

KEY INVESTOR INFORMATION

This document provides you with Key Investor Information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Janus Henderson

Sterling Bond Unit Trust Class I Inc ISIN: GB00B6XY7V09

A unit trust, managed by Janus Henderson Fund Management UK Limited.

Fund Currency: GBP Unit Class Currency: GBP

Objective and investment policy

Objective

The Fund aims to provide a sustainable level of income (via a consistent level of distribution) with the potential for capital growth over the long term.

Performance target: To outperform the Markit iBoxx GBP Non-Gilts all maturities Index by 1.25% per annum, before the deduction of charges, over any 5 year period.

Investment policy

The Fund invests at least 80% of its assets in Sterling-denominated bonds of investment grade, issued by governments, companies or any other type of issuer.

The Fund may also hold other assets including bonds of other types from any issuer, cash and money market instruments.

The Investment Adviser may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the Fund's objective, to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the Markit iBoxx GBP Non-Gilts all maturities Index, which is broadly representative of the bonds in which it may invest, as this forms the basis of the Fund's performance target. The Investment Adviser has discretion to choose investments for the Fund with weightings different to the index or not in the index.

As an additional means of assessing the performance of the Fund, the IA Sterling Corporate Bond sector average, which is based on a peer group of broadly similar funds, may also provide a useful comparator.

Risk and reward profile

The value of an investment and any income from it can go up or down. When you sell your units they may be worth less than you paid for them.

The rating above is based on the historic volatility of the unit class. Historic data may not be a reliable indication of the future risk profile of the Fund. The rating is not guaranteed and may change over time.

The unit class appears at 4 out of 7. Units in higher categories have shown greater and/or more frequent variations in Net Asset Value in the past five years than those in lower categories. The lowest category does not mean risk free.

Other material risks not captured by the rating:

Credit Risk An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital. If this happens or the market perceives this may happen, the value of the bond will fall.

Strategy

The Investment Adviser looks to achieve a consistent level of income by investing in primarily sterling denominated investment grade corporate bonds and other fixed interest securities, including preference shares. The strategy combines asset allocation views with rigorous fundamentally driven security selection to seek out investment opportunities.

Distribution policy The Fund offers both accumulation units (units in which net income is retained within the price) and income units (units in which net income is paid out to investors).

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch units in the Fund on any dealing day and according to certain restrictions, both defined in detail in the Fund's Prospectus.

For an explanation of some of the terms used in this document, please visit the glossary on our website at www.janushenderson.com.

Interest Rates When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise (or are expected to rise). This risk is typically greater the longer the maturity of a bond investment.

Country or Region High exposure to a particular country or geographical region carries a higher level of risk than a more broadly diversified portfolio.

Derivatives and Leverage Derivatives may be used to help achieve the investment objective. This can result in leverage (higher levels of debt), which can magnify an investment outcome. Gains or losses may therefore be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Liquidity Securities could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Counterparty Risk and Operational Risk Losses could be incurred if a counterparty became unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Fund's Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge	0.00%
Exit Charge	0.00%**

* The charges shown are maximum figures. In some cases you may pay less.

** Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

Past performance

12.0 5.6 -0.3 10.6 9.1 -1.9 -16.7 10.0 3.0 8.2

9.0 5.1 -2.2 9.5 7.9 -1.9 -16.4 9.3 2.6 7.0

Class I Inc (Net of Charges)

Markit iBoxx GBP Non-Gilts all maturities Index +1.25% per annum

Sector: IA & Corporate Bond

Charges taken from the Fund over a year

Ongoing Charges 0.50%

The ongoing charges are based on actual annualised expenses for the period ending 15 October 2025. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another Fund.

For more information about Charges please see the Fund's Prospectus.

The past performance is calculated in GBP.

The Fund was launched in April 1988 and the units were launched in August 2012.

Past performance does not predict future returns.

The past performance takes into account all charges except one-off charges. Please note that while the Fund aims to achieve its performance target before the deduction of charges, the chart and table illustrate the actual performance of the unit class after the deduction of charges.

The Fund does not aim to track the performance of the benchmark.

Practical information

Trustee: NatWest Trustee and Depository Services Limited.

To obtain more information: This Key Investor Information Document may not contain all the information you need.

For the last published price of units in the Fund or any additional information on the Fund, or to obtain the Fund's prospectus or the annual/semi-annual report, please visit www.janushenderson.com.
