index excludes the bonds of corporate issuers that have a controversy score of zero as defined by MSCI's ESG controversies assessment framework. Where MSCI has insufficient or no data available to adequately assess a particular corporate issuer relative to the screening criteria of the Index, bonds of such issuer will be excluded from the Index until such time as they will be determined to be eligible by MSCI.
- The Fund's investments will, at the time of purchase, comply with the screening criteria, except as otherwise described below or in the Prospectus. In circumstances where the Fund holds securities which do not adhere to the screening criteria, the Fund may temporarily hold such securities until such time as they cease to form part of the Index and it is possible and practicable (in the investment manager's view) to liquidate the position. The Fund may also hold fixed-rate government and corporate bonds that are not component securities of the Index, but whose risk and return characteristics closely resemble the risk and return characteristics of constituents of the Index or of the Index as a whole and which, in the case of corporate bonds, meet the screening criteria. While the Fund is expected to track the Index as closely as possible, it typically will not match the performance of the Index exactly, due to various factors such as expenses to be paid by the Fund and regulatory constraints. Details of these factors and the anticipated tracking error of the Fund are set out in the Prospectus. The Fund attempts to remain fully invested except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The base currency of the Fund is USD.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index. Derivatives on an index (e.g. swaps, futures) may contain some underlying constituents which may not meet the screening criteria.
- The base currency of the Fund is USD.
- The Fund invests in securities which are denominated in currencies other than the base currency. Movements in currency exchange rates can affect the return of investments. Currency hedging techniques are used to minimise the risks associated with movements in currency exchange rates, where the Fund invests in securities denominated in currencies other than the listing currency, but these risks cannot be eliminated entirely. As this document relates to a share class where such techniques are used, the performance (see "Performance") of this share class is shown against the currency hedged version of the Index.
- The Fund is appropriate for long-term investment. You should have an investment horizon of at least 3 years.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- The Fund attempts to remain fully invested except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- Portfolio transaction costs will have an impact on performance.
- Subject to certain exceptions set out in the Prospectus, Shares in the Fund can be bought or sold or exchanged on a daily basis (save on certain bank / public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus or in a separate Supplement) by submitting an application in writing. A list of the days on which shares in the Fund cannot be bought or sold is available on https://fund-docs.vanguard.com/holiday-calendar-vanguard-investment-series-plc-irish-funds.pdf

For further information about the objectives and investment policy of the Fund, as well as the limited relationship with the Index provider, please see Appendix 1 and Appendix 6 of the Vanguard Investment Series plc prospectus (the "Prospectus") on our website at https://global.vanguard.com

Risk and reward profile

Lower risk — Higher risk

Typically lower rewards — Typically higher rewards

1	2	3	**4**	5	6	7

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 4 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

  - The value of bonds and fixed income-related securities is affected by influential factors such as interest rates, inflation, credit spreads and volatility which, in turn, are driven by other factors including political, economic news, company earnings and significant corporate events.

  - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfers of assets and failed/ delayed delivery of securities or payments to the Fund.

  - Movements in currency exchange rates can adversely affect the return of your investment.

  - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

  - Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily. This could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.
- Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Index sampling risk. As the Fund uses a representative sample of securities to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.
- Credit risk. The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Screening risk. A Fund may track an index which screens out possible investments if they do not meet certain screening criteria. This may affect the Fund's exposure to certain issuers and cause the Fund to forego certain investment opportunities. The relevant Fund may perform differently to other funds, including underperforming funds that do not seek to screen investments in this way
- Index Accuracy Risk. There is no assurance that the Index provider will compile the Index accurately or that the Index will be determined, composed or calculated correctly.
- Unscheduled rebalancing risk. Apart from scheduled rebalances, the Index provider may carry out additional ad hoc rebalances to the Index.
- Inflation risk. The value of your investments may not be worth as much in the future due to changes in purchasing power resulting from inflation.

For further information on risks please see the "Risk Factors" section of the Prospectus on our website at https://global.vanguard.com

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charges	0.20%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures and in some cases you might pay less. Investors can find out the actual entry and exit charges from their distributor and or adviser.

The ongoing charges figure is based on expenses for the year ended 31 December 2025. This figure may vary from year to year. It excludes portfolio transaction costs.

For further information about charges please see the sections entitled "Buying Shares", "Redeeming Shares", "Charges and Expenses", " Dilution Adjustment" and Appendix 1 of the Prospectus on our website at https://global.vanguard.com

Past performance
