Lazard Developing Markets Fund C Acc GBP

Lazard Developing Markets Fund is a sub-fund of Lazard Investment Funds (the "UCITS")

ISIN: GB00B84D0885

This Fund is managed by Lazard Fund Managers Limited, part of the Lazard Group

Objectives and Investment Policy

Lazard Developing Markets Fund (the "Fund") aims to achieve capital growth over at least 5 years.

The Fund is actively managed and will invest at least 70% of its value in equities (i.e. shares) and equity-related securities of, or relating to, companies domiciled, incorporated, listed in, or which have a significant portion of their business in developing market countries. Such securities may include exchange traded and over-the-counter common and preferred stocks, warrants, rights (which are issued by a company to allow holders to subscribe for additional securities issued by that company), depositary receipts and preference shares.

The Fund may also invest in units or shares of other investment funds (including exchange traded funds, other sub-funds of the UCITS and/or other funds managed by the Lazard Group), investment grade government and corporate fixed income securities (including convertible debt securities (debt securities that are convertible into the equity securities of the issuer)).

The Fund may also invest in units or shares of listed closed-ended funds which provide equity exposure consistent with the Fund's investment policy.

The Fund may use derivatives (which are financial contracts whose value is linked to the price of an underlying investment) for the purposes of efficient portfolio management.

You can buy or sell shares in the Fund on any day on which the stock exchange in London is open for business.

The Fund has discretion as to which investments it will hold within the limits of the Investment Objective and Policy.

Income and profits, if any, attributable to your shares will not be paid out as a dividend but will be accumulated in the Fund on your behalf and reflected in an increase in the value of your holdings.

The Fund's performance is measured against the performance of the MSCI Emerging Markets Index (the "Benchmark") which the Investment Manager has assessed to be the most appropriate Benchmark for comparison. The Benchmark is not a target for the Fund, nor is it constrained by the Benchmark as the Fund has flexibility to invest in securities and asset classes not included in the Benchmark.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within a short period of time.

Risk and Reward Profile

The risk and reward categories above are calculated using historic data and may not be a reliable indicator of the Fund's future risk profile. The risk and reward category may shift over time and is not a target or guarantee.
The lowest category (i.e. category 1) does not mean "risk free".

The risk rating of this share class is calculated on the basis of historic volatility – i.e. how much the value of the underlying assets of the Fund has fluctuated over the last 5 years.

This share class has been placed in the risk category stated above, because based on the historic data, the underlying assets within the Fund have shown high volatility.

Please note, there are other risks that may not be reflected in the risk and reward categories above. Some of these risks are summarised below.

- There is no capital guarantee or protection of the value of the Fund. The value of your investment and the income from it can go down as well as up and you may not get back the amount you originally invested.
- This Fund may invest in the securities of developing markets. These markets may be less developed than others and so there is a greater risk that the Fund may experience greater volatility, delays in buying, selling and claiming ownership of its investments. Developing markets may also have less developed political, economic and legal systems and there is a higher risk that the Fund may not get back its money.
- The Fund may invest in units or shares of other investment funds. Such other funds may themselves be subject to their own fees and expenses.
- The returns from your investment may be affected by changes in the exchange rate between the Fund's base currency, the currency of the Fund's investments, your share class and your home currency.

See "Risk Factors" in the UCITS' Prospectus for more information about risks.
