Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

PIMCO

PIMCO MLP & Energy Infrastructure Fund

a sub-fund of PIMCO Funds: Global Investors Series plc
PIMCO Global Advisors (Ireland) Limited, part of Allianz, manages this fund.

ISIN: IE00BRS5T311
Share class: Institutional GBP (Hedged) Accumulation

Objectives and Investment Policy

Objective The fund aims to maximise the total return of your investment through investing in a diversified portfolio of equity and equity-related securities, which are primarily focussed on the energy infrastructure sector, using prudent investment management principles.

Investment Policy The fund will invest at least two-thirds of its net assets and may invest without limit in equity and equity-related securities of mid-stream energy infrastructure entities (i.e. transportation through pipeline, rail and oil tankers), including master limited partnerships ("MLPs"), publicly traded partnerships and related entities (including general partners of MLPs, as well as corporations operating in the mid-stream energy sector) and securities that are convertible into equity securities issued by these entities.

The fund may invest up to one-third of its assets in a range of fixed income securities and instruments, which are loans that pay a fixed or variable rate of interest. The fixed income securities will be focused on the energy infrastructure sector and will be both "investment grade" and "non-investment grade". Non-investment grade securities are considered to be more risky, but typically produce a higher level of income.

The fund may invest up to 20% of its net assets in emerging markets, which in investment terms are those economies that are not as developed.

The fund is considered to be actively managed in reference to the Alerian MLP Index (the "Index") by virtue of the fact that the Index is used for calculating the global exposure of the fund using the relative VaR methodology and for performance comparison purposes. Certain of the fund's securities may be components of and may have similar weightings to the Index. However, the Index is not used to define the portfolio composition of the fund or as a performance target and the fund may be wholly invested in securities which are not constituents of the Index.

The fund may invest in derivative instruments (such as futures, options and swaps) rather than directly in the underlying securities themselves. The derivatives return is linked to movements in the underlying assets.

The assets held by the fund may be denominated in a variety of currencies. Non-USD net currency exposure limited to 5% of the fund's net assets. The investment advisor may use foreign exchange and related derivative instruments to hedge or implement currency positions.

For full investment objectives and policy details please refer to the fund's prospectus.

Distribution Policy This share class does not pay out a distribution. Any investment income generated will be reinvested.

Share Class Currency Hedging This share class seeks to limit the shareholder's currency risk by reducing the effect of exchange rate fluctuations between the share class currency and any non-active currency exposures of the fund.

Dealing Day You can buy and sell shares on most working days in Dublin, exceptions to this are more fully described in the fund holiday calendar available from the Administrator.

Risk and Reward Profile

1	2	3	4	5	**6**	7

< Lower risk — Higher risk >
Typically lower rewards — Typically higher rewards

The indicator above is not a measure of the risk of capital loss, but a measure of the fund's price movement over time.

- It is based on historical data and thus may not be a reliable indication for the future.
- The indicated risk category is not guaranteed and may shift over time.
- The indicator is designed to help investors understand the uncertainties both for loss and for growth that may affect their investment. In this context, the lowest category does not mean "risk free".
- The risk indicator is based on the volatility of the fund's performance over the last 5 years. Where 5 years' performance history is not available the data is supplemented by benchmark data or simulated historical series as appropriate.
- The fund does not provide its investors with any guarantee on performance, nor on the monies invested in it.

In addition to the risk captured by the indicator, the overall fund value may be considerably affected by:

Commodities Risk The value of commodity related investments may fluctuate substantially due to changes in supply and demand and/or due to political, economic or financial events.

Currency Risk Changes in exchange rates may cause the value of investments to decrease or increase.

Equity Risk The value of equity or equity related securities may be affected by stock market movements. Drivers of price fluctuations include general economic and political factors as well as industry or company specific factors.

Derivatives and Counterparty Risk The use of certain derivatives could result in the fund having a greater or more volatile exposure to the underlying assets and an increased exposure to counterparty risk. This may expose the fund to larger gains or losses associated with market movements or in relation to a trade counterparty being unable to meet its obligations.

Liquidity Risk Difficult market conditions could result in certain securities becoming hard to sell at a desired time and price.

Small-Cap and Mid-Cap Company Risk The prices of shares of small and medium-sized companies may fluctuate more than that of larger companies.

MLP Tax Risk The fund may be required to file tax returns and pay income taxes which may have the effect of reducing the fund's return. While investments in MLPs may subject the fund to U.S. taxation and return filing obligations, it is not expected that investments in derivative instruments such as total return swaps on MLPs will result in these same tax consequences, although there can be no guarantee.

Charges

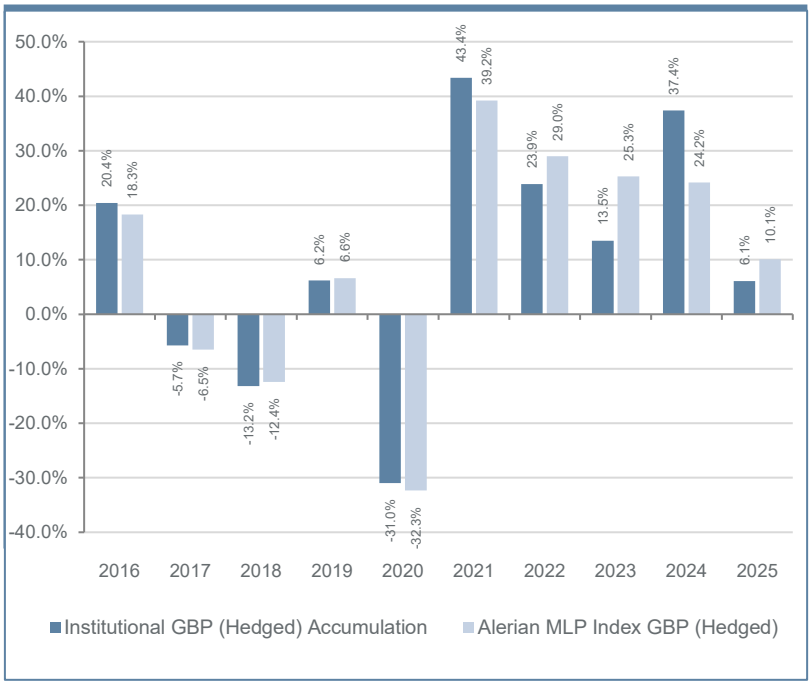
The charges you pay are used to pay for the costs of running the fund, which include the marketing and distributing costs. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	0.99%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The ongoing charges figure is based on expenses for the year ending 2025. This figure may vary from year to year. It excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see the section of the prospectus entitled "Fees and Expenses", which is available at www.europe.pimco-funds.com.

Past Performance



- Past performance is not an indicator of future returns.
- Past performance does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section.
- The performance of the class is calculated in British Pounds.
- The fund launched in November 2014. This class started to issue shares in November 2014.
