This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

This Fund is a sub-fund of EdenTree Investment Funds – Series 1, an open ended investment company managed by EdenTree Investment Management Limited as the Authorised Corporate Director.

OBJECTIVES AND INVESTMENT POLICY

To prioritise income, with the aim of exceeding the income of the FTSE 250 Mid-Cap Index, together with capital growth over the longer term, five years or more.

The Fund will invest in a mix of equities, fixed-interest securities and cash equivalents. It will maintain a bias towards equities of 60 – 85%. It will consist of at least 90% listed stocks and shares but the Manager may also make other investments such as investing in other funds, money-market instruments, derivatives, cash and near cash. The Fund has no geographical restrictions or limits.

It seeks to limit or avoid areas such as companies which have a material involvement in alcohol and tobacco production, weapon production, gambling, publication of violent or explicit materials, oppressive regimes, non medical animal testing, intensive farming, fossil fuel production and high interest lending.

The Fund favours companies that follow good Business Ethics, Corporate governance, Employment & Labour practices, Environment and Climate Management, Human Rights, and Community Relations, Education, Health & Wellbeing, Social Infrastructure and Sustainable Solutions. We assess a diverse set of indicators of a company's approach to sustainability during our screening process. Further details of our Responsible and Sustainable Investment Policy are available on our website at www.edentreeim.com.

We currently only intend to use derivatives for the efficient management of the Fund. Derivatives are financial instruments that can provide ways of benefiting from movements (up or down) in the price of underlying assets, such as stocks or bonds, without taking ownership of the assets themselves.

You may buy and sell shares on any day on which the London Stock Exchange is open for business.

Any income on the Fund will be paid out to you or you may choose to have it reinvested by purchasing additional shares.

The Fund may not be appropriate if you plan to withdraw your money within 5 years.

More information on the investment policy can be found in the full Prospectus which is available at www.edentreeim.com/literature

RISK AND REWARD PROFILE

Lower risk =
Typically lower rewards

Higher risk =
Typically higher rewards

- The risk category above is not a measure of capital loss or gains, but of how significant the rises and falls in the Share Class price have been historically.
- For example a Share Class whose price has experienced significant rises and falls will be in a higher risk category, whereas a Share Class whose price has experienced less-significant rises and falls will be in a lower risk category.
- As the Share Class risk category has been calculated using historical data, it may not be a reliable indication of the Share Class future risk profile.
- Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk-free investment.
- The Share Class is in risk category 5 as its price has experienced significant rises and falls historically.

What risks are associated with this Fund?

- The value of your investment and the income you get from it may fall as well as rise and you could get back less than you put in. What you get back when you cash in your investment will depend on investment performance.
- The entire market of UK stocks and shares might decline. Most of the assets will be invested in the UK stockmarket so could be affected by any change in this market.
- When investing in assets which are in currencies other than Sterling, exchange rate fluctuations can have a positive or negative impact on the value of your investment.
- Changes in interest rates will affect the value and the interest earned from the bonds held by the Fund. When interest rates rise, the capital value of the Fund is likely to fall and vice versa.

More details on all of the risks mentioned above can be found in the full Prospectus.
