<b>Jurisdiction:</b>	Jersey	<b>Group of which the PRIIP Manufacturer is a part:</b>	WisdomTree

### What is this product?

#### Type

Jersey law governed, uncertificated, registered, collateralised debt security.

#### Objectives

Gold Bullion Securities is a UCITS Eligible Exchange Traded Commodity (ETC) designed to offer security holders a simple, cost-efficient and secure way to access Physical Gold by providing a return equivalent to the movements in the Physical Gold spot price less the applicable management fee. Gold Bullion Securities is backed by physical, allocated Physical Gold held by HSBC Bank plc (the custodian). Only metal that conforms with the London Bullion Market Association's (LBMA) rules for Good Delivery can be accepted by the custodian. Each physical bar is segregated, individually identified and allocated. For example, if Physical Gold rises by 1% over a day, then the ETC will rise by 1%, excluding fees. However if Physical Gold falls by 1% over a day, then the ETC will fall by 1%, excluding fees. You may trade this product on various stock exchanges at your own discretion.

#### Intended Retail Investor

This product is intended for basic retail investors who: (i) can bear loss of capital, are not seeking to preserve capital and who are not looking for capital guarantee; (ii) have specific knowledge or experience of investing in similar products and in financial markets; and (iii) seek a product offering exposure to the performance of the underlying asset(s) and have an investment horizon in line with the recommended holding period stated below.

#### Term

This product does not have a fixed term. The term will depend on how long you choose to hold the product. The Issuer is entitled to terminate this product unilaterally.

## What are the risks and what could I get in return?

Lower Risk

1

2

3

4

5

6

7

Higher Risk

The risk indicator assumes you keep the product for 5 years. **The actual risk can be significantly higher if you cash in at an early or later stage and you may get back less.**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level.

**Be aware of currency risk. If the trading currency is different to the base currency, you will receive payments in a different currency, so the final return you will get will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

The Issuer may terminate this product unilaterally, and in certain compulsory redemption events may do so on very short notice as set out in the prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

## Factors affecting the return of the product at the end of the recommended holding period

Your return on the product at the end of the recommended holding period will principally be affected by the performance of the underlying[s] over the recommended holding period and of the exchange rate between the product currency and the currency in which you bought the product.

What could affect my return positively?

+ An increase in the Gold Spot Price.

What could affect my return negatively?

+ A decrease in the Gold Spot Price.

The factors listed above provide general guidance on how changes in the Gold Spot Price may affect your return. The precise impact will depend on the timing and magnitude of these changes, and the above list should not be viewed as guaranteeing a particular outcome. See "What is this product?" for a discussion of what you will receive when you exit the product.

In severely adverse market conditions you may lose your entire investment.

## What happens if Gold Bullion Securities Limited is unable to pay out?

The Issuer is a special purpose company. In case of a default by the Issuer, any claims made against the Issuer will be satisfied in order of the priority of payments set out in the conditions of the product. If the net proceeds from the enforcement of the secured property relevant to the product are not sufficient to meet all obligations and make all payments then due in respect of the securities, the obligations of the Issuer in respect of such securities will be limited to the net proceeds of realisation of the relevant secured property. In these circumstances you may suffer a loss if you cannot realise the full value of your investment.

The product is not protected by an investor compensation or guarantee scheme.

## Key Information Document

### What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs and how they impact your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does (where applicable). The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

1. In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in a moderate scenario
2. 10,000 is invested (USD)

Investment \$10,000	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	\$40.00	\$296.26
<b>Annual Cost impact(*)</b>	-0.40%	-0.40%

(\*)This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the end of the recommended holding period your average return per year is projected to be 8.75% before costs and 8.35% after costs.

### Composition of Costs

The table below shows:

1. The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period.
2. The meaning of the different cost categories

One-off costs upon entry or exit		If you exit after 1 year
<b>Entry costs</b>	We do not charge an entry fee when purchased on exchange.	\$0.00
<b>Exit costs</b>	We do not charge an exit fee when sold on exchange.	\$0.00
Ongoing costs taken each year		If you exit after 1 year
<b>Management fees and other administrative or operating costs</b>	0.40% of the value of your investment per year. This is an estimate based on actual costs over the last year.	\$40.00
<b>Transaction costs</b>	0.00% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	\$0.00
Incidental costs taken under specific conditions		If you exit after 1 year
<b>Performance fees</b>	There is no performance fee for this product	\$0.00

### How long should I hold it and can I take money out early?

Recommended holding period: 5 years. You will be able to sell this product at any time on the stock exchanges where it is listed; however, there is no cooling off period or cancellation period. Exiting prior to the recommended holding period will not give rise to an exit charge or penalties or contingent fees, however it will cause the risk and the performance profile of the product to be different to what is indicated in this document.

### How can I complain?

In case of any unexpected problems in the understanding, trading or handling of this product, please feel free to directly contact WisdomTree.
