Goldman Sachs Global Environmental Impact Equity Portfolio (the "Portfolio")

Class R Shares (Acc.) (GBP)

(ISIN: LU2106861185)

a sub-fund of Goldman Sachs Funds (the "Fund")

The Portfolio is managed by Goldman Sachs Asset Management B.V.(the "Manager"), part of Goldman Sachs group of companies.

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Objectives and Investment Policy

- The Portfolio seeks to generate positive and measurable environmental impact alongside capital growth over the longer term.
- The Portfolio will mostly hold shares or similar instruments relating to companies anywhere in the world, which in the view of the Investment Adviser are aligned to the key themes associated with solving environmental problems including, but not limited to, clean energy, resource efficiency, sustainable consumption and production, circular economy, water sustainability, and climate adaptation and which the Investment Adviser considers to be sustainable investments.
- The Portfolio will be concentrated and may have significant exposure to specific sectors, including but not limited technology and consumer sectors.
- The Portfolio may consider non-financial criteria across environmental (i.e., carbon footprint), social (i.e., human rights), and governance (i.e., significant governance controversies) factors in addition to financial performance. The selection process may be limited by the quality and availability of the data disclosed by issuers or provided by third parties. The Portfolio seeks to create positive environmental impact by investing in companies that the Investment Adviser considers to be sustainable investments and which provide solutions that drive environmental sustainability, by virtue of their alignment to key themes associated with solving environmental problems. This approach is implemented by investing a significant portion of the Portfolio's net assets (i.e., at least 90% of the assets of the Portfolio) into investments which are aligned to key themes associated environmental problems like clean energy, resource efficiency, among others.
- The Portfolio may use derivatives, to help manage risks and for cash management purposes. A derivative instrument is a contract between two or more parties whose value depends on the rise and fall of other underlying assets.
- The Portfolio may invest in mainland China equity securities directly through the Stock Connect scheme or the Renminbi qualified foreign institutional investor program, or indirectly through access products.
- Shares in the Portfolio may be redeemed daily (on each business day) on demand.
- The Portfolio is actively managed and references the MSCI ACWI (Total Return Net) (GBP) (the "Benchmark") for the purposes of setting discretionary internal risk thresholds which may reference deviations from the Benchmark.
- The Investment Adviser has full discretion over the composition of the assets in the Portfolio. While the Portfolio will generally hold assets that are components of the Benchmark, it can invest in such components in different proportions, and it can hold assets which are not components of the Benchmark. Therefore returns may deviate materially from the performance of the specified reference Benchmark.
- Income is rolled up into the value of your investment.
- The Portfolio currency is USD. The share class currency is GBP.
- **For full investment objective and policy details see the Prospectus.**

Risk and Reward Profile

Lower risk — **Higher risk**

Potentially lower reward — Potentially higher reward

1	2	3	4	**5**	6	7

This risk profile is based on historical data and may not be a reliable indication of the future risk profile of the Portfolio. The risk category shown is not guaranteed and may change over time. The lowest category does not mean risk free. It is possible that a portfolio stated to have a lower risk profile may in fact fall in value more than a portfolio with a higher risk profile.

The Portfolio is in category 5 as it mostly invests in shares and similar instruments which typically experience higher levels of price fluctuations than fixed income securities.

The capital is not guaranteed.

Other Material Risks:

