

Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Global Responsible Multi-Asset Adventurous Portfolio

a sub-fund of HSBC OpenFunds, (the "OEIC");
managed by HSBC Asset Management (Fund Services UK) Limited

Class: Income C
ISIN: GB00BLKQCW05

Explanations of terms shown within the objectives and policy in bold, can be found within the glossary on the HSBC Global Asset Management (UK) Limited website: <http://www.assetmanagement.hsbc.com>.

Objectives and Investment Policy

- The Fund aims to provide **growth** in line with its risk profile in the long term, which is a period of five years or more.
- The Fund will also incorporate sustainability characteristics and, as part of its investment approach, it will invest in assets that support at least one of the following three responsible investment aims: (1) To deliver an overall carbon intensity level that is at least 25% lower than the carbon intensity of the broader investment universe. (2) To deliver an overall Environmental, Social and Governance ('ESG') score that is higher than the broader investment universe. (3) To invest in assets focused on themes that contribute towards positive environmental and/or social outcomes.
- For further information on the sustainability characteristics of the Fund please refer to the SDR Consumer Facing Disclosure document and the Prospectus.
- Sustainable investment labels help investors find products that have a specific sustainability goal. This product does not have a UK sustainable investment label since the Fund has not been designed to meet the FCA's specific label requirements.
- This is one of a range of **actively managed** Global Responsible Multi-Asset Portfolios offered at different risk levels. The Fund is rated as 5, where 1 is a lower level of risk and 5 is a higher level of risk.
- The level of risk stated is to allow investors to compare the risk relative to other Global Responsible Multi-Asset Portfolios. This differs from the Risk and reward profile below, which we are required to provide by regulation and which allows investors to compare the risk for different types of funds.
- As the Fund is managed with the aim of **maximising returns** in line with its long term risk profile any potential **returns** are likely to be limited by the risk profile of the Fund.
- To achieve its objective the Fund will invest a minimum of 80% of its value in other funds that in turn invest in a range of asset types such as **bonds**, shares of companies (**equities**), **infrastructure** and property as well as cash. The Fund will be invested across global markets.
- The other funds that the Fund invests in will, where possible, be those managed by the **HSBC Group**. Where this isn't possible the Fund may invest in funds managed by other fund providers.
- The Fund may invest up to 20% of its value directly in asset types such as **bonds** and **equities** and may invest in other financial instruments to gain exposure to other asset types where the investment objective can be more efficiently achieved, as well as cash.
- The **asset allocation** of each fund in the range reflects the risk level. Under normal market conditions, the **asset allocation** of the Fund will be as follows: **Equities**: 65%–100%, **Bonds**: 0%–35%, Other asset types, including cash: 0%–25%. These percentages will fluctuate based upon market movement and adjustments to the **asset allocation** to enable the Fund to meet its aim.

Use of Benchmarks

- The Fund is **actively managed** in line with its risk profile instead of being managed with reference to a benchmark. The performance of the Fund is compared against the performance of funds that are part of the Morningstar Allocation 80%+ Equity category, with both **returns** and **volatility** considered in the comparison.

Use of Derivatives

- The Fund may invest in different types of **derivatives** for **efficient portfolio management** purposes, including **hedging**, and for broader investment purposes to help the Fund meet its objective. In particular **derivatives** will be used to reduce or increase the Fund's exposure to different types of assets and to reduce the risk associated with movements in the rate of exchange between Sterling and other currencies in which the Fund's assets may be held. The Fund does not intend to use **derivatives** extensively and their use will be consistent with the risk profile of the Fund.
- Income is distributed.
- You may sell your investment on any business day by contacting the administrator before the dealing deadline at 12pm.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 5 because its price or simulated data has shown medium to high fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- Credit Risk** A bond or money market security could lose value if the issuer's financial health deteriorates.
- Default Risk** The issuers of certain bonds could become unwilling or unable to make payments on their bonds.
- Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.

- Emerging Markets Risk** Emerging markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- Interest Rate Risk** When interest rates rise, bond values generally fall. This risk of this happening is generally greater the longer the maturity of a bond investment and the higher its credit quality.
- Investment Fund Risk** Investing in other funds involves certain risks an investor would not face if investing in markets directly. Governance of underlying assets can be the responsibility of third-party managers.
- Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Liquidity Risk** Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
- Operational Risk** Operational errors may affect transactions, valuation, accounting, financial reporting and other processes relating to the Fund.

Charges

The charges you pay are used to pay the running costs of the Fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing charge	0.77%
----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	None
-----------------	------

- The entry and exit charges shown are the maximum that may be charged. In some cases you may pay less. You can obtain the actual charges from your financial adviser.
- A conversion charge may be payable.
- The ongoing charges figure shown here is an estimate of the charges. The ongoing charges figure shown is an estimate due to a material change in the fee structure. The Fund's annual report for each financial year will include detail on the exact charges made.
- In addition to the ongoing charges, the Fund incurs costs relating to investments in underlying closed ended investments (such as investment trusts). These costs vary and are approximately 0.02%.

Further information on Charges can be found in the "Fees and Expenses" section of the Fund's Prospectus.

Past Performance

- Past performance is not a guide to future performance; the value of your investment and any income from it can go down as well as up.
- Performance returns are based on the net asset value with distributable income reinvested. Past performance takes account of all ongoing charges but not entry, exit or conversion charges.
- The past performance of this share class is calculated in GBP.
- The Fund was launched on 20 April 2020.

Practical Information

Depositary

State Street Trustees Limited.

Further information

Further information about the OEIC including the latest Prospectus, latest published prices of shares, annual report and half yearly report and, where applicable, the SDR Consumer Facing Disclosure may be obtained free of charge, in English, from the Administrator, HSBC Asset Management (Fund Services UK) Limited, Sunderland SR43 4BF or by visiting www.assetmanagement.hsbc.com. The most recent Prospectus is available in English. This document describes a single share class of the OEIC. The Prospectus, annual and half yearly reports are prepared for the entire OEIC.

Share classes

Other share classes are available, as detailed in the Prospectus. It is possible to convert your shares into a different share class or switch your shares into a different Fund within the OEIC. Details of how to do this are in the Prospectus (please note an initial charge may apply).

Remuneration Policy

The Remuneration Policy of the Authorised Corporate Director, which describes the remuneration practices and governance arrangements for UCITS and AIFMD Authorised entities, is available at www.assetmanagement.hsbc.com (please select "About Us" then "Our Governance" then "Remuneration Practices and Governance Arrangements for UCITS and AIFMD Authorised Entities") or on request free of charge from the Administrator.

Tax

UK tax legislation may have an impact on your personal position.

Segregated liability

The OEIC is an umbrella investment company with segregated liability between Funds. This means that the holdings of one Fund are kept separate from the holdings of the other Funds and your investment in the Fund cannot be used to pay the liabilities of any other Fund.

The Fund is authorised in the United Kingdom and regulated by the Financial Conduct Authority. HSBC Asset Management (Fund Services UK) Limited is authorised in the United Kingdom and regulated by the Financial Conduct Authority. This key investor information is accurate as at 17 February 2026.
