

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Legal & General Active Global High Yield Bond Fund Unit Class I GBP Accumulation – ISIN: GB00B0CNHJ41

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to provide income and growth above those of the ICE BofA BB-B Global High Yield Non-Financial 2% Constrained Index (Hedged to GBP), the ("Benchmark Index"). The Fund aims to outperform the Benchmark Index over rolling three year periods after the deduction of all fees and expenses.
- The Fund is actively managed and will invest in bonds (a type of loan that pays interest). These bonds will have a pre-set rate of income (either set at a fixed level or varying in a pre-determined way).
- The Fund will invest at least 70% in sub-investment grade bonds in sterling or bonds issued in currencies and hedged back to sterling. Sub-investment grade bonds are bonds that have achieved a lower credit rating from a nationally recognised statistical rating organisation or non-rated bonds that are deemed equivalent by the Manager. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time. The Fund is not constrained by the Benchmark Index and, as such, there are no restrictions on the extent to which the Fund's portfolio may deviate from the ones of the Benchmark Index. The bonds that the Fund invests in will be issued by companies or governments anywhere in the world.
- Non-Sterling currency exposure is hedged to Sterling. The Investment Manager may at times manage interest rate risk through the selection of corporate bonds. The Investment Manager may also use government bonds and derivatives to further manage interest rate risk.
- The Fund may also invest in money market instruments (such as treasury

bills), cash, deposits and collective investment schemes, including those managed or operated by the Manager or an associate of the Manager.

- The Fund may use derivatives (contracts which have a value linked to the price of another asset) to: reduce risk or cost; or generate additional capital or income with no, or an acceptably low, level of risk.

Other information:

- The Fund is actively managed as the Manager uses their expertise to select investments to achieve the Fund's objectives.
- This Fund is designed for investors looking for a high income or growth from an investment in bonds, normally sub-investment grade bonds.
- Your units will be accumulation units. Income from the Fund's investments (interest) will be reinvested back into the value of your units.
- Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within 5 years.
- This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.
- Units of the Fund can be bought or sold on any dealing day, as defined in the Prospectus. The non-dealing day calendar is available at www.lgim.com/utnidd.
- The Fund's base currency is denominated in sterling (GBP).

RISK AND REWARD PROFILE

Lower Risk Higher Risk The risk and reward indicator may not take account of the following risks of investing in the Fund:

Potentially lower rewards			Potentially higher rewards			
1	2	3	4	5	6	7

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
 - The Fund is in category 4 because it invests in company or government bonds which are sensitive to changes in interest rates, inflation and credit. This can be driven by political and economic changes and other significant events and may cause the value to go up and down. Bonds that are closer to their maturity date tend to be more stable in value. Bonds are generally considered to be higher risk investments than cash, but lower risk than company shares.
 - Even a Fund in the lowest category is not a risk free investment.
 - The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.
- Further information on the risks of investing in this Fund is contained in the Prospectus available at www.lgim.com.

- The Fund invests in securities valued in currencies that are different from the base currency of the Fund. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- The Fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the Fund may fall.
- The Fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the Fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depositary.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.

CHARGES

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
---------------------	-------

Exit charge	0.00%
--------------------	-------

This is the maximum that might be taken out of your money before it is invested.

The price for buying and selling units is subject to a Dilution Adjustment See opposite.

Charges taken from the fund over a year

Ongoing charge	0.41%
-----------------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
------------------------	------

- There are no entry or exit charges.
- The ongoing charges figure is based on the latest available expenses at 28 February 2026. This figure may vary from year to year.
- This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
- The ongoing charges are taken from the income of the Fund.

Other costs:

- **Dilution adjustment:** on any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'.

For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at legalandgeneral.com/chargesandfees.

PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested.
- The performance has been calculated in GBP.
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 2000.
- This unit class launched in 2005.
- On 2023-03-31, the Fund's investment objective was updated to outperform the Benchmark Index over rolling three year periods after the deduction of all fees and expenses.
