

Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

IFSL

Fund Services

IFSL Avellemy European Equity Fund A Shares

A Sub-fund of the IFSL Avellemy Multi-Manager OEIC (ISIN Income: GB00BNDMD937) (ISIN Accumulation: GB00BNDMD820)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

The aim of the Fund is to increase in value, over a minimum of 5 years, through a combination of capital growth, which is profit on investments held, and income, which is money paid out of investments such as dividends from shares.

The Fund is actively managed which means the Investment Managers decide which investments to buy or sell and when. Investment decisions are taken based on individual company research in addition to the Investment Manager's view on global economic and market conditions.

At least 80% of the Fund will be invested in European shares of companies, also known as equities, which are those listed in, incorporated in, or that have significant economic exposure to, Europe, excluding the UK. This may include exposure through holdings in investment trusts, funds and ETFs.

The Fund may invest in shares of companies of varying sizes, for example from large cap to small cap. The exposure to small cap companies (often higher risk) may, at times, be significant.

The Fund may also invest up to 20% of the Fund in non-European shares of companies, along with other asset types, such as bonds, warrants, and money market instruments.

Up to 10% of the Fund may be invested in units/shares in other funds (which could include other funds managed by the Authorised Corporate Director, the

Investment Managers or one of their associates).

The Fund may hold up to 20% in cash to enable the ready settlement of liabilities, for the efficient management of the portfolio or in pursuit of the Fund's investment objective

The Fund can use derivatives or forward transactions, instruments whose returns are linked to another asset, market or other variable factor, in order to meet the Fund's objective (also known as investment purposes), or for efficient portfolio management purposes including the reduction of risk (hedging).

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors', as a way of dividing funds into broad groups with similar characteristics.

The Fund's investment policy puts it in the IA Europe excluding UK sector. You may want to assess the Fund's performance compared to the performance of this sector.

The Fund pays income. If you wish to receive this please tell us. If you do not want to receive income you will be given accumulation shares which means income is invested back into the Fund and reflected in the price of your shares.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 6 because its investments have experienced high volatility in the past. The Fund's volatility is affected by various risks, including:

- The Fund will be exposed to stock markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
- The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of your investment.

Risks which are not adequately captured by the risk indicator include:

- In certain market conditions some assets may be less predictable than usual. This may make it harder to sell at a desired price and/or in a timely manner.
- In extreme market conditions redemptions in the underlying funds or the Fund itself may be deferred or suspended.
- The insolvency of any institution providing services, such as safekeeping of assets or holding investments with returns linked to financial contracts (known as derivatives), may expose the Fund to financial loss.
- The Fund may enter into various financial contracts (known as derivatives) in an attempt to protect the value of the Fund's assets, to reduce the costs of investing or for investment purposes. There is however a risk that the desired result may not be achieved or may result in gains or losses greater than the amount originally invested.

A more detailed description of the risks that apply to this Fund can be found in the Fund's prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

As this share class does not have 12 months accounting data the ongoing charges figure is based on estimated expenses. This share class has benefited from expense funding whereby some of the charges outlined in the prospectus have been fully or partially funded. Without this expense funding it is anticipated the OCF would be higher and potentially to the extent of having a noticeable impact on the returns investors receive. When this expense funding ceases if the OCF is expected to increase by an amount greater than 5% of its current value, Investment Fund Services Limited will give investors 60 days' written notice. From 30 April 2021, the Ongoing Charge calculation has been extended to include, where relevant, charges incurred by closed-ended vehicles such as investment trusts. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the non-UCITS when buying or selling units in another collective investment undertaking.

For more information about charges, please see Sections 24 - 26 of the Fund's Prospectus, which is available at www.ifslfunds.com.

One-off charges taken before or after you invest

Entry Charge	0.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing Charges	0.79%
------------------------	-------

Charges taken from the fund under certain conditions

Performance Fee	None
------------------------	------

Past Performance

As the Fund has no performance data for one complete year, there is insufficient data to provide a useful indication of past performance.

This Fund was launched on 21 June 2021.

This share class was launched on 21 June 2021.
