The ESG analysis eliminates over 20% of potential stocks that have passed our thematic filter. Furthermore, in order to meet our desired portfolio characteristics and tracking error, wemay optimise the portfolio with reference to a relevant index. It is our intention that the investments contained within the sub-fund will collectively emit lower GHG and use less water than the relevant index.

The investor may subscribe and redeem shares on each bank business day in Luxembourg and the United Kingdom. These shares are capitalisation shares. Income and capital gains are reinvested.
