CT MANAGED GROWTH FUND (THE "FUND")

Class C Accumulation Shares (GBP) GB00BYZ62Y83, a sub-fund of Columbia Threadneedle (UK) ICVC IX (the "Company"), regulated by the FCA.

This sub-fund is managed by Columbia Threadneedle Fund Management Limited, (part of the Columbia Threadneedle Investments group of companies).

Objectives and Investment Policy

- The objective is to provide capital growth over the medium to long term (3 to 5 years).
- The Fund seeks to achieve this by investing at least 80% in other collective investment schemes and exchange traded funds to gain exposure to a mixture of shares and fixed interest securities. The portfolio will usually consist of shares in other Columbia Threadneedle Investments collective investment schemes. Similar schemes of other managers may be included from time to time as appropriate.
- The share exposure obtained by the Fund may include shares of companies anywhere in the world and in any industry sector. The fixed interested exposure may include government and corporate bonds from issuers anywhere in the world (which may include emerging markets or high yield bonds). There may be an element of currency exposure.
- While the Manager will invest mainly in collective investment schemes and exchange traded funds, it may also invest in other investments such as other transferable securities, deposits, cash, near cash, money market instruments and warrants.
- The Fund may use derivatives only for the purposes of efficient portfolio management.
- The Fund is actively managed. The Manager believes that an appropriate comparator benchmark for reviewing fund performance is the IA Flexible Investment Sector Median, given the investment policy of the Fund and the approach taken by the manager. The Fund is not constrained by this benchmark and has significant freedom to invest in a portfolio that is materially different to the benchmark's own composition.
- Income from investments in the Fund will be added to the value of your shares.
- You may buy or sell shares daily on demand (but not weekends or UK bank holidays or other days when the Fund is not open for dealing). Orders to buy or sell must be received by 12 noon (UK time) to receive the price calculated at that day's valuation point. We are not required to hold monies arising from the purchase and sales of shares in our funds in a client money bank account and hold these monies in our own bank account, utilising the FCA's permitted one-day window while carrying out a delivery versus payment transaction for the purpose of settling transactions in relation to units in the Fund. In the exceptional event that a transaction is not processed within this one-day window, any cash will be held in a client bank account. No interest will be paid to investors on cash held on a client bank account.
- Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Lower Risk, Typically lower rewards — Higher Risk, Typically higher rewards

- The Fund is rated 4 because historically it has shown a medium level of volatility (how much the value of the Fund goes up and down).
- The lowest category does not mean a risk-free investment.
- The indicator does not adequately reflect the following risks of investing in particular assets, which may impact on future investment return:
- Derivative Risk: derivative values rise and fall at a greater rate than equities and debt instruments. Losses can be greater than the initial investment.
- Liquidity Risk: the ability to buy and sell assets at a favourable price may be affected by a low level of counterparties willing to enter into a transaction with the Fund.
- Smaller Companies Risk: smaller companies carry a higher degree of risk and their value can be more sensitive to market movement.
- Currency Risk: your investment may be adversely affected by changes in currency exchange rates.
- Fixed Interest Securities Risk: changes in interest rates can affect the values of fixed interest holdings.
- Emerging Markets Risk: this Fund invests in emerging markets which are less developed and have additional legal and political risks.
- Credit Risk: receiving income or capital due from debt instruments is dependant on the provider's ability to pay.
- The risks currently identified as applying to the Fund are set out in the "Risk Factors" section of the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge:	0.00%
Exit Charge:	0.00%
These are the maximum charges that we might take out of your money before it is invested. In some cases, you might pay less and you should speak to your financial adviser about this.	
Charges taken from the fund over a year	
Ongoing Charges:	1.04%
Charges taken from the fund under certain specific conditions
