

This document provides you with the key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## WS Keyridge Diversified Risk Managed III Fund (the "Fund"),

a fund within WS Keyridge Asset Management (Non-UCITS) Fund (the "Company")  
Waystone Management (UK) Limited is the Authorised Corporate Director of the Fund.

**Class C Accumulation (ISIN: GB00BZ005541)**

## Objective and Investment Policy

### Objective

To achieve growth in capital (an increase in the value of the Fund) and income (money available to be paid out by the Fund) after all costs and charges have been taken, over at least five years. The sub-fund will seek to remain in risk profile 3 on a scale of 1 to 10, where 1 is the lowest risk profile and 10 is the highest risk profile. For further information on the approach to risk please refer to the Approach to Risk document on the Waystone website [www.waystone.com](http://www.waystone.com).

There is no guarantee that the objective will be met over any time period and you may get back less than you invest.

### Investment Policy

To invest in the following asset classes: bonds (which are loans to either a company or government that usually pay interest), equities (company shares), cash, money market instruments (which are short term loans that pay interest) and alternative investments (including property).

The asset mix is tailored to its risk profile (which is provided by Defaqto an external risk provider). At least 45% of the sub-funds assets will be exposed to lower risk assets such as fixed income and cash, 0%-40% in equities, with no more than 10% in alternative investments.

The Fund may also invest up to 10% of the assets by value directly in permitted transferable securities to gain exposure to the above asset classes.

The Fund can invest in equities issued by non-UK domiciled entities denominated in sterling or non-sterling, and will typically invest in sterling denominated assets which in turn may have exposure to non-sterling denominated currency.

Using the Strategic Asset Allocation (SAA) the Portfolio Manager constructs a diversified, actively managed portfolio, they may position the portfolio away from the SAA on a medium to long term basis, or to capture opportunities presented by shorter term market movements. In such instances the allocation of the portfolio will be kept consistent with

achieving the Fund's objective.

The Portfolio Manager's views of the economic environment along with the absolute and relative risk-adjusted attractions of different asset classes is used to determine the mix of assets to invest in, they will adjust the asset allocation on an ongoing basis to reflect changes in the SAA and to take advantage of tactical investment opportunities.

### Other features of the Fund:

The Fund is actively managed. The Portfolio Manager uses its expertise to select investments for the Fund and has the discretion to invest without the need to adhere to a particular benchmark.

The Fund can invest in other funds (including those managed by the Manager, the Portfolio Manager and its associates).

The Fund can invest across different geographic areas and industry sectors without limitation.

You can buy and sell shares in the Fund on each business day.

Any income generated from the Fund is reinvested and reflected in the value of your investment.

Derivatives (whose value is linked to that of another investment, e.g. company shares, currencies) may be used to manage the risk profile of the Fund.

At least 90% of the Fund will not be invested directly in the above assets, but by using other funds.

Whilst the Fund can invest in different asset classes it may not have exposure to all asset classes at all times, the Portfolio Manager may operate outside of the limits to ensure the risk profile is adhered to.

In extraordinary market conditions which could result in significant loss, the Fund has the ability to invest 100% in lower risk assets such as cash.

Recommendation: This Fund may not be suitable for investors who plan to withdraw their money within 5 years. More information on the management of this portfolio can be found at [www.waystone.com](http://www.waystone.com).

## Risk and Reward Profile

This indicator shows how much the Fund has risen and fallen in the past, and therefore how much the Fund's returns have varied. It is a measure of the Fund's volatility.

The higher a Fund's past volatility, the higher its position on the scale and the greater the risk that investors may have experienced losses as well as gains.

The Fund has been classed as 3 because its volatility has been measured as medium to average.

The SRRI measure differs from the risk rating referenced in the Fund's Objective and name. Further details about the Fund's risk rating can be found in the prospectus.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward profile shown is not guaranteed to remain the same and may change over time.

The lowest number on the scale does not mean that the Fund is risk-free.

The value and income from the Fund's assets may go down as well as up. This will cause the value of your investment to fall as well as rise.

- Counterparty Risk: The failure of a firm involved in a transaction with the Fund or providing services to the Fund may expose the Fund to financial loss.
- Property Fund Investment Risk: Property Funds can become illiquid increasing the risk that a position cannot be sold in a timely manner or at a reasonable price.
- Change in Interest Rate Risk: A rise in interest rates generally causes bond prices to fall. The value of fixed interest securities may also be affected by trends in interest rates, inflation and credit ratings.
- Credit Risk: The value of a bond or other fixed interest security may be affected by its credit rating. A lower credit rating increases the risk that the issuer may not pay interest or repaying the loan. Fixed interest securities are also influenced by trends in interest rates and inflation, which can cause their value to fluctuate.
- Liquidity Risk: The Fund may invest in assets such as corporate bonds or shares in smaller companies, that could become difficult to buy or sell in adverse market conditions. This may delay or restrict the Fund's ability to meet redemption requests and could negatively affect the Fund's value.

For more information about the Fund's risks, please see the Risk Factors section of the prospectus which is available at [www.waystone.com](http://www.waystone.com).

## Charges for this Fund

The charges you pay are used to cover the costs of running the Fund, including marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested/before the proceeds of your investment are paid out. In some cases, you may pay less. Please check with your financial adviser or distributor for the actual charges.	
Charges taken from the Fund over the year	
Ongoing Charges	0.69%
Charges taken from the Fund under certain specific conditions	
Performance Fee	None

The ongoing charges figure is based on expenses as at 15 April 2025. This figure may vary from year to year.

The ongoing charges are taken from the capital of the Fund. It excludes performance fees, portfolio transaction costs, except entry/exit charges paid by the Fund when buying or selling units in other collective investment schemes.

A dilution levy (an amount to cover dealing costs incurred by the Fund) may be charged when you buy or sell shares. This separate charge is normally only applied when dealing costs are significant.

For more information about charges (including any charges applied to the offset dealing costs), please refer to the Company's Prospectus, available at [www.waystone.com](http://www.waystone.com).

## Past Performance

Past performance is not a guide to future performance.

The past performance in the chart is net of tax and charges but excludes any entry or exit charges that may apply.

The Fund was launched on 30 January 2017. This share class was launched on 31 January 2017.

Past performance is calculated in GBP.

The Fund was renamed in December 2022, and was previously known as the LF Canlife Managed 0%-35% Fund.

The Fund changed its name from WS Canlife Diversified Risk Managed III Fund to WS Keyridge Diversified Risk Managed III Fund on 18 February 2026.
