Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Neuberger Global Value Fund (the "Fund")

a sub-fund of Neuberger Berman Investment Funds plc

GBP P Accumulating Class - Unhedged, IE00BDB16154

This Fund is managed by Neuberger Berman Asset Management Ireland Limited.

OBJECTIVES AND INVESTMENT POLICY

The Fund aims to increase the value of your shares by investing in the shares of companies listed or traded on Recognised Markets worldwide, that comply with the Sustainable Criteria. There can be no guarantee that the Fund will ultimately achieve its investment objective and capital invested is at risk. The Fund selects its investments using a six-phase investment process:

- identify investment themes including value, income, quality, momentum/sentiment and volatility, which we believe are systematically linked to the generation of better than average returns,
- determine the exposure of the identified equities to each investment theme,
- rate each equity based on its aggregate exposure to each of the investment theme,
- evaluate risk in respect of sector, country and single name exposure limits,
- reduce exposure to equities that are poorly rated or are considered higher risk,
- increase exposure to equities that are higher rated or are considered lower risk.

The investment theme will be selected based on:

I. being backed by sound economic and fundamental rationale

II. persistent over time

III. diversified relative to traditional sources of return, and

IV. capable of being implemented in a cost efficient way.

The Fund may invest in excess of 20% of its Net Asset Value in equity securities issued by companies domiciled in emerging (less developed) market countries.

The Fund is actively managed and does not intend to track the benchmarks, the MSCI ACWI (All Country World Index) (Total Return, Net of Tax, USD) and the MSCI ACWI (All Country World Index) Value (Total Return, Net of Tax, USD) which are used for performance comparison purposes. The Fund's investment policy restricts the extent to which the Fund's holdings may deviate from the benchmarks. Nevertheless, this deviation may be significant.

The Fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR.

This Fund may not be appropriate for short-term investment and may be more suitable as part of a diversified portfolio.

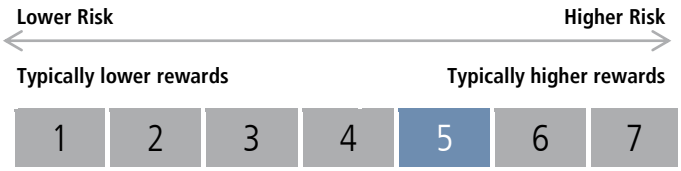
You may sell your shares on any day when the financial markets in London and New York are open for business.

As your shares are in British Pounds and the Fund is in US Dollars, fluctuating currency exchange rates may affect the value of your investment.

Your shares do not pay you income, but returns are reinvested to grow capital.

Transaction costs may reduce the Fund's return.

RISK AND REWARD PROFILE



The risk category for the Fund was calculated using historical data (including representative portfolio returns) and is based on how volatile the Fund's shares are likely to be. The risk category shown is not guaranteed to remain unchanged and may change over time.

A category 1 fund is not a risk free investment - the risk of losing money is smaller than that of a category 7 fund, but the likelihood of making gains is also lower. The seven category scale is complex: for example, a category 2 fund is not twice as risky as a category 1 fund.

This Fund is in category 5 due to its level of historical volatility. As the share class has less than 5 years of returns history, the historical volatility includes benchmark/representative portfolio returns. The Fund invests in a variety of investments, some of which can vary significantly in price from day to day due to a number of factors.

The main risks facing the Fund are:

