

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

SVS RM Infrastructure Bond Fund Class F Accumulation Shares [ISIN: GB00BR103F36] Class F Income Shares [ISIN: GB00BR104D86]

The Fund is a sub-fund of SVS RM Funds ICVC.

The Authorised Corporate Director of the Fund is Evelyn Partners Fund Solutions Limited trading as St Vincent St Fund Administration, part of the Evelyn Partners group.

Objectives and investment policy

The Fund aims to provide income greater than Sterling Overnight Index Average (SONIA) whilst preserving capital over the medium to longer term (3 - 5 years).

The Fund aims to meet its objectives by investing at least 80% directly into fixed income securities. These may include investment grade (considered by the investment manager to be those rated BBB- or higher) and sub-investment grade bonds (rating of BB+ or lower) issued by companies operating in the infrastructure sector, for example, economic infrastructure, social infrastructure and energy, waste and water infrastructure companies.

The Fund may also invest in:

- other transferable securities (including government bonds, convertible bonds and shares)
- cash and near cash, deposits and money market instruments
- investment trusts and exchange traded funds (in order to gain indirect exposure to government bonds, corporate bonds, credit or lending)

Non-sterling exposure will normally be hedged back to Sterling. There will be no particular emphasis on any geographical area.

The Fund may use derivatives and hedging for efficient portfolio management (EPM) and investment purposes, i.e to protect against market or currency movements, to reduce cost or to earn income or capital.

The Fund will usually be fully invested save for an amount to enable redemption of shares and for the efficient management of the Fund. This would normally not exceed 10% of the total value of the Fund, however if the Investment Manager considers bond markets to be overpriced or that a period of instability exists which presents unusual risks, this could be increased up to, but will not exceed 30% and six months respectively.

Income Shares: Any income the Fund generates will be paid out to you. Accumulation Shares: Any income the Fund generates will be reinvested.

You can buy and sell shares Monday to Fridays excluding UK public and bank holidays.

The Fund is actively managed, which means that the manager has discretion over the composition of its portfolio, and the Fund is not tracking the benchmark nor is the Fund constrained by the value, price or components of that benchmark or any other aspect. The benchmark is a target for the Fund, where the target return of the Fund aims to match or exceed the return of that benchmark.

For further details and for full investment objectives and policy details please refer to the Prospectus.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

- The Fund is in a medium category because the price of its investments have risen or fallen to some extent. The category shown is not guaranteed to remain unchanged and may shift over time. Even the lowest category does not mean a risk-free investment.
- The price of the Fund and any income from it can go down as well as up and is not guaranteed. Investors may not get back the amount invested. Past performance is not a guide to future performance.
- Where the Fund invests in bonds, there is a risk the bond issuer may fail to meet its repayments. This is usually a greater risk for bonds that produce a higher level of income. Changes in interest rates, inflation and the creditworthiness of the bond issuer may also affect the bond's market value.
- Where the Fund invests into other investment funds, they may invest in different assets, countries or economic sectors and therefore have different risk profiles not in line with those of the Fund.
- Investment trusts and closed ended funds may borrow to purchase additional investments. This can increase returns when stock markets rise but will magnify losses when markets fall. The value of an investment trust or a closed-ended fund moves in line with stock market demand and its share price may be less than or more than the net value of the investments it holds.
- The Fund is entitled to use derivative instruments for EPM and investment purposes. Derivatives may not achieve their intended purpose. Their prices may move up or down significantly over relatively short periods of time which may result in losses greater than the amount paid. This could adversely impact the value of the Fund.
- The organisation from which the Fund buys a derivative may fail to carry out its obligations, which could also cause losses to the Fund.
- The Fund may invest in securities not denominated in sterling, the value of your investments may be affected by changes in currency exchange rates.
- For full details on risk factors for this Fund, please refer to the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	0.49%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- The ongoing charges figure is capped at 0.50%. If the ongoing charges figure was not capped it would currently be 0.98%.
- Previously, the Ongoing Charges Figure (OCF) included expenses incurred by a Fund on any investments in collective investment schemes and closed ended vehicles such as investment trusts (the synthetic OCF). Following guidance issued by the Investment Association on 30 November 2023, any synthetic OCF now excludes the expenses of closed ended vehicles.
- A dilution levy may be charged on a purchase or sale of shares in the Fund in some cases. It may be necessary to reduce the difference between the cost of buying or selling the Fund's investments and the Fund's mid-market share price. Any dilution levy charged will be paid into the Fund.
- The Fund's annual report for each financial year will include detail on the exact charges made.
- The ongoing charges figure is for the year ending 31/07/2024.
- For further information about charges, please refer to relevant sections in the Fund's Prospectus.

Past performance

	2020	2021	2022	2023	2024
Fund					6.1
