ROYAL LONDON ASSET MANAGEMENT

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Royal London Global Bond Opportunities Fund (Income - Class Z GBP Shares)

A sub-fund of Royal London Asset Management Funds plc ISIN: IE00BYTYX230
FundRock Management Company S.A. as its Management Company

Objectives and investment policy

Objective The Fund aims to generate a high level of income with the opportunity for capital growth.

Policy The Fund will invest predominantly in non-Sterling and Sterling denominated fixed income securities issued globally, including up to 10% in emerging markets. The Fund will invest in fixed or floating rate debt securities (rated or non-rated), including investment grade, sub-investment grade, high yield and preference shares.

The Fund may also invest up to 10% in equities when consistent with its investment objective.

The Fund will invest in derivatives for efficient portfolio management and investment management purposes.

The Fund may also invest up to 10% in other investment funds, known as collective investment schemes ("CIS"), including funds managed by the Investment Manager or another Royal London group company, which will be regulated, and may be leveraged or unleveraged, as well as eligible exchange traded funds . Such CIS will be domiciled globally. The Fund may invest in such CIS for the purposes of achieving its investment objective and policy.

The Fund can invest up to 100% in investment grade bonds or up to 100% in low quality bonds. The Fund will aim to invest a minimum of 50% in non-Sterling denominated bonds.

The Fund is actively managed and does not use a benchmark to assess performance. Performance may be assessed by considering the extent to which the Fund has met its investment objective.

More information on the sustainability factors for this fund can be found in the prospectus on our website at www.rlam.com

Recommendation The Fund may not be appropriate for investors who plan to withdraw their money within 3-5 years.

Concepts to understand

Bonds Securities that represent an obligation to repay a debt, with interest. Investment grade bonds are high quality bonds that are viewed as being highly likely to make all scheduled payments of interest and principal. Low quality bonds carry higher risk but also typically pay higher rates of interest.

Derivative A financial instrument whose price is dependent upon or derived from one or more underlying asset.

Efficient Portfolio Management An investment technique that allows the use of derivatives for at least one of the following purposes: to increase the value of the Fund; to protect the value of the Fund or to reduce the risks of certain investments.

Derivatives are typically used to hedge the relevant share classes.

You can buy and sell your shares on each working day in London, except public holidays, at 5.00pm (Irish time) if you tell us before 5.00pm (Irish time) that you want to do so. Instructions received after 5.00pm (Irish time) will be processed at 5.00pm (Irish time) on the following working day.

The Fund issues both income shares (shares in which any income is paid out to you) and accumulation shares (shares in which any income is reinvested in the Fund). Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

Risk and reward profile

1	2	**3**	4	5	6	7

Lower risk — Higher risk

Typically lower rewards — Typically higher rewards

The fund is shown in risk category 3 because its actual price has shown a medium level of volatility historically. The SRRI was calculated using some synthetic data and may not be a reliable indication of the future risk profile. As an investment, bonds are typically more volatile than money market instruments but less volatile than shares. Bonds issued by corporations are typically more volatile than bonds issued by governments.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology that is used by all companies offering such funds in Europe.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Investment Risk The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

Credit Risk Should the issuer of a fixed income security become unable to make income or capital payments, or their rating is downgraded, the value of that investment will fall. Fixed income securities that have a lower credit rating can pay a higher level of income and have an increased risk of default.

Derivative Risk Derivatives are highly sensitive to changes in the value of the underlying asset which can increase both Fund losses and gains. The impact to the Fund can be greater where they are used in an extensive or complex manner, where the Fund could lose significantly more than the amount invested in derivatives.

EPM Techniques The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Exchange Rate Risk Investing in assets denominated in a currency other than the base currency of the Fund means the value of the investment can be affected by changes in exchange rates.

Interest Rate Risk Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

Liquidity Risk In difficult market conditions the value of certain fund investments may be difficult to value and harder to sell, or sell at a fair price, resulting in unpredictable falls in the value of your holding.

Emerging Markets Risk Investing in Emerging Markets may provide the potential for greater rewards but carries greater risk due to the possibility of high volatility, low liquidity, currency fluctuations, the adverse effect of social, political and economic instability, weak supervisory structures and accounting standards.

Counterparty Risk The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Sub-Investment Grade Investment Risk Lower rated investment grade securities may have large uncertainties or major risk exposures to adverse conditions. The market value of securities in lower rated investment grade categories is more volatile than that of higher quality securities, and the markets in which these securities are traded are less liquid than those in which higher rated securities are traded.

