Janus Henderson

US Growth Fund Class I Acc ISIN: GB00B3B4JF96

A sub-fund of Janus Henderson Investment Fund Series I, a UK OEIC managed by Janus Henderson Fund Management UK Limited.
Fund Currency: GBP Share Class Currency: GBP

Objective and investment policy

Objective

The Fund aims to provide capital growth over the long term.

Performance target: To outperform the S&P 500 Index by at least 2.5% per annum, before the deduction of charges, over any 5 year period.

Investment policy

The Fund invests at least 80% of its assets in a concentrated portfolio of shares (also known as equities) of companies, of any size, in any industry, in the United States. Companies will have their registered office in or do most of their business (directly or through subsidiaries) in the United States. The portfolio may be concentrated in terms of its number of holdings and/or the size of its largest holdings.

The Fund may also invest in other assets including Collective Investment Schemes (including those managed by Janus Henderson), cash and money market instruments.

The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the S&P 500 Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the Fund's performance target. The Investment Manager has discretion to choose investments for the Fund with weightings different to the index or not in the index.

As an additional means of assessing the performance of the Fund, the IA North America sector average, which is based on a peer group of broadly similar funds, may also provide a useful comparator.

Strategy

The Investment Manager follows a fundamental, research-driven strategy, seeking to identify innovative companies with distinct advantages over their competitors, which allow them to protect market share and/or profitability. The Fund invests in the manager's best US large growth company ideas, where they believe their view is differentiated from the market, to construct a portfolio of typically 30 to 40 holdings.

Distribution policy The Fund offers accumulation shares (shares in which net income is retained within the price).

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any dealing day and according to certain restrictions, both defined in detail in the Company's Prospectus.

Risk and reward profile

Potentially lower reward						Potentially higher reward
Lower risk						Higher risk
1	2	3	4	5	**6**	7

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The rating above is based on the historic volatility of the share class. Historic data may not be a reliable indication of the future risk profile of the Fund. The rating is not guaranteed and may change over time.

The share class appears at 6 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in Net Asset Value in the past five years than those in lower categories. The lowest category does not mean risk free.

Other material risks not captured by the rating:

Equities Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

Investment Style - Growth The Fund follows a growth investment style that creates a bias towards certain types of companies. This may result in the Fund significantly underperforming or outperforming the wider market.

Country or Region High exposure to a particular country or geographical region carries a higher level of risk than a more broadly diversified portfolio.

Concentration When a portfolio is concentrated (has a significant portion of its assets invested in a limited number of holdings), an adverse event impacting even a small number of holdings could create significant volatility or losses.

Derivatives Derivatives may be used with the aim of reducing risk or managing the portfolio more efficiently. However, this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Exchange Rates If the Fund holds assets in currencies other than the base currency of the Fund, or you invest in a share/unit class of a different currency to the Fund (unless hedged, i.e. seeks to mitigate exchange rate movements between the share/unit class currency and the base currency of the Fund), the value of your investment may be impacted by changes in exchange rates.

Liquidity Securities could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Counterparty Risk and Operational Risk Losses could be incurred if a counterparty became unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Company's Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge	0.00%
Exit Charge	0.00%**

* The charges shown are maximum figures. In some cases you may pay less.

** Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

Charges taken from the Fund over a year

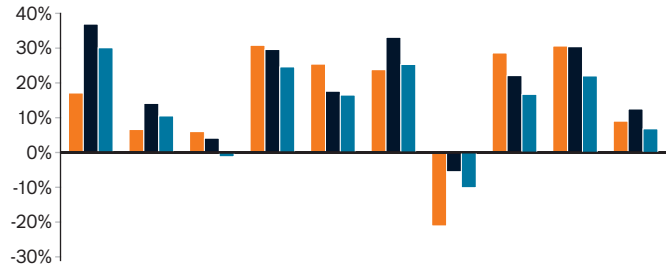
Ongoing Charges	0.85%

The ongoing charges are based on actual annualised expenses for the period ending 31 May 2025. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another Fund.

For more information about Charges please see the Company's Prospectus.

Past performance



Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025
	Performance (%)									
Class I Acc (Net of Charges)	17.1	6.6	6.0	30.8	25.4	23.8	-21.1	28.6	30.6	9.0

The past performance is calculated in GBP.

The Fund was launched in January 1976 and the share class was launched in August 2008.

Past performance does not predict future returns.

The past performance takes into account all charges except one-off charges.

Please note that while the Fund aims to achieve its performance target before the deduction of charges, the chart and table illustrate the actual performance of the share class after the deduction of charges.

The Fund does not aim to track the performance of the benchmark.
