### Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- This Fund is ranked at 6 because funds of this type have experienced high rises and falls in value in the past. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The indicator does not take into account the following risks of investing in this Fund:
- Smaller company shares, including AIM companies, can be riskier as they may be more difficult to buy and sell and their share prices may fluctuate more than that of a larger company.
- The level of targeted income is not guaranteed and may not be achieved.
- For further risk information please see the prospectus.
