Sarasin Multi Asset - Strategic Fund, a sub-fund of Sarasin Funds ICVC

Class P Inc **ISIN:GB00B7V4BG27**

This Fund is managed by Sarasin Investment Funds Limited

Objectives and Investment Policy

Objective

We seek to grow the Fund (through increases in investment value and income) in real terms over a rolling 5-year period after deducting fees and costs. To grow in real terms, the Fund must increase in value after outperforming the rate of inflation. We measure inflation using the Consumer Prices Index (CPI). There is no guarantee that the Fund will grow in real terms over 5-year rolling periods or over any period and there is a risk of loss.

Investment Policy

We invest between 20 and 60% of the Fund in the shares of companies from around the world. We will also invest in bonds, alternative investments, units in funds (including those managed by Sarasin) and cash, and we may hold up to 80% of the Fund in these assets when we deem it appropriate in order to manage difficult market conditions.

Alternative investments include, but are not limited to, infrastructure, commodities and private equity/venture capital.

The Fund is actively managed and we will strategically manage the mix of assets in the portfolio, within the above parameters, depending on our view of market conditions.

We select companies from any country/region, sector or industry. We identify the long-term investment themes that drive growth and lead to disruption in global economies and industries. We select companies based on our own analysis of which are most likely to benefit from these themes, and are well placed to grow their revenues and cash flows as a result of them.

Integral to this analysis is an in-house tool devised to examine and quantify any material environmental, social and/or governance ("ESG") factors. A comprehensive assessment of the related risks and opportunities resulting from these factors are then embedded within our financial modelling and analysis of companies.

We undertake fundamental analysis on bond issuers, which includes an evaluation of risks that ESG factors pose. We implement an in-house scoring system which combines our assessment of the materiality of ESG risks associated with each industry sector with data on each bond issuer to generate an overall issuer-specific ESG rating and only invest in bonds whose issuer has as ESG rating above a pre-determined level.

The Fund will not therefore always exclude holdings for which material ESG risks have been identified.

We engage as far as possible with companies to promote actions to mitigate material ESG risks identified with priority given according to the materiality of our concern, the size of our holding, and also our view of the ability for engagement to have a meaningful impact. Voting is integral to our engagement work and, where we are a shareholder, we seek to ensure our voting is aligned with our engagement priorities.

We may only use derivatives to maintain the Fund's value, manage investment risk and to gain cost-effective access to investments. Derivatives are financial contracts whose value is linked to the price of another asset (e.g. indices, rates, share prices, currencies).

The Fund's performance can be assessed by reference to a blended benchmark of:

25% - ICE BofA UK Gilts All Stocks;
25% - ICE BofA Sterling Corporate & Collateralised Index;
5% - MSCI All Countries World Index 100% Hedged to GBP;
35% - MSCI All Countries World Daily Index (Net Total Return);
5% Bank of England SONIA +2%;
5% Bank of England SONIA;

This represents a typical mix of assets held by the Fund.

Distribution Policy

Any income due from your investment is reflected in the value of your shares rather than being paid out.

Dealing Frequency

You can buy and sell shares in the Fund before 12 noon GMT on any business day in London.

Recommendation

This Fund may not be appropriate for investors who plan to withdraw their money within 5 years. For full investment objectives and policy details please refer to the Prospectus. For further details on the Fund's sustainability approach please refer to the SDR Consumer Facing Disclosure document.

Risk and Reward Profile

Lower risk **Higher risk**

Potentially lower reward **Potentially higher reward**

1	2	3	4	5	6	7

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and return, calculated using the volatility of monthly returns over five years. As it is based upon how the fund has performed in the past, you should note that the fund may well perform differently in the future. The risk category shown is not guaranteed and may shift over time.

The higher the rank the greater the potential reward but the greater the risk of losing money. The lowest risk number does not mean risk free.

The Fund is ranked at 4 reflecting observed historical returns. The fund is in this category because it has shown moderate levels of volatility historically.

The following risks may not be fully captured by the Indicator:

- Bond risk: In stressed conditions bonds may become harder to sell in a timely manner, resulting in unpredictable changes in the value of your holdings.
- Emerging markets risk: Emerging markets may face more political, economic or structural challenges than developed markets. Shares may also be less liquid, meaning investments may not be sold quickly enough to prevent or minimize a loss. As a result, investing in emerging markets may involve a higher risk than investing in developed markets.
- Alternatives risk: The fund may invest in alternative assets that are difficult to sell quickly, challenging to value, and subject to higher fees. These assets may also contribute to greater price volatility compared to traditional assets such as equities, fixed income and cash. Such conditions could lead to unpredictable changes in the value of your holdings.
- Derivatives risk: Derivatives are financial instruments whose value is linked to the expected future price movements of an underlying asset. Derivatives such as futures, forward contracts, options, and swaps may be used to seek to manage risk within the fund, reduce investment costs and generate additional income. However, these strategies may not be successful and could lead to losses greater than the cost of the derivative.
- Exchange Traded Funds (ETFs) risk: ETFs are subject to market fluctuations and the risks of their underlying investments. They are also subject to management fees and other expenses.
- Operational risk: Operational risks arising from failures or delays in processes and systems, or the failure of a third-party provider may affect the value of your investments. If compensation is required to due failures, payments may be delayed.
- Counterparty and settlement risk: The fund could lose money if a counterparty with which it transacts with becomes unwilling or unable to repay money owed to the fund.
-
- Charges deducted from capital: The fund has charges deducted from capital, which may reduce the potential for growth.
- Further details of the risks that apply to the fund can be found in the fund's Prospectus.
