Sub-Fund assets may be completely invested in bonds as described in the investment objective, however, convertible bonds are limited to max. 70% of Sub-Fund assets. Max. 70% of Sub-Fund assets may be invested in High-Yield bonds bearing a typically higher risk and higher potential of gains, however, within this limit Sub-Fund assets may be invested in bonds that are only rated CC (Standard & Poor's) or lower (including max. 10% of Sub-Fund assets in defaulted securities). fund" according to German Investment Tax Act (GITA).

This Sub-Fund is not managed by us in reference to a Benchmark. We follow an active management approach.

Exposure to the base currency of the Fund (USD) will be hedged to a large extent against the reference currency of the shareclass (GBP) which reduces the potential risks and limits potential gains from exchange rate movements.

You may redeem shares of the Fund usually on each business day.

Allianz Global Investors GmbH reserves the right to restrict the redemption of shares under certain circumstances (e.g., increased redemption requests) or to suspend the redemption of shares in exceptional circumstances.

We usually distribute the income of the Fund on a monthly basis.

Recommended Holding Period: 4 Years

Derivatives may be used to offset exposure to price fluctuations (hedging), to take advantage of price differences between two or more markets (arbitrage) or to multiply gains although it may also multiply losses (leverage).

Risk and Reward Profile

← Typically lower rewards
← Typically lower risk

Typically higher rewards →
Typically higher risk →

This risk and reward indicator is based on past performance data. It may not be a reliable indication of the future risk profile of the Fund.

The categorisation of the Fund is not guaranteed and may change in the future.

Even the lowest category 1 does not mean a risk-free investment.

Why is the Fund in this category?

Funds of category 5 have shown in the past a medium to high volatility. The volatility describes how much the value of the Fund went up and down in the past. The units of a Fund of category 5 might be subject to medium to high price fluctuations based on

historical volatilities.

The following material risks are not fully captured by the risk and reward indicator:

We may invest directly or indirectly a significant portion of the Fund into bonds or money markets instruments. Issuers of these may fall into insolvency or suffer economic problems, in which case the interest on and/or capital of these assets may not be completely paid and/or the price of the assets may drop.

The Fund contains a material proportion of assets which either have a low level of liquidity or which, under certain circumstances, may have a low level of liquidity. As a result, it is possible that these assets cannot be sold or can only be sold at a significant discount. Consequently, a high level of redemptions may lead to an increased risk of redemptions being suspended. For this reason we may not be able to pay your money back, or not immediately, and/or the Fund price may fall.