- **Market risk** - the value of assets in the Portfolio is typically dictated by a number of factors, including the confidence levels of the market in which they are traded.
- **Operational risk** - material losses to the Portfolio may arise as a result of human error, system and/or process failures, inadequate procedures or controls.
- **Liquidity risk** - the Portfolio may not always find another party willing to purchase an asset that the Portfolio wants to sell which could impact the Portfolio's ability to meet redemption requests on demand.
- **Exchange rate risk** - changes in exchange rates may reduce or increase the returns an investor might expect to receive independent of the performance of such assets. Hedging of this risk may not be fully effective and may increase other risks (e.g. derivative risk).
- **Custodian risk** - insolvency, breaches of duty of care or misconduct of a custodian or sub-custodian responsible for the safekeeping of the Portfolio's assets can result in loss to the Portfolio.
- **Derivatives risk** - derivative instruments are highly sensitive to changes in the value of the underlying asset that they are based on. Certain derivatives may result in losses greater than the amount originally invested.
- **Counterparty risk** - a party that the Portfolio transacts with may fail to meet its obligations which could cause losses.
- **Emerging markets risk** - emerging markets are likely to bear higher risk due to lower liquidity and possible lack of adequate financial, legal, social, political and economic structures, protection and stability as well as uncertain tax positions.
- **Stock Connect** - Stock Connect is a new trading programme and the relevant regulations are untested and subject to change. Investments through the Shanghai-Hong Kong Stock Connect are subject to additional risks, including amongst others, quota limitations, restrictions on selling imposed by frontend monitoring, ownership of securities held on Stock Connect applicable to certain rules, participation in corporate actions and shareholders' meetings, non-protection by any investor compensation scheme, differences in trading day, operational risk, recalling of eligible stocks and trading restrictions, trading costs (including tax), local market rules, foreign shareholding restrictions and disclosure obligations, clearing, settlement and custody risk, currency risk and default risk.
- **Sustainability risk** - an environmental, social or governance event or condition that could cause the value of the portfolio to go down. Examples of sustainability risks include physical environmental risks, climate change transition risks, supply chain disruptions, improper labour practices, lack of board diversity and corruption.
- **Concentration risk** - this is a concentrated asset strategy that is likely to exhibit a significantly greater fluctuations in asset values than a broad investment in a wide range of shares of companies.
- **Risks associated with investments in China:** The Portfolio's operations and financial results could be adversely affected by adjustments in the PRC's state plans, political, economic and social conditions, changes in the policies of the PRC government and laws and regulations, in particular where investments are made through any of the investment regime introduced by the PRC government.
- **For more detailed information on the risks associated with an investment in the Portfolio, please refer to the section in the Prospectus entitled "Risk Considerations" and discuss with your professional advisers.**

Charges

The charges you pay are used to pay the cost of running the Portfolio, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	5.50%
Exit charge	none
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken over a year	
Ongoing charges	0.96%
Charges taken under certain specific conditions	
Performance fee	none

Where applicable, the entry and exit charges shown are maximum figures and in some cases you might pay less - please contact your professional advisers for more information.

The ongoing charges figure is based on expenses for the year ending December 2025. This figure may vary from year to year. It excludes transaction costs (including taxes and brokerage commissions) and any borrowing costs, which are payable from the assets of the Portfolio and may impact returns on your investment, and performance fees (where applicable).

For more information about charges, please refer to the Fund's Prospectus, section entitled "Fees and Expenses" and the relevant supplement for the Portfolio.

Past Performance

	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025
						15.2	-18.7	0.4	5.3	8.4
						19.6	-8.1	15.3	19.6	13.9

The Portfolio was launched in February 2020. The share class was launched in February 2020.

Where applicable, past performance has been calculated in GBP and is expressed as a percentage change of the Portfolio's Net Asset Value at each year end (net of all fees). Where past performance is not shown there is insufficient data to provide a useful indication of past performance.

Please be aware that past performance is not indicative of future performance which may vary.

Practical Information

Depositary: State Street Bank International GmbH Luxembourg Branch

Further Information: The Prospectus, annual and semi-annual reports and latest share price are available free of charge from the Fund's registered office, the Manager, administrator or the Portfolio's distributors. The Prospectus is available in English, French, German, Italian and Spanish.

This document is for a single Portfolio of the Fund and the Prospectus, annual and semi-annual reports is for the entire Fund.

The Fund is an investment company with segregated liability between portfolios under Luxembourg law. Therefore, the assets of the Portfolio you have invested in should not be used to pay the liabilities of other portfolios. However, this has not been tested in other jurisdictions.

Switching between Portfolios: Shares are available in other share classes and in other currencies as may be specified in the Prospectus. Shareholders may apply for their shares in any share class of any portfolio to be converted into any share class of another portfolio, subject to the conditions set out in the Prospectus (charges may apply).

Liability Statement: The Fund may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for the Fund.

Tax Legislation: This Portfolio's investments may be subject to tax in the countries in which it invests. In addition, this Portfolio is subject to the tax law and regulation of Luxembourg which may have an impact on your personal tax position and impact your investment. For further details, please speak to your professional advisers.

Remuneration Policy: Details of the up-to-date remuneration policy of the Manager, including, but not limited to, a description of how the remuneration and benefits are determined and governed by the Manager, are available at https://www.gsam.com/sm/remunerationpolicy and a paper copy is made available free of charge upon request.
