Emerging Markets Discovery Equity Fund

a sub-fund of T. Rowe Price Funds SICAV
Class Qd (GBP) 9 (ISIN: LU1990730365)
Management company: T. Rowe Price (Luxembourg) Management S.à r.l.

Objectives and Investment Policy

Objective To increase the value of its shares, over the long term, through growth in the value of its investments.
Portfolio securities The fund is actively managed and invests mainly in a widely diversified portfolio of shares of emerging market companies. Although the fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics ("E & S") is achieved through the fund's commitment to maintain at least 10% of the value of its portfolio invested in Sustainable Investments. The investment manager implements the following investment strategies: exclusion screen, sustainable investment exposure and active ownership. Details of how E & S are promoted are further explained in the fund's Sustainability annex to the prospectus. https://www.funds.troweprice.com/uk/en/.
The fund may use derivatives for hedging and efficient portfolio management.
Investment process The investment manager's approach is to:
- Seek companies trading at discounted valuations that do not reflect their underlying fundamentals.
- Emphasize companies that are supported by a secure dividend or strong balance sheet.
- Employ fundamental research to identify change in a business that will act as a catalyst to re-rate the company.
- Employ a bottom up portfolio construction process.
- Assess environmental, social and governance ("ESG") factors with particular focus on those considered most likely to have a material impact on the performance of the holdings or potential holdings in the funds' portfolio. These ESG factors, which are incorporated into the investment process alongside financials, valuation, macro-economics and other factors, are components of the investment decision. Consequently, ESG factors are not the sole driver of an investment decision but are instead one of several important inputs considered during investment analysis.
