

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Rathbone Greenbank Dynamic Growth Portfolio (S Inc)

A sub-fund of Rathbone Greenbank Multi-Asset Portfolios

Authorised Corporate Director: Rathbones Asset Management Limited
S Inc ISIN GBOOBMQC6H25

Objectives and investment policy

The objective of the fund is to deliver a greater total return than the Consumer Price Index (CPI) measure of inflation + 4%, after fees, over any rolling five-year period. The fund seeks a level of volatility that is five-sixths of the volatility of the FTSE Developed stock market Index (or up to 15% above or below this level). There is no guarantee that this investment objective will be achieved over five years, or any other time period.

We use the CPI + 4% as a target for our fund's return because we aim to grow your investment considerably above inflation. We refer to the amount of volatility risk our fund seeks to take because we want our investors to understand the risk they are taking in terms of the global stock market.

The fund aims to promote positive environmental and/or social outcomes alongside its financial return objectives. The fund invests in and actively engages with a portfolio of assets that either contribute to, or have the potential to contribute to, at least one of these goals for a more sustainable world: Decent work, habitats and ecosystems, inclusive economies, resilient institutions, energy and climate, health and wellbeing, innovation and infrastructure, resource efficiency.

To meet the dynamic growth objective, the fund manager will use a dynamic asset allocation to invest globally in government and corporate bonds with no restriction on their credit quality, equities, collective investment schemes and structured products. Up to 10% of the fund can be invested directly in contingent convertible bonds. In normal market conditions, we expect the fund to hold up to 20% in structured products. Structured products may constitute a greater proportion of the portfolio in times of market irregularities or stress. Derivatives may be used by the fund for the purpose of efficient portfolio management and hedging.

The fund manager defines restrictions on how much of the fund can be invested in different types of assets based on the LED Framework. The restrictions are set at the discretion of the fund manager and will change over time. The restrictions are reviewed annually and in response to market events. The fund can invest between 0% and 30% in Liquidity assets, these assets can be sold easily and dampen volatility, but they also lower potential returns. The fund can invest between 50% and 90% in Equity-type assets, these assets include shares and anything that behaves like shares, which are the best tools to beat inflation and grow capital, but are also more volatile. The fund can invest between 0% and 30% in Diversifiers, these assets behave very differently to stocks and bonds, which reduces volatility and adds a layer of protection to investments. The fund's ethical and sustainability criteria are applied by Rathbone Greenbank Investments, an ethical research division of our company, which cannot be influenced by the fund managers. Full details of the responsible investment policy can be found on our website.

Our fund is designed for investors with a basic knowledge of multi-asset investments who seek growth. You should intend to invest for longer than five years, understand the risks of our fund and have the ability to bear a capital loss. For definitions please visit the glossary on our website. You can buy and sell units on each business day of the fund between 9am and 5pm.

Any income arising in relation to this unit class will be distributed to investors on a regular basis.

We actively manage our fund, which means we can choose what we invest in as long as it's in line with the investment objective and policy. Because of this, our fund's performance can diverge significantly from its benchmarks over shorter periods of time and therefore isn't appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

These numbers rate how the Fund may perform and the risk of losing some or all of your investment. In general the potential for higher returns also implies a higher level of risk.

This indicator is a measure of the fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the fund's future risk. The risk category shown is not a target or a guarantee and may change over time.

The risk category is calculated using historical data and may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time.

However, the lowest category (1) does not mean a risk free investment. During unusual market conditions, the risks normally experienced by the fund may increase significantly, and in addition, the fund may be subject to the following risks:

Credit risk: Bonds that we own can become more or less creditworthy and will fluctuate in value resulting in gains or losses. Bonds that we own may fail to meet their legal obligations, such as missing an interest payment. This is known as a 'default' and will result in a loss.

Interest Rate Risk: Most bonds pay us a fixed amount over an agreed period of time. If interest rates rise these bonds become less valuable and we may be locked into an unfavourable investment. If interest rates fall these bonds become more valuable.

Counterparty risk: A company that we deal with may renege on its obligations, costing you money.

Liquidity risk: Some assets become hard to sell at their expected price, especially in times of market stress. This could mean we have to sell assets below their expected price resulting in a loss. In extreme circumstances, we may suspend the fund to protect your investment, resulting in you being unable to access your money.

Sustainability Risk: Returns could deviate from the market or funds that don't promote environmental or social characteristics, or that don't avoid investments/sectors e.g., oil, tobacco.

Management risk: People make the investment decisions for our fund. If they make unfavourable decisions, you could lose money.

Operational risk: We rely on complex systems to ensure that trades are completed, our fund's assets are accounted for and that you can buy or sell our fund. If our systems fail, you could be inconvenienced or lose money.

Derivatives risk: Sometimes we invest in financial contracts or assets with similar exposures, such as structured products and currency hedging. These assets can be used to offset risks or meet other objectives, however market moves can cause these assets returns not to align with those objectives and can result in losses or gains.

Currency risk: We own assets valued in a currency other than sterling. Changes in the price of foreign currencies can result in gains or losses, even if underlying asset prices stay the same.

The risk indicator for this fund reflects the following:

- As an asset class, shares have greater risk than either bonds or money market instruments.
- As this share class is less than five years old, the indicator is not based solely on actual performance.

Charges

One-off charges taken before or after you invest	
Entry Charge	0.00%
Exit Charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing Charges	0.65%
Charges taken from the Sub-Fund under certain specific conditions.	
Performance Fee	None

The Fund does not charge entry or exit charges.

For more information about charges, please see the "Charges" section of the fund's Prospectus, available by calling the Information Line or emailing RAM@Rathbones.com.

The charges you pay are used to pay for the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment. The fund manager receives an annual fee, which is included in the ongoing charges shown. Ongoing charges are the same for all investors in the same class. The charges shown are based on actual fees and expenses. The ongoing charge is made up of the Annual Management Charge and other fees. In this case there is an expense cap on other fees of 0.15% (excluding any ongoing charges for the investment into other underlying funds). The ongoing charges figure excludes portfolio transaction costs.

The value of investments in the fund and the income from them may go down as well as up and you may not get back your original investment when you sell your units.

Past performance

The performance of this Class is calculated in GBP

This share class launched on 29 March 2021.

The Fund launched on 29 March 2021.

Past performance should not be seen as an indication of future performance. Basis of performance: Price performance based upon mid to mid price. Past performance is reported on a full calendar year basis.

Practical information

Depository: NatWest Trustee and Depositary Services

Tax: Investors should note that the tax legislation that applies to the fund may have an impact on the personal tax position of their investment in the fund. Contact your adviser to discuss tax treatment and the suitability of this investment.
