

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Baillie Gifford Multi Asset Income Fund - Class B Shares

Income Shares - ISIN GB00BFXY2857 (also representative of Accumulation Shares - ISIN GB00BFXY2964)

This Fund is a sub-fund of Baillie Gifford Investment Funds II ICVC which is an Investment Company with Variable Capital. Baillie Gifford & Co Limited is the Authorised Corporate Director of the Fund and is wholly owned by Baillie Gifford & Co.

Objectives and investment policy

Objective

- The Fund aims to produce monthly income, whilst seeking to maintain the value of that income and of capital in line with inflation (UK CPI) over five-year periods.

Policy

- The Fund will gain exposure to a wide range of asset classes in any country or sector.
- At any one time, the Fund may be invested in any one or more of the following: shares, bonds, money market instruments, deposits, and cash. This exposure may be achieved directly or indirectly through collective investment schemes.
- The Sub-fund may also invest indirectly in property, infrastructure, commodities and loans.
- Currency forwards and derivatives, which are types of financial contracts, are used for both investment purposes and in the management of risk.
- The Fund will be exposed to foreign currencies.
- The Fund will be actively managed.

Other Information

- Bonds are a type of investment which can be issued by governments, companies and other organisations when they want to borrow money. The issuer of the bond owes the holder a debt. The issuer is obliged to pay interest and/or repay the debt at a later date.
- Derivatives may be used to obtain, increase or reduce exposure to assets and may result in the Fund being leveraged. This may result in greater movements (down or up) in the price of shares in the Fund. It is not our intention that the use of derivatives will significantly alter the overall risk profile of the Fund.
- You can sell some or all of your shares on any business day in the United Kingdom by contacting our Dealing Department by phone or post. Where properly completed documentation is received by post, shares will be sold at the next valuation point following receipt of the instruction.
- For Income shares any income due to you will be paid into your bank or building society account, paid on the dates specified in the Prospectus. For Accumulation shares income will be re-invested. No further shares will be purchased but the reinvestment will be reflected in the price of your existing accumulation shares. You are, however, deemed to have received the income for tax purposes.
- For further explanation and information see the investment objective and policy section of the Prospectus, which is available by contacting us.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk ← → Typically higher rewards, higher risk

- Please note that even the lowest risk class can lose you money and that extreme adverse market circumstances can mean you suffer severe losses in all cases. The Fund is classified in the category above because it invests in a variety of asset classes, including shares in companies, bonds, property, infrastructure, commodities, and currencies, which generally provide higher rewards and higher risks than other investments such as investment solely in bonds or cash. Where no share price history is available for any part of the last five years (and thus no returns), the returns of the Fund's sector are used in its place to calculate the Risk and Reward Indicator. The indicator does not take into account the following relevant material risks which may affect income and reduce the capital value of the Fund.
- The Fund does not guarantee positive returns. It aims to maintain the capital value in line with inflation, however this is not guaranteed.
- The Fund has exposure to foreign currencies and changes in the rates of exchange will cause the value of any investment, and income from it, to fall as well as rise and you might not get back the amount invested.
- The Fund invests in emerging markets where difficulties in trading could arise, resulting in a negative impact on the value of your investment. Custody of assets, particularly in emerging markets, involves a risk of loss if the custodian becomes insolvent or breaches duties of care.
- Bonds issued by companies and governments may be adversely affected by changes in interest rates, expectations of inflation and a decline in the creditworthiness of the bond issuer. The issuers of bonds in which the Fund invests, particularly in emerging markets, may not be able to pay the bond income as promised or could fail to repay the capital amount.
- Market values for illiquid securities which are difficult to trade, or value less frequently than the Fund, such as holdings in weekly or monthly dealt funds, may not be readily available. There can be no assurance that any value assigned to them will reflect the price the Fund might receive upon their sale. In certain circumstances it can be difficult to buy or sell the Fund's holdings and even small purchases or sales can cause their prices to move significantly, affecting the value of the Fund and the price of shares in the Fund.
- Infectious viruses may pose significant threats to human health and may be highly disruptive to global economies and markets. The economic and market disruptions caused by infectious viruses could impact the value of the investments of the Fund and the distributions paid by the Fund to shareholders.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	0.56%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- For the ongoing charges, the figure is for Income Shares and is at 31/12/2020.
- For distribution purposes the Authorised Corporate Director has the facility to allocate some or all expenses to capital. This will reduce the capital value of the Fund. For the year to 30 June 2020 100% of expenses were allocated to capital. The figure for the current financial period has not yet been determined however this number may vary from year to year.
- Portfolio transaction costs, which are not included in the calculation of the ongoing charges figure but are incurred by the Fund when buying or selling investments, may have an impact on performance and are paid from the assets of the Fund.
- The Fund's annual report for each financial year will include detail on the exact charges made.
- You can find further details about the charges in Part 5 of the Prospectus.

Past performance

Practical information

- The Fund's Depository is NatWest Trustee & Depository Services Limited.
- This document describes only one share class and other share classes are available. Further information on the Fund, the Prospectus and the latest annual and interim reports are available from Baillie Gifford or by visiting the website at www.bailliegifford.com. The remuneration policy, which includes details of (a) how remuneration and benefits are calculated and (b) the committee responsible for approving all remuneration policies within the firm, is also at the website address noted. All such documents are available in English, on paper and are free of charge on request.
- This Key Investor Information Document describes the Baillie Gifford Multi Asset Income Fund only. The Prospectus and the annual and interim reports and accounts are prepared for the whole ICVC.
- The Baillie Gifford Multi Asset Income Fund is a sub-fund of Baillie Gifford Investment Funds II ICVC. The assets of the Fund are segregated from other sub-funds in the ICVC. This means that the assets of one sub-fund should not be used to meet the liabilities of another sub-fund.
- You can also find other information, including the Fund's latest prices, on our website.
- Tax laws in the United Kingdom may have an impact on your own tax position.
- You may at any time switch all or some of your shares in the Fund for shares in any fund of any of the Baillie Gifford ICVC(s).
- Baillie Gifford & Co Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for the Fund.
- To contact us please call Client Relations on 0800 917 2113 (fax 0131 275 3955), visit our website at www.bailliegifford.com or email us at trustenquiries@bailliegifford.com.
- Your call may be recorded for training or monitoring purposes.
