# KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

**Waverton European Capital Growth Fund**  
**a sub fund of Waverton Investment Funds plc**  
**The Management Company of the Fund is**  
**FundRock Management Company (Ireland) Limited**

**Class I GBP**  
**ISIN: IE00BF5KTH98**

## Objectives and Investment Policy

The Fund aims to achieve long-term capital growth.

The Fund may invest in shares of European companies, including ordinary shares and preferred shares. A preferred share typically pays dividends at a specified rate and has preference over ordinary shares in dividends and the liquidation of assets. The Fund may also invest in bonds convertible into shares. The Fund may invest no more than 10% of its assets in emerging market countries.

At times, the Fund may hold cash and cash-like instruments.

The Fund may invest up to 10% of its assets in other funds, of which up to 5% of its assets may be invested in funds investing in equity markets globally.

The Fund may use instruments whose value is determined by changes in the value of the underlying assets they represent (derivatives). The Fund may do so in order to manage the Fund more efficiently (e.g., reducing risks or costs or generating additional growth or income).

**For more information about the investment policy, see "Investment Objectives and Policies of the Funds" in the Fund's prospectus available at [www.waverton.co.uk](http://www.waverton.co.uk).**

You may sell your shares on any working day (generally, a day on which banks in Dublin and London are open).

The Fund declares dividends semi-annually (generally, on 30 April and 31 October each year). Unless you request cash payment, your dividends will be paid in the form of additional shares in the Fund.

The Fund is actively managed and uses the MSCI Europe ex UK Index (in GBP) (the "Benchmark") for performance comparison purposes only. The fund does not seek to track its benchmark and so has discretion as to the investments it may make. While a proportion of the Fund may be components of, and have similar weightings to, the Benchmark, the Investment Manager may or may not invest in assets which are not included in the Benchmark or with weightings different to that of the Benchmark. There can be no guarantee that the Fund will match or exceed the performance of the Benchmark.

*Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within 5 years.*

## Risk and Reward Profile

The risk category is based on historical data and may not be a reliable indicator of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time.

The numerical scale is complex. For example, 2 is not twice as risky as 1. The gap between 1 and 2 might not be the same as the gap between 5 and 6. A category 1 fund is not a risk-free investment - the risk of losing your money may be small, but the chance of making gains is also limited.

The Fund is in its risk category as shown above as it typically produces higher rewards than other funds (such as money market funds) and is higher risk as a result of investing in the shares of European companies.

**Risks materially relevant to the Fund which may not be adequately captured by the indicator:**

- **Investment risk:** the Fund may not achieve its investment objective and the value of shares in the Fund may fall.

**The following other risks can be significant to the Fund:**

- The shares in which we invest can be easily sold in normal market conditions. Exceptional circumstances may lead to situations where those can only be sold at a loss for you;

- The shares in which we invest may be concentrated on a limited number of countries or economic sectors. We mitigate this risk by limiting the relative weight of the top investments in the portfolio;

- Investing in emerging economies can present risks inherent to political stability, economic conditions, and/or regulatory and fiscal environments that may adversely affect the price of the Fund.

**More details on the risks you may face when investing in this Fund are described in the "Risk Factors" and "The Sub-Funds" sections of the Prospectus.**
