Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Objectives and Investment Policy

- The Fund is classified as a standard variable net asset value money market fund.
- The objective of the Fund is to achieve a return combined with maintenance of capital.
- The Fund invests at least 80% of its assets in Sterling-denominated money market instruments (including qualifying short-term debt securities) as well as deposits.
- Money market instruments are normally dealt on the money market which are both liquid and have a value which can be accurately determined at any time.
- The Fund may use derivatives (complex instruments) to hedge interest rate or exchange rate risk.
- The Fund has an active investment approach based on fund manager judgement supported by macroeconomic and credit risk analysis, with an emphasis on valuation and is not constrained by a benchmark.
- The reference to (UK) in the Fund's name only relates to the Fund's domicile and is unrelated to the Fund's objective and investment policy.
- You can buy, sell and switch shares in the Fund on any Dealing Day (as defined in the Prospectus).
- Any income from your investment will be reinvested.

Risk and Reward Profile

Lower Risk ← Higher Risk
 Typically lower rewards ← Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Share Class is in risk category 1 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

Other Risks

- Investing in the Fund is not the same as making a deposit in a bank account. Variable NAV means the value of the shares in the Fund (the "NAV per share") can go up and down depending on how the underlying assets of the Fund perform. The Fund does not rely on any external support for guaranteeing its liquidity or stabilising the NAV per share. Your investment is not guaranteed and you may not get back the full amount invested. Over time, inflation may erode the value of investments.
- The Fund may invest into a small number of holdings and may have a higher degree of risk than a fund which invests in a broader range of holdings.
- The debt securities that the Fund invests in may not always make interest and other payments and nor is the solvency of the issuers guaranteed. Market conditions, such as a decrease in market liquidity, may mean that the Fund may not be able to buy or sell debt securities at their true value.
- The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of its investments, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.
- A more detailed description of risk factors that apply to this Fund is set out in Section 29 of the Prospectus.
