

Key Investor Information

This document provides you with the key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

LF Majedie UK Income Fund, Class X Accumulation, a fund within LF Majedie Asset Management Investment Fund Company (ISIN: GB00B83QP495)

The fund is managed by Link Fund Solutions Limited.

Objective and investment policy

Objective

To produce, after all costs and charges have been deducted, an income in excess of the yield on the FTSE All-Share Total Return Index and a total return (a combination of income and capital growth) in excess of the return on the FTSE All-Share Total Return Index over any period of 5 years.

There is no guarantee that the objective will be met over any time period and you may get back less than you invest.

Investment Policy

To invest at least 80% of the fund in the shares of UK companies.

The fund may also invest up to 20% in non-UK companies, cash and money market instruments (which are short term loans that pay interest).

No more than 10% of the fund may be invested in other collective investment schemes.

The Investment Manager selects companies that in their opinion are undervalued, with good prospects for growth and where cash flow is expected to improve.

Other features of the fund:

- The fund is actively managed. The Investment Manager uses its expertise to select investments for the fund and has the discretion to invest without the need to adhere to a particular benchmark.
- The fund can invest across different industry sectors without limitation.
- The fund may invest in other funds (including those managed by the ACD, the Investment Manager and their associates).
- Income from the fund will be added to the value of your investment.
- You can buy and sell shares in the fund on each business day.
- Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years

Risk and reward profile

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains.
- The fund has been classed as 6 because its volatility has been measured as above average to high.
- The indicator is based on historical data and may not be a reliable indication for the future.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time. The lowest number on the scale does not mean that a fund is risk free.
- Market Risk: the investments of the fund are subject to normal market fluctuations and the risk inherent in investment in equity securities and similar instruments and there can be no assurances that appreciation will occur.
- Equity Risk: the value of equities may fall as well as rise and as a class of investment, equities are typically more volatile than other common investment types such as bonds or cash.
- Currency Risk: As the fund can be exposed to different currencies, changes in exchange rates may decrease the value of your investment.
- Charges to capital risk: As charges are taken from capital, this will erode capital and may constrain capital growth.
- Counterparty Risk: The failure of a firm involved in a transaction with the fund or providing services to the fund may expose the fund to financial loss.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' below.
