MyMap 3 Select ESG Fund

A sub-fund of BlackRock Investment Funds

Class D Accumulating GBP

ISIN: GB00BN090Q37

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- ▶ The Fund is a fund in the MyMap series. The number allocated does not directly relate to the Fund's level of risk or return. It is used to differentiate the Fund from other MyMap branded funds.
- ▶ The aim of the Fund is to provide, over five-year periods, a return on your investment (generated through an increase in the value of the assets held by the Fund and/or income received from those assets) through an actively managed portfolio, whilst maintaining a risk profile (i.e. an evaluation of the risks (e.g. risk of losses) associated with the portfolio) for the Fund's portfolio of 3-6%, and also aims to invest whilst incorporating the environmental, social and governance (ESG) commitments described below. The risk profile of the Fund's portfolio, for this purpose, is measured as the volatility (i.e. the degree of fluctuation) of its returns converted into an annual rate, over a five-year period.
- ▶ There is no guarantee the Fund's investment objective will be achieved. The Fund's risk profile may fall outside the stated range, especially during periods of unusually high or low volatility in the equity and fixed income markets. The Fund's potential gains are likely to be constrained by the aim of staying within its risk profile. Its capital is at risk, meaning that it could suffer a decrease in value and the value of your investment could decrease.
- ▶ The Fund seeks to achieve its investment exposure by investing more than 80% of its assets in units of other funds or investment products, including exchange traded products and index funds which may be Associated Funds as explained in the Fund's prospectus. A substantial amount, or even all of the Fund's assets, may be held in units of other funds.
- ▶ The Fund seeks, via such funds, exposure to various asset classes globally including equity securities (e.g. shares) and fixed income securities (e.g. corporate bonds and government bonds) and, up to 15% of its assets, in alternative asset classes (such as real estate and commodities (e.g. precious metals)). It may also invest, directly or indirectly, in cash and near cash instruments (e.g. debt securities with short term maturities). The Fund seeks to stay within its stated risk profile by varying its asset mix in different market conditions. Given the lower risk profile of the Fund, under normal market conditions it seeks a greater exposure to fixed income securities (which are generally considered to be less risky compared to equity securities).
- ▶ The Fund may also invest directly in financial derivative instruments (i.e. investments the prices of which are based on one or more underlying assets) for investment purposes and for efficient portfolio management purposes (EPM) (i.e. to reduce risk or costs within the Fund's portfolio, or generate additional income). The Fund may engage in short-term secured lending of its investments to certain eligible third parties to generate additional income and off-set costs.
- ▶ At least 80% of the assets the Fund invests in government bond funds must be invested in funds that track benchmark indices comprised of at least 50% government bond issuers with an ESG government rating of BB or higher (as defined by MSCI or another data vendor). At least 80% of the assets the Fund invests in funds other than government bond funds, real estate and commodity funds, or funds that are held for EPM purposes must be invested in funds which track benchmark indices that apply ESG related exclusionary criteria or funds that otherwise apply ESG related criteria (as detailed in the Fund's prospectus). The Fund's investment manager (IM) will consider these ESG related criteria at the time of investment. Where securities no longer meet such requirements, the Fund may continue to hold them, other than as an ESG related investment or until it is practicable to sell them.
- ▶ The IM expects to achieve, in respect only of the corporate issuers in which the Fund invests, a carbon emission intensity score for the Fund, as calculated at the end of each calendar quarter, that is 30% less than a portfolio that holds an equivalent weighting of equity securities and fixed income securities but does not apply any ESG criteria (such portfolio represented by a composite index of MSCI ACWI Index and Bloomberg Multiverse Index (the Index)), and an absolute reduction of such score over five year periods. Securities issued by non-corporate issuers, such as government bonds, are not included but may represent a substantial portion of the Fund's portfolio. The Fund is actively managed without reference to a benchmark, meaning the IM has absolute discretion to select the Fund's investments and is not constrained by any target, comparator or performance benchmark. The Fund's carbon emission intensity score is measured against the Index.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £100,000.

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2025. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
