a sub-fund of Vontobel Fund

This fund is managed by Vontobel Asset Management S.A., which is part of Vontobel Group.

This fund is authorised in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Objectives and investment policy

This actively managed sub-fund aims to achieve long-term capital growth in EUR and has a sustainable investment objective within the meaning of Article 9 SFDR. More details can be found in the prospectus.

- It invests at least 80% of its net assets in equities, equity-like securities (including transferable securities that are qualified as closed-ended real estate investment trusts, participation certificates) issued by companies worldwide (including emerging markets) whose products or services contribute to an environmentally sustainable objective in the Investment Manager's opinion. It may invest up to 20% via Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect in China A-Shares. The Sub-Fund may not invest in other UCITS/UCIs.
- **Type of approach:** The Sub-Fund has a sustainable investment objective which consists of investing in issuers that contribute to pre-defined so called "Impact Pillars" through their products and services. The Impact Pillars are: clean energy infrastructure, resource-efficient industry, clean water, building technology, low emission transportation and lifecycle management. **Threshold:** The Sub-Fund invests at least 80% of its net assets in sustainable

investments. **Main methodological limits:** Deficient ESG third-party data and internal analyses may result in inaccurate assessments of securities or issuers. Also, relevant ESG criteria may not be applied correctly and there may be indirect investment exposure to issuers who do not meet the relevant criteria.

- It may also hold up to 20% of its net assets in bank deposits at sight.
- The sub-fund may use derivatives for hedging purposes.
- The currency of this class is NOT hedged against the Sub-Fund's main currency. The investor consequently bears the full currency risk.
- The Sub-Fund uses the benchmark MSCI World Index TR net for performance comparison. The portfolio manager has full investment discretion within the predefined investment limits. Please see the prospectus for relevant Benchmark Provider Notices.
- Any income generated will be reinvested and included in the value of your shares.
- Buying and selling securities entails transaction costs payable in addition to the charges listed.
- Redemption of shares: daily when banks in Luxembourg are open for normal business (see prospectus for details and exceptions).
- N shares are reserved for specific investors and do not grant any rebate or retrocessions. See prospectus for details.

Risk and reward profile

The indicator above does not signal the risk of a potential loss, but indicates the fluctuations in the sub-fund's share price in the past.

- The share class is assigned to this category because its share price can fluctuate sharply due to the investment policy applied.
- The historical data used to calculate the profile cannot be used as a reliable guide to the future risk profile of the sub-fund.
- The risk category shown is not guaranteed and may change.
- Even the lowest risk category is not entirely free of risk.

When assigning a sub-fund's share class to a risk category, it may be the case that not all risks are taken into account. Such risks include risks in connection with exceptional market events, operational errors, legal and political events. You can find a detailed list of the risks in the "Notice regarding special risks" section in the general part of the sales

prospectus. The following risks have no direct influence on this category, but may still be important:

- The portfolio has lower risk diversification as the focus lies on companies within a specific investment theme.
- The sub-fund also includes sustainability criteria in its investment process. This may mean that the sub-fund's performance is more positive or negative than a conventionally managed portfolio.
- Investments in China A-Shares are subject to changes in political, economic and social conditions in China as well as changes in the policies of the PRC government, laws and regulations.
- A company's stock price may be adversely affected by changes in the company, its industry or economic environment and prices can change quickly. Equities typically involve higher risks than bonds and money market instruments.
- Investments in emerging markets entail increased liquidity risks and operational risks as these markets tend to be underdeveloped and more exposed to political, legal, tax and foreign exchange control risks.
- This share class is issued in a currency different from the sub-fund currency. The investor is therefore exposed to the full currency risk when investing in the sub-fund.
