OBJECTIVES AND INVESTMENT POLICY

The Fund aims to provide a monthly income and capital returns consistent with a specified level of risk, over rolling 5-year periods.

The level of risk ranges between 50% and 70% of the forecast long-term volatility of global equities as represented by the MSCI All Countries World Index (GBP Total Return, Net) over rolling 5-year periods.

Such asset classes are: equity securities (such as shares), fixed income securities (such as corporate bonds and government bonds), money market instruments, cash and near cash.

Due to the income objective, it is expected that at least 80% of the Fund will be invested in assets that pay a dividend or coupon.

The Fund is actively managed and uses a mixture of asset allocation techniques to blend asset classes for diversification, aiming to provide returns consistent with the Fund's “Balanced” risk profile and return aim. The Manager will use

strategic asset allocation to determine the Fund's longer-term allocation to different asset classes and may also engage in tactical asset allocation decisions to take advantage of shorter-term market trends.

The collective investment schemes in which the Fund invests will include both those managed by Hargreaves Lansdown Fund Managers Ltd., and third parties. The collective investment schemes will be established in Europe, UK, Jersey and Guernsey.
