Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Federated Hermes Global High Yield Credit Fund (the "Fund")

a sub-fund of Federated Hermes Investment Funds plc (the "Company")

Class F £ Acc. Hedged Shares (ISIN: IE00BBJPFN04)

Hermes Fund Managers Ireland Limited (the "Manager")

Objectives and investment policy

The Fund aims to generate a high level of income over a rolling period of any five years.

However, there is no guarantee that this will be achieved and your capital is at risk.

The Fund is an actively managed, diversified portfolio that will invest at least 80% globally in High Yield Debt Instruments issued by companies or by governments (such as Bonds and Credit Default Swaps). Some of these may be unrated.

It may also invest in other financial instruments or products, for example other funds, equities, indices and Derivatives.

The Fund is an Article 8 Fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector under the Sustainable Finance Disclosure Regulation ("SFDR"). The Investment Manager will consider how well companies manage ESG factors. The companies will either have strong or improving ESG characteristics. The percentage of ESG-analysed issuers in the Fund will always be between 90%-100%. The Fund excludes investments in certain activities which are deemed to not align with the Investment Policy. For the full list of exclusions see the Investment Policy section of the Fund supplement.

The Fund uses Derivatives to assist in achieving its investment objective; Derivatives may increase or reduce exposure to underlying assets and create leverage.

The Fund may use leverage up to 40% of the value of the Fund. This means that the Fund's total exposure arising from its investments (including Derivatives) may amount to 140% of the value of the Fund.

The Fund's base currency is USD but its investments may be priced in other currencies. Derivatives may be used to convert the value of those investments into USD.

The benchmark, for performance comparison purposes only, is the ICE BofA Global High Yield Constrained Index.

This Share Class will be hedged. Hedging seeks to minimise exposure to exchange rate differences between the Share Class currency (GBP) and the base currency of the Fund (USD).

You may buy or sell Shares in the Fund each Business Day (except bank holidays in the UK and Ireland).

This Share Class is accumulating. Your portion of any income received will be reinvested. This will be reflected in the value of your Shares.

Useful definitions

- **Credit:** A fixed income debt investment (including 'Bonds') in which the Fund lends money to a government or company, who is then obliged to pay a specified amount back to the purchaser of the Bond on a given future date. The amount to be repaid usually includes the original amount (the principal) plus interest (coupons).
- **Credit Default Swap (CDS):** A type of Derivative that aims to protect against the loss in value of a Bond. It can also be bought and sold for investment purposes.
- **Derivatives:** Investments whose value is linked to one or more underlying assets.
- **Instruments:** A broad term to describe different ways in which the Fund can invest, such as through a stock, Bond or Derivative.
- **High Yield/Below Investment Grade:** A Fixed Income debt investment (also known as a 'Bond' or 'Credit') which may have a high level of return (i.e. yield) and a corresponding higher level of risk than other Fixed Income debt instruments.
- **Leverage:** Use of various instruments or borrowed money that increases the exposure of the Fund to its investments – this has the potential to increase both the gain and loss of an investment.
- **Unrated:** Unrated debt that has not been assessed by a recognised rating agency.
- **ESG:** An acronym for 'Environmental, Social and Governance' characteristics. A company will be assessed on its management of these considerations.

Risk and reward profile

Lower risk — *Higher risk*

Narrative explanation of the indicator and its main limitations:

The value of investments and income from them may go down as well as up and you may not get back the original amount invested.

- Historical data may not be a reliable indication for the future.
- Risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.
- This reflects volatility of the Fund based on historic movements of underlying investments.

Particular risks not adequately captured by this indicator include:

- **Bonds Risk:** The Fund invests in bonds and there is a risk that the bond may default and not meet its financial commitments. Also, the value of the bond may rise or fall as interest rates change.
- **Emerging Markets Risk:** The Fund invests in Emerging Market countries, these markets are less established, and often subject to greater share price fluctuations and higher risks than more developed market countries.
- **Counterparty Risk:** The Fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the Fund.
- **Loan Risk:** The Fund may invest in loans. In the event of non-payments of loans to the Fund, the value of the Fund will be impacted.
- **Leverage Risk:** The use of leverage may amplify either gains or losses. Which could have an effect on the value of the Fund.
- **Financial Derivative Instruments ("FDIs") Risk:** The Fund invests in Derivatives. These are a type of financial security, the value of which depends on the performance of an underlying security. Small changes in the price of the underlying security may cause larger changes in the value of the Derivative, increasing potential gain or loss. Derivatives may increase or reduce the overall volatility of the Fund.
- **Liquidity Risk:** In difficult market conditions, certain Fund investments may be harder to sell at the current market price.
- **Sustainability Risk:** The Fund considers sustainability as part of the investment selection process so may perform differently to funds that do not consider sustainability criteria.
- **Operational Risk:** Operational issues, for example arising from errors in transactions, valuation, accounting, and financial reporting, may affect the value of the Fund.