- Market Risk: The risk of a change in the value of a position as a result of underlying market factors, including among other things, the overall performance of companies and the market perception of the global economy. In addition, as the Fund invests in businesses that are connected with less advanced countries and economies, certain risks exist. The market for investments in such countries may be less developed making it difficult for the Fund to sell its investments in such markets and political and social instability may lead to a reduction in the value of the investments in such countries. Accounting and auditing standards and availability of financial information may vary across the markets in which the Fund invests.
- Liquidity Risk: The risk that the Fund may be unable to sell an investment readily at its fair market value. This may affect the value of the Fund and in extreme market conditions its ability to meet redemption requests upon demand. To counter this risk the Fund actively monitors the liquidity of its investments.
- Counterparty Risk: The risk that a counterparty will not fulfil its payment obligation for a trade, contract or other transaction, on the due date. The insolvency of any institution providing services such as the safekeeping of assets or acting as counterparty in respect of derivatives or other instruments may expose the Fund to financial loss.
- Derivative Risk: The Fund is permitted to use certain types of derivative instruments to seek to protect its assets against some of the risks outlined in this section. Their use will create leverage, an investment technique which gives an investor a larger exposure to an asset than the amount it invested. The Fund's use of leverage may result in greater variations (both positive and negative) in the value of your shares. However, leverage is limited to 100% of the Fund's assets and the Sub-Investment Managers (or the Manager where applicable) will ensure that the Fund's use of derivatives does not materially alter the overall risk profile of the Fund. Please refer to the Prospectus for a full list of the types of derivative that the Fund may utilise.
- Operational Risk: The risk of direct or indirect loss resulting from inadequate or failed processes, people and systems including those relating to the safekeeping of assets or from external events.
- Currency Risk: Investors who subscribe in a currency other than the base currency of the Fund are exposed to currency risk. Fluctuations in exchange rates may affect the return on investment. If the currency of this share class is different from your local currency, then you should be aware that due to exchange rate fluctuations the performance shown may increase or decrease if converted into your local currency.
- Model Risk: The investment strategy of a Fund using a quantitative investment approach is rules based and model-driven. Therefore, it would not necessarily result in a security being sold because that security's issuer was in financial trouble or defaulted, or had its credit rating downgraded, unless such indicators are tracked by the investment strategy of that Portfolio. There is no guarantee that the investment strategy of such a Portfolio will meet the purpose for which it was designed.
- Sustainable Risk: The Fund may focus on investments in companies that relate to certain sustainable development themes and demonstrate adherence to the environmental, social and corporate governance practices. This may mean the universe of securities from which the Fund can invest in may be smaller than that of other funds and may underperform the market as a result.

For a more detailed explanation of risks, please refer to the "Investment Restrictions" and "Investment Risks" section of the Prospectus.

CHARGES

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing Charges	0.63%
Charges taken from the fund under certain specific conditions	
Performance Fee	None

These charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it.

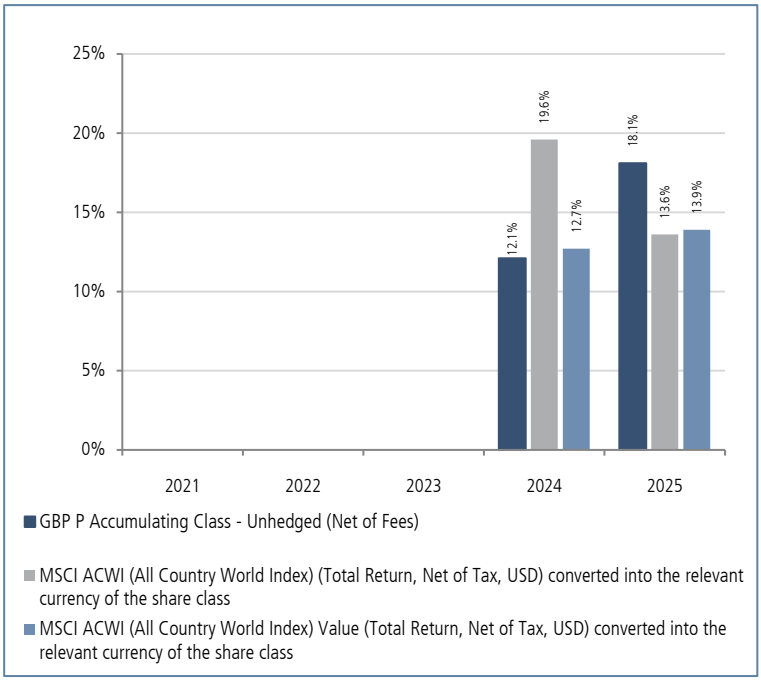
These charges reduce the potential growth of your investment.

The one-off charges shown are the maximum figures. In some cases they may be less. You can find out your actual charges from your financial adviser.

The ongoing charges figure is based on the expenses for the period ending 30 April 2026. This figure may vary from year to year.

You can find more details on these charges in the "Fees and Expenses" section of the Prospectus.

PAST PERFORMANCE



Past performance is not a reliable indicator of future results.

The past performance takes account of all charges and costs.

The value of this class is calculated in British Pounds.

The Fund launched on 18 December 2014.

This class started to issue shares on 20 October 2023.

From 06 May 2021 performance is compared against the MSCI ACWI (All Country World Index) (Total Return, Net of Tax, USD) converted into the relevant currency of the share class and the MSCI ACWI (All Country World Index) Value (Total Return, Net of Tax, USD) converted into the relevant currency of the share class.

Prior to this date, performance is compared against the MSCI ACWI (All Country World Index) (Total Return, Net of Tax, USD) converted into the relevant currency of the share class.
