AXA Framlington UK Equity Income Fund

Unit class : AXA Framlington UK Equity Income Fund Zm Distribution GBP (ISIN: GB00BRXFYN10)

This Fund is managed by AXA Investment Managers UK Limited, part of the BNP Paribas S.A. Group

Objectives and Investment Policy

Investment Objective

The aim of this Fund is to produce higher than average income with long-term growth of income and capital over a period of 5 years or more. The Manager also intends to achieve a yield of distributable income in excess of 100% of the FTSE All Share yield at the Fund's year end on a rolling 3 year basis, and in excess of 90% on an annual basis.

Investment Policy

The Fund has at least 70% of its investments in shares of companies domiciled, incorporated or having significant business in the UK, which the Manager believes are leading companies within their sector and will provide above-average returns. The Fund has at least 51% of its investments in large companies which are in the FTSE 100 index. The Manager selects shares based upon analysis of a company's prospects for future growth in dividend payments, its financial status, the quality of its management, its expected profitability and prospects for growth. The Manager expects that the Fund's portfolio will typically consist of shares of between 30-50 different companies, although the actual number of holdings could be greater or less than this range.

While the Fund does not pursue a specific sustainability objective, it avoids investing in companies which present excessive degrees of environmental, social and governance (ESG) risk. The Manager applies AXA Investment Managers' sector-specific investment guidelines relating to responsible investment, which exclude investment in soft commodity derivatives or exposure to certain companies based on their involvement in specific sectors (such as tobacco production, natural ecosystem conversion and deforestation, controversial weapons and climate risks). The Manager also applies the AXA Investment Managers ESG Standards policy, which excludes: (a) companies involved in the manufacture of white phosphorus weapons, or which fail to meet certain criteria relating to human rights and anti-corruption as well as other ESG factors; (b) companies which materially cause, contribute, or are linked to violations of international norms and standards or which are involved in incidents and/or events that pose a severe business or reputational risk to the relevant company due to the impact of its involvement on stakeholders or the environment; and (c) companies with the lowest ESG scores, being any score below 1.43 (out of a maximum score of 10), reflecting the worst ESG practices.

A company's ESG score will also be considered, where applicable. ESG scores are obtained from the Manager's selected external provider(s) as detailed in the "Responsible Investment" section of the prospectus and may be adjusted by the Manager (or created by the Manager where an external score is not available), in each case using its own research. It is possible, however, that there will not be an ESG score for an investment in a limited number of cases. The Manager believes that companies with higher or improving ESG scores may be expected to manage risk associated with ESG issues more

effectively, which may be expected to contribute to the better financial performance of such companies in the long term. The ESG score is, however, just one component of the Manager's investment decision-making process. The AXA Investment Managers ESG Standards policy and AXA Investment Managers' sector-specific investment guidelines are subject to change. The latest copies are available from the Manager on request. The Manager undertakes engagements with investee companies with the aim of preserving or enhancing long-term value and creating better ESG outcomes for its investors over the long-term. More details on the Manager's approach to engagement with companies are available on the website <https://www.axa-im.co.uk/> under the heading "Responsible Investing".

If the Manager deems that an investment no longer meets the criteria set out in this investment policy or its expectations in terms of that investment's prospects for achieving the Fund's objective, the Manager will disinvest as soon as practicable having regard to the best interests of the Fund's investors and in accordance with its best execution policy.

The Fund may also invest in other transferable securities, units in collective investment schemes (including schemes that are managed by the Manager or its associates), deposits and money market instruments. The Fund may use derivatives for Efficient Portfolio Management. Use may be made of borrowing, cash holdings, hedging and other investment techniques permitted in the applicable Financial Conduct Authority rules.

The Fund is actively managed, and the Manager has full discretion to select investments for the Fund in line with the above investment policy. In doing so, the Manager may take into consideration the FTSE 350 Total Return Index (the "Index"), which is designed to measure the performance of the shares of the 350 largest UK listed companies and best represents the types of companies in which the Fund invests. The Index may be used by investors to compare the Fund's performance.

Risk and Reward Profile

The risk category is calculated using historical performance data and may not be a reliable indicator of the Fund's future risk profile.

The risk category shown is not guaranteed and may shift over time

The lowest category does not mean risk free.

Why is this Fund in this category?

The capital of the Fund is not guaranteed. The Fund is invested in financial markets and uses techniques and instruments which are subject to some levels of variation, which may result in gains or losses.

Additional Risks (risks materially relevant to the fund which are not adequately captured by the indicator)

Counterparty Risk: failure by any counterparty to a transaction (e.g. derivatives and securities lending) with the Fund to meet its obligations may adversely affect the value of the Fund. The Fund may receive assets from the counterparty to protect against any such adverse effect but there is a risk that the value of such assets at the time of the failure would be insufficient to cover the loss to the Fund.

Further explanation of the risks associated with an investment in this Fund can be found in the prospectus.

Charges

The charges you pay are used to pay the cost of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
