KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

OBJECTIVE AND INVESTMENT POLICY

Objectives

The fund's objective is to seek capital appreciation, measured in U.S. dollars.

Investment Policies

The fund invests primarily in (at least 70%) equity securities of companies located in developed and emerging market countries. The fund generally invests in 50 or fewer companies. The fund generally focuses its investments in companies whose shares the Investment Manager believes are priced at a significant discount to their intrinsic value (value companies). The fund may also invest in debt instruments, including up to 10% in below investment grade debt instruments, and up to 10% in cash-equivalents (defined as bank deposits, money market instruments, units of money market funds and reverse repurchase transactions). The fund may invest a relatively large percentage of its assets in a small number of countries or a particular geographic region. Investments are selected primarily based on fundamental analysis of individual issuers, and quantitative screening tools that systematically evaluate issuers may also be considered. The fund will promote an environmental characteristic under Article 8 of Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector ("SFDR") (see the fund's Prospectus and website for more information). The Investment Manager may also consider environmental, social and governance (ESG) factors in its fundamental analysis alongside other factors. The fund may use derivatives for hedging and/or investment purposes, but will not extensively or primarily use derivatives to achieve the fund's investment objective.

The fund's benchmarks, MSCI World Value Index (net div) and MSCI World Index (net div), are indicated for performance comparison only. Although the fund's investments will generally be represented in the benchmark, components are likely to be weighted differently from the benchmark and the fund is likely to invest outside of the benchmark to take advantage of attractive investment opportunities. The fund is actively managed within its objectives and the investment strategy will not restrict the extent to which portfolio holdings may deviate from the benchmark. It is expected that the fund's deviation from the benchmark will be significant.

Distributions. Income will not be distributed to shareholders but reflected in the assets of the fund.

Redeeming Shares. You may sell your shares on each business day when banks in Luxembourg are open for normal business and the New York Stock Exchange is open for trading.

Terms to Understand.

Equity securities represent an ownership interest, or the right to acquire an ownership interest, in a company or other issuer.

Debt instruments represent obligations of corporations, governments, and other entities to repay money borrowed.

Derivatives are financial contracts whose value is based on the value of one or more underlying indicators or the difference between underlying indicators.

RISK AND REWARD PROFILE

This rating system is based on how much the returns of the class have varied over the past 5 years. Where 5 years' performance history is not available the data consists of historical returns representative of the fund, benchmark returns or returns for another class with the same currency as appropriate. Past returns may not be a reliable indicator of the future risk and reward profile of the class, and the rating may change over time based on the more recent returns. A fund in the lowest category does not mean a risk-free investment.

Lower risk

Typically lower rewards

Higher risk

Typically higher rewards

The fund is in category 5 because there has been medium high fluctuations in the fund's return historically.

Equity Risk: Prices of equity securities can vary significantly in response to issuer, market, economic, industry, political, geopolitical, public health, cybersecurity and regulatory conditions. This risk may be higher where the fund invests in a specific country or region or invests in a smaller number of companies. The fund invests in companies believed to be undervalued compared to their intrinsic value, which may underperform the broader market during certain stages of the market cycle.

Debt Instruments Risk: Prices of debt instruments can vary significantly in response to changes in interest rates and the credit quality of the issuers of its investments, and to issuer, market, economic, industry, political, geopolitical, public health, cybersecurity and regulatory conditions. These risks may be higher where the fund invests in a specific country or region or invests in below investment grade debt instruments or a smaller number of issuers.

Emerging Markets Risk: Emerging markets can be more volatile and less liquid than more developed markets.

Currency Risk: Changes in currency rates can significantly affect the value of your investment, and may also affect the financial condition of the issuers in which the fund invests.

Derivatives Risk: Derivatives can be highly volatile and can involve leverage. Gains or losses from derivatives can be substantially greater than the derivatives' original cost.

Other Risks

The rating does not reflect the risk that these factors, as well as other factors such as liquidity, counterparty, and operational risks change over time and can affect the fund's returns differently in the future.

The fund may not achieve its objective and/or you could lose money on your investment in the fund. For more information about the fund's risks, please

see "Fund Profiles" and "Risk Factors" in the Prospectus.

CHARGES

You pay the following costs for the marketing, distribution, and operation of the fund. These charges reduce the value of your investment.
