## Legal & General Pacific Index Trust Unit Class C GBP Income – ISIN: GB00BG0QP935

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

### OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to track the performance of the FTSE World Asia Pacific ex Japan Index (the "Benchmark Index") on a net total return basis before fees and expenses are applied. Therefore, the Fund's performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.
  - The Benchmark Index is comprised of shares in large and middle capitalisation companies of the developed and advanced emerging markets in the Asia Pacific region excluding Japan in accordance with the index provider's methodology.
  - The Fund seeks to replicate the Benchmark Index and its investments will closely match those that make up the Benchmark Index.
  - The Fund will have at least 90% exposure (directly or through depository receipts (a certificate issued by a bank representing shares in a foreign company such as American depository receipts and global depository receipts)) to assets that are included in the Benchmark Index.
  - The Fund may also invest in money market instruments (such as treasury bills), depository receipts, cash, deposits, shares in companies which are reasonably expected to become part of the Benchmark Index in the near future or are an alternative to a constituent of the Benchmark Index and collective investment schemes, including those managed or operated by the Manager or an associate of the Manager.
  - The Fund may use derivatives (contracts which have a value linked to the price of another asset) to: reduce risk or cost; or generate additional capital or income with no, or an acceptably low, level of risk.
- Other information:**
- The Fund is passively managed as it tracks the Benchmark Index.
  - This Fund may be suitable for investors looking to track the shares in large and middle capitalisation companies of the developed and advanced emerging markets in the Asia Pacific region excluding Japan as represented by the Benchmark Index.
  - Your units will be income units. Income from the Fund's investments will be paid out to you every six months (as a dividend). This will reduce your capital growth accordingly.
  - Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within 5 years.
  - This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
  - If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.
  - Units of the Fund can be bought or sold on any dealing day, as defined in the Prospectus. The non-dealing day calendar is available at [www.lgim.com/utnndd](http://www.lgim.com/utnndd).

### RISK AND REWARD PROFILE

Lower Risk ← Higher Risk

Potentially lower rewards ← Potentially higher rewards

Further information on the risks of investing in this Fund is contained in the Prospectus available at [www.lgim.com](http://www.lgim.com). The risk and reward indicator may not take account of the following risks of investing in the Fund:

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 5 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time. Company shares are generally considered to be higher risk investments than bonds or cash.
- Even a Fund in the lowest category is not a risk free investment.
- The value of your investment and any income you take from it may fall as well as rise and is not guaranteed. You might get back less than you invest.
- The Fund may invest in countries where investment markets are considered to be less developed. This means that investments are generally riskier than those in developed markets because they: (i) may not be as well regulated; (ii) may be more difficult to buy and sell; (iii) may have less reliable arrangements for the safekeeping of investments; or (iv) may be more exposed to political and taxation uncertainties. The value of the Fund can go up or down more often and by larger amounts than funds that invest in developed countries, especially in the short-term.
- The Fund invests in securities valued in currencies that are different from the base currency of the Fund. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
