

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Santander UK Growth Unit Trust (the "Scheme")

R Accumulation Unit Class (ISIN: GB0000353259). This Scheme is managed by Santander Asset Management UK Limited. This Scheme is authorised in the UK and regulated by the Financial Conduct Authority.

Objectives and investment policy

The Scheme's objective is to provide capital growth (to grow the value of your investment) and potentially some income over a 5+ year time horizon.

The Scheme will aim to outperform (after the deduction of fees) its Target Benchmark (FTSE All Share Index TR) measured over a rolling 3 year time period. It is expected that the average outperformance for the Scheme will typically not be greater than 1.35% per annum (after the deduction of fees) in excess of the Target Benchmark over a rolling 3 year period, although no level of outperformance is guaranteed.

The Scheme is actively managed and invests at least 80% in a wide range of shares in companies listed (at purchase) in the UK, which may also be domiciled, incorporated or conduct a significant part of their business in the UK, including Real Estate Investment Trusts (REITs) and other investment trusts. The Scheme may invest up to 20% in shares in companies listed (at purchase) in developed markets outside the UK. It may invest in developed markets globally up to: 5% in bonds (excluding sub-investment grade bonds) issued by companies, governments, government bodies and supranationals; and 10% in cash, cash like and other money market instruments. The Scheme typically invests directly but can also invest indirectly: up to 10% via other funds; and in property via REITs.

The Scheme may use derivatives for efficient portfolio management to reduce risk, reduce cost, or to generate additional capital or income if consistent with its risk profile, including for hedging.

A Sub-Investment Manager (Sub-IM) has been appointed to actively manage (discretion is used to select assets) the entire Scheme. It is subject to an outperformance target which is consistent with that of the Scheme. When selecting companies to invest in, the Sub-IM will focus on quality (e.g. consistent profits and strong cash flow, and actual/potential asset growth), momentum (share price performing well and expected to continue) and value (share price is lower than expected). Typically it will select shares with good quality and momentum and which offer capital growth. This results in a bias to medium sized companies (e.g. those in FTSE 250 Index). The Sub-IM will favour long term investments but can hold shorter term investments where it believes these will provide capital growth.

The Scheme will typically be managed with a Tracking Error (deviation from the Target Benchmark) of up to 6%, which may be higher e.g. in volatile market conditions, if consistent with the investment strategy. This means whilst the Sub-IM doesn't have to invest in the same assets, or amounts, and may hold significantly fewer assets than, the Target Benchmark, some investments will reflect its constituents. The Target Benchmark has been selected as it is representative of the companies the Scheme can invest in and is broadly in line with the investment policy.

You can buy and sell units in the Scheme on any business day. Income arising from your investment will not be paid to you but will be rolled up into the value of your investment.

Recommendation: This Scheme may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

The lowest risk and reward indicator does not mean risk free. The Scheme is rated 6 due to the nature of the assets it invests in. The material risks listed below are not adequately captured in the indicator above.

Counterparty Risk: A default by a counterparty (including derivative counterparties and any providing a service, e.g. safekeeping of assets) may result in a reduction in the value of the Scheme.

Country Risk: Investing all or mostly in a single country or region (UK) can be riskier than a fund that invests more broadly.

Currency Risk: The value of investments that are not in pound sterling may be affected by changes in exchange rates.

Investment Style and Management Risk: The investment style chosen and the assets selected to deploy this style may deliver returns that are inferior to alternative choices.

Liquidity Risk: It may be difficult to sell some investments, or to sell them without making a loss which may reduce the value of your investment.

Smaller and Medium Sized Companies Risk: Share prices of smaller and medium sized companies can go up and down more and may take longer to sell than shares of larger companies. They may also become illiquid, especially in falling markets.

Stock Market Risk: The value and income of shares can go up or down. This can be due to changes in how the market views the company, industry, or economy.

The value of your investment and any income is not guaranteed and you may get back less than the original amount you invested. The Scheme Prospectus section "Risk Factors" has more information.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	0.67%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

The Ongoing Charge Figure (OCF) is based on expenses for the half-year ending 15 October 2023 and has been annualised. This figure may vary from year to year.

Transaction costs, which are not included in the calculation of the OCF but are incurred by the Scheme when buying or selling investments, may have an impact on performance and are paid from the assets of the Scheme.

Our current policy is to charge all fees to the income of the Scheme, and not the capital.

More information about charges can be found in the Scheme Prospectus section "Fees and Expenses" and Appendix 1.

Past performance

Source: FE fundinfo 2024

You should be aware that past performance is not a guide to future performance.

Fund launch date: 01/03/1995.

Share/unit class launch date: 01/03/1995.

Performance is calculated in GBP.

The past performance calculation does not include any entry or exit charges if applicable, but does take into account the OCF and the costs of buying and selling securities.

Whilst the Scheme is managed with reference to the Target Benchmark, it does not track an index.

Please note that the Benchmark was reclassified from Constraint to Target on 30 October 2020. Prior to this date the Scheme was not aiming to outperform the Benchmark.

* FTSE All Share

Practical information

The Trustee is NatWest Trustee & Depositary Services Limited.

Further information about the Scheme can be found in the Prospectus and latest Report and Accounts, which are available free of charge in English on www.santanderassetmanagement.co.uk/tools#/fund-centre

Each unit trust is responsible for meeting its own debts from its assets. Each unit trust is a separate legal entity, and so the assets of one unit trust cannot be used to pay the debts of another.

The latest unit price of the Scheme is published each business day on www.santanderassetmanagement.co.uk/tools#/fund-centre

The base currency of the Scheme is UK Pound Sterling (GBP).

The Scheme is subject to UK tax laws, which may have an impact on your personal tax position. UK tax laws may be subject to change in the future.

You can switch your investments from one unit trust to another (which involves a sale of the Units held, and purchase of new Units) within the range of unit trusts offered by Santander Asset Management UK Limited (subject to meeting certain requirements as set out in the relevant prospectus). This may have tax consequences for you.

For information about the index used in the Target Benchmark, please refer to the Scheme Prospectus.

Details of Santander Asset Management UK Limited's remuneration policy, describing how remuneration and benefits are calculated and the identities of persons responsible for awarding remuneration and benefits, as well as other statements and policies are available on our website www.santanderassetmanagement.co.uk/modules/about-us/statements-and-policies. A paper copy of the website information is available free of charge upon request.

Santander Asset Management UK Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Scheme Prospectus.