Unrated Bond Risk Non-rated bonds may have the characteristics of either investment or sub-investment grade bonds. Market activity in unrated securities and instruments may be low for a considerable period of time and this may impact on liquidity.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

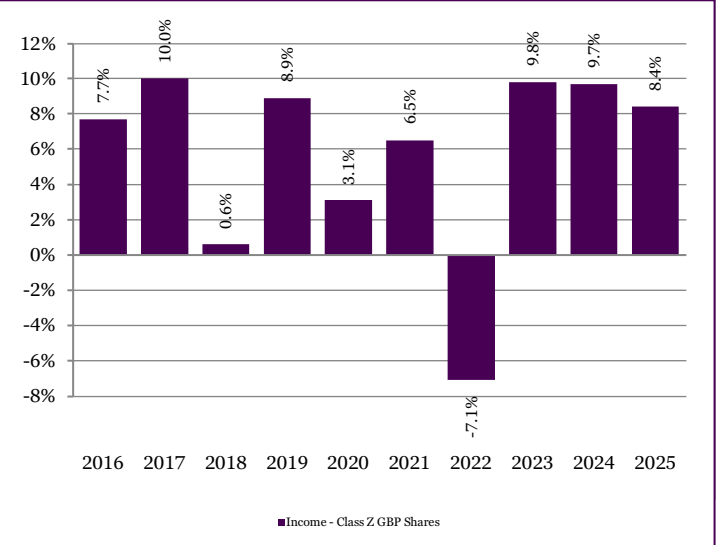
One-off charges taken before or after you invest:	
Entry charge	None
Exit charge	None
Charges taken from the fund over a year:	
Ongoing charge	0.40%
Charges taken from the fund under specific conditions:	
Performance fee	None

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.
Ongoing charge is based on the Fund Management Fee (FMF), which is the periodic fee paid to cover the expenses of the Fund. This figure does not include portfolio transaction costs.

Past performance

The graph shows fund performance over the past 10 years where available. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay.
The Fund was launched on 8 December 2015 and the share class on 8 December 2015.

The Royal London Global Bond Opportunities Fund (Income - Class Z GBP Shares) *in GBP*



Source: RLAM and DataStream as at 31 December 2025

Past performance is not a guarantee or reliable indicator of future returns. The chart shows performance in British Pounds after the ongoing charges and the portfolio transaction costs have been paid. Entry and exit charges are excluded from calculations of past performance. All performance shown assumes reinvestment of dividends.

Practical information

Depositary: HSBC Continental Europe.

Additional Information: This Key Investor Information Document (KIID) may not contain all the information you need. For additional information on this fund (including the Supplementary Information Document), on other share classes of this fund and on other funds, or to obtain a free copy of the Fund's Prospectus or the annual and semi-annual shareholder reports, call the information line or write to the registered office, details of which are below. Alternatively, visit www.rlam.com. The Prospectus and shareholder reports are in English.
This document describes one share class of the Fund. The Prospectus and annual and semi-annual shareholder reports are prepared for the entire fund across all share classes.

For fund performance and most recent share price, visit www.rlam.com.

The Fund is a sub-fund of Royal London Asset Management Funds plc, which is an umbrella fund with segregated liability between sub-funds. As a consequence, the holdings of one sub-fund are kept separate from the holdings of other sub-funds and your investment in the Fund cannot be used to pay the liabilities of any other sub-fund. Investors may exchange their shares in the Fund for shares in other sub-funds of Royal London Asset Management Funds plc.

Should you wish to switch share classes or funds, please see the "Switching" section of the Prospectus for details.

Tax: Investors should note that the tax legislation that applies to the Fund may have an impact on the personal tax position of their investment in the Fund.
Contact your adviser to discuss tax treatment, suitability of this investment, and other questions.

Notices: FundRock Management Company S.A. may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus.

This Fund and Royal London Asset Management Funds plc are authorised in Ireland and regulated by the Central Bank of Ireland.

The Management Company is authorised in Luxembourg and supervised by the Commission de Surveillance du Secteur Financier (CSSF).

A paper copy of the detailed and up-to-date remuneration policy of the Management Company, including a description of how remuneration and benefits are calculated, the identity of persons responsible for awarding the remuneration and benefits, is available free of charge at its registered office and on the website https://www.fundrock.com/policies-and-compliance/remuneration-policy/, under section "Fund documentation".
