## BNY Mellon Real Return Fund (Responsible)

### INSTITUTIONAL SHARES W (INCOME) (ISIN: GB00BD6DRF79)

a sub-fund of BNY Mellon Investment Funds. This Fund is managed by BNY Mellon Fund Managers Limited

#### Objectives and Investment Policy

##### OBJECTIVE

The Fund seeks to deliver positive returns on a rolling 3 year basis after fees.

The Fund aims to deliver positive returns before fees within a range of cash (SONIA (30-day compounded)) on a rolling 3 year basis and cash (SONIA (30-day compounded)) + 4% per annum on a rolling 5 year basis (meaning a period of three years or five years respectively, no matter which day you start on). However, positive returns are not guaranteed and a capital loss may occur.

##### POLICY

###### The Fund will:

- invest predominantly, meaning at least 70% of its Net Asset Value (NAV) in a portfolio of UK and international securities that meet the Investment Manager's sustainability criteria. More information on the criteria can be found in the Prospectus;
- exclude direct investment in securities with material involvement in activities the Investment Manager deems harmful from an environmental and/or social perspective;
- follow a broad 'multi-asset' portfolio approach (e.g. company shares (i.e. equities) and similar investments, bonds and similar debt investments and cash);
- gain exposure to property or commodities through exchange listed securities and/or collective investment schemes;
- invest in bonds, issued by governments and companies, with high and low credit ratings (i.e. investment grade and/or sub-investment grade bonds as rated by Standard and Poor's or similar agencies);
- invest in derivatives (financial instruments whose value is derived from other assets) to help achieve the Fund's investment objective. The Fund will also use derivatives with the aim of risk or cost reduction or to generate additional capital or income; and
- limit investment in other collective investment schemes to 10% (including but not limited to another Sub-Fund or Sub-Funds of the Company).

###### The Fund may:

- invest in emerging markets;
- invest more than 35% of its NAV in government and public securities issued or guaranteed by a single state, local authority or public international body;
- invest up to 8.5% of its assets in systematic trading strategies, which are quantitative and rule-based in nature that seek to deliver returns across different market conditions. These strategies may either not be directly accessible through traditional investment instruments such as equities or bonds, or may be implemented

more efficiently (from an operational and/or cost perspective).

Access to these strategies may be gained through instruments such as structured notes, derivative instruments and collective investment schemes;

- invest in Contingent Convertible Securities (CoCo's); and
- invest up to 30% of its NAV in assets that do not meet the Investment Manger's sustainability criteria. This includes; Cash, near cash asset and money market instruments (including deposits, loans), Collective Investment Schemes, warrants, derivatives, transferable securities (such as company shares, convertible bonds, contingent convertible bonds, listed investment trusts, REITs, bonds and structured notes).

**Benchmark:** The Fund will measure its performance before fees against two benchmarks:

- 3-year Benchmark: Over 3-year periods the Fund measures its performance against the Sterling Overnight Index Average (SONIA), compounded over 30 days.
- 5-year Benchmark: Over 5-year periods the Fund measures its performance against SONIA, compounded over 30 days, plus 4% per year.

SONIA is the average interest rate banks pay to borrow pounds sterling overnight and is used as a proxy for the return on cash deposits. The 30-day rate is calculated by compounding the daily SONIA rates throughout the previous 30-day period.

The Fund will use the 3-year Benchmark as a lower threshold for the Fund's performance to match or exceed as it is representative of the return on cash deposits. The Fund will use the 5-year Benchmark as an upper threshold for the Fund's performance to match or exceed over any 5-year period as it is consistent with the level of risk the Fund takes.

The Fund is actively managed, which means the Investment Manager has discretion over the selection of investments, subject to the investment objective and policies as disclosed in the Prospectus.

##### OTHER INFORMATION

**Treatment of income:** income generated will be paid to shareholders semi-annually on or before 31 August and 28 February. The value of your investment will decrease once the income is paid to you.

**Dealing:** you can buy and sell your shares in the Fund between 9:00 and 17:00 (UK time) on each business day in England and Wales. Instructions received before 12:00 will receive the price quoted on that day. The minimum initial investment for this share class is GBP 500,000.

#### Risk and Reward Profile

Lower risk Higher risk  
Potentially lower reward Potentially higher reward

1 2 3 4 5 6 7

We have calculated the risk and reward indicator, as shown above. It is based on the rate at which the value of the Fund has moved up and down in the past (i.e. volatility). It is not a guide to the future risk and reward rating of the Fund. The rating shown is not a target or guarantee and may shift over time. Even the lowest rating of 1 does not mean a risk-free investment.

This Fund is rated 4 because its historical value has shown moderate volatility. With a Fund rating of 4, you have a moderate risk of losing money but your chance for gains is also moderate.

#### THE FOLLOWING RISKS MAY NOT BE FULLY CAPTURED BY THE RISK AND REWARD INDICATOR:

**Objective/Performance Risk:** There is no guarantee that the Fund will achieve its objectives.

**Currency Risk:** This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.

**Derivatives Risk:** Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.

**Counterparty Risk:** The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.

**Responsible Investing Risk:** The investment policy for this Fund places restrictions on its exposure to certain sectors or types of investments to reflect its responsible investing approach. The Fund's performance may be negatively impacted due to these restrictions in comparison to funds which do not have these restrictions. The Fund will not engage in securities lending activities and, therefore, may forego any additional returns that may be produced through such activities.

**Performance Aim Risk:** The performance aim is not a guarantee, may not be achieved and a capital loss may occur. Funds which have a higher performance aim generally take more risk to achieve this and so have a greater potential for returns to vary significantly.

**Changes in Interest Rates & Inflation Risk:** Investments in bonds/money market securities are affected by interest rates and inflation trends which may negatively affect the value of the Fund.

**Credit Ratings and Unrated Securities Risk:** Bonds with a low credit rating or unrated bonds have a greater risk of default. These investments may negatively affect the value of the Fund.

**Credit Risk:** The issuer of a security held by the Fund may not pay income or repay capital to the Fund when due.

**Emerging Markets Risk:** Emerging Markets have additional risks due to less-developed market practices.

**Shanghai-Hong Kong Stock Connect and/or the Shenzhen-Hong Kong Stock Connect ("Stock Connect") Risk:** The Fund may invest in China A shares through Stock Connect programmes. These may be subject to regulatory changes and quota limitations. An operational constraint such as a suspension in trading could negatively affect the Fund's ability to achieve its investment objective.

**China Interbank Bond Market and Bond Connect Risk:** The Fund may invest in China interbank bond market through connection between

the related Mainland and Hong Kong financial infrastructure institutions. These may be subject to regulatory changes, settlement risk and quota limitations. An operational constraint such as a suspension in trading could negatively affect the Fund's ability to achieve its investment objective.

**CoCo's Risk:** Contingent Convertible Securities (CoCo's) convert from debt to equity when the issuer's capital drops below a pre-defined level. This may result in the security converting into equities at a discounted share price, the value of the security being written down, temporarily or permanently, and/or coupon payments ceasing or being deferred.

**Investment in Infrastructure Companies Risk:** The value of investments in Infrastructure Companies may be negatively impacted by changes in the regulatory, economic or political environment in which they operate. A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".
