FP Russell Investments Real Assets Fund C Acc; ISIN: GB00B4KQS127

FP Russell Investments Real Assets Fund a sub-fund of FP Russell Investments ICVC

The Fund is managed by FundRock Partners Limited.

Objectives and Investment Policy

Objective:

- The Fund aims to achieve capital appreciation (profit on investments held) that exceeds the UK Retail Price Index over the long term (5 rolling year periods) (on a net of fees basis).
- Capital is at risk as the value of investments can go down as well as up and there is no guarantee that the Fund will achieve its objective over rolling 5 year periods or any time period. Investors may get back less than the amount originally invested.

Policy:

- The Fund will seek to achieve its objective by investing at least 80% or more of its assets in:
- Collective investment schemes and other investments (for example transferable securities such as shares, debentures and securitised debt) which provide exposure (indirect) to asset classes such as global listed property, global listed infrastructure, inflation linked securities (types of investment that are designed to protect investors from inflation over the long term), as well as, commodities (in the case of commodities, exposure will be indirect, for example via exchange traded commodity index futures);
- Collective investment schemes which provide exposure to global fixed income securities (investments that pay a fixed level of interest and that could be issued by a company, a government or other entity); and/or
- Collective investment schemes which provide exposure to global equity securities (shares and other transferable securities equivalent to shares).
- This will be achieved by investing at least 70% in a combination of Russell Investments collective investment schemes as well as external collective investment schemes.
- The Fund may use currency hedging techniques to reduce exposure to currencies other than Sterling.
- The Fund may also invest in other transferable securities, money market instruments (a type of security dealt with on the money market where cash can be deposited for short periods such as treasury bills, certificates of deposit and commercial papers and excluding instruments of payment), cash and near cash and deposits.
- Use may also be made of derivatives (investments whose value is linked to another investment, or the performance of a stock exchange or to some other variable factor, such as interest rates) for efficient portfolio management and for investment purposes. Efficient portfolio management is where the fund is managed in a way to reduce risk or cost and/or generate extra income or growth.
- The Fund is actively managed.

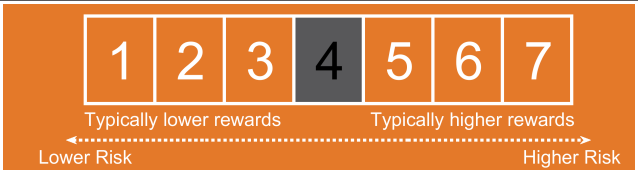
Benchmark:

Target Benchmark – against which Fund performance has been set: UK Retail Prices Index (because the Fund will invest in investments that are inflation-linked). The investment manager has discretion over the portfolio composition. Portfolio composition is not constrained by a benchmark.

Other Information:

- You can buy and sell shares on most business days where the London Stock Exchange is open for a full range of services.
- We carry out investors' requests, to buy, sell or switch, at midday on each business day (which excludes UK public holidays). If we receive a request after midday, we deal with it on the next business day.
- For accumulation shares, income will be rolled up into the value of shares.
- Derivatives: used in order to reduce the risks otherwise associated with making investments in currencies other than the Fund's accounting currency (Sterling).
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile



- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- The Class is ranked in this risk and reward category because it invests in the shares of companies, whose values tend to vary more widely.
- The price of Shares and the return from them may fall as well as rise and an investor may not recover the full amount invested.
- There can be no assurance that any Fund will achieve its investment objective or that a Shareholder will recover the full amount invested in a Fund.
- Derivatives can carry a high degree of risk - a relatively small movement in the price of the underlying security may result in a disproportionately large movement, unfavourable or favourable, in the price of the derivative.

Please do not invest if you do not have the level of knowledge required in order to assess and evaluate the risks associated with the use of derivatives by the Fund or the impact of derivatives on your investment.

- Exchange Rate Risk - Fluctuations in exchange rates may cause the value of your investment to rise or fall.
- The Fund invests in a relatively limited number of companies, sectors and/or countries and currencies. This focused strategy can produce high gains but can also lead to significant loss.
- Counterparty Risk - The Fund could lose money if an entity with which it interacts becomes unwilling or unable to meet its obligations to the Fund.
- The Fund will be exposed to a credit risk on parties with whom it trades and will also bear the risk of settlement default.
- Liquidity Risk - Certain securities could become hard to value, sell at a desired time and price, or cease to trade altogether.
- The investments of the Fund are subject to normal market fluctuations and other risk inherent in investing in securities. Appreciation in the value of investments is not guaranteed.
