BlackRock Global Unconstrained Equity Fund (UK)

Class D GBP Dist

ISIN: GB00BRTCQ630

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund) over the long-term (5 years or more). The Fund invests at least 80% of its assets in equity securities (e.g. shares) and equity-related securities of companies domiciled in, or whose main business is in, global developed markets. The Fund may also, when determined appropriate, invest in other equity securities and equity-related securities and other asset classes to seek to achieve its investment objective and for liquidity purposes.
- The Investment Manager (IM) uses fundamental, company specific research to identify and select securities that, in its opinion, have the potential to produce attractive long-term growth. The Fund's portfolio is expected to be concentrated (i.e. a less diverse portfolio). The Fund has an unconstrained investment style (i.e. it will not take a benchmark index into account when selecting the Fund's investments).
- The IM may use financial derivative instruments (FDIs) for efficient portfolio management purposes (EPM) (i.e. to reduce risk or costs within the Fund's portfolio or generate additional income. The Fund may, via FDIs, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets). The Fund may engage in short-term secured lending of its investments to certain eligible third parties to generate additional income and off-set costs.
- The Fund is actively managed and the IM has discretion to select the Fund's investments. The Fund has an unconstrained investment style. However, the IM uses the MSCI World Index (the "Index") for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The IM is not bound by the components or weighting of the Index when selecting investments. The IM may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. The Fund's portfolio holdings are expected to deviate materially from the Index.
- Recommendation: This Fund may not be appropriate for short-term investment.
- Your units will be income units (i.e. dividend income will be paid semi-annually on the units).
- Your units will be denominated in Sterling, the Fund's base currency.
- You can buy and sell your units daily. The minimum initial investment for this unit class is £100,000.
