Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust Continental European Fund

B Inc (GBP), ISIN: GB00BMX64P13

A sub-fund of Liontrust Investment Funds V

Liontrust Management Limited is the Authorised Corporate Director ("ACD") of the Fund.

Objectives and Investment Policy

The investment objective of the fund is to achieve a return (income and growth in the value of your investment (known as 'capital growth') over a rolling period of at least five years, by investing in a core concentrated portfolio of shares of European companies (typically numbering between 30 and 50). A rolling period of at least five years has been chosen because it is broadly similar to the length of an average business cycle (as defined in the investment policy).

The fund aims to achieve its objective over a business cycle, which is a multi-year period of time during which economic conditions are expected to move through distinct periods of being supportive and unsupportive of companies' trading activities. The fund will provide a dividend stream for investors derived from companies that the Investment Manager considers to be aligned to the Sustainable Investment Framework and appropriate with reference to the business cycle. The length of a business cycle varies and as such investors looking to measure the fund's performance against its objective should do so over a rolling period of at least five years.

The fund seeks to achieve its investment objective by investing at least 80% of its value in shares of European companies which are domiciled, incorporated, or have significant operations in Europe (excluding the UK). Investment can be direct, or indirect, inshares (including common and preference shares), rights for shares, warrants, depositary receipts (securities issued by banks that represent company shares), investment trusts (including REITS) and collective investment schemes.

Although the fund aims to deliver capital growth over a rolling 5 year period, there is no guarantee that this will be achieved over this time period, or any time period. The fund's capital is at risk meaning that the fund could suffer a decrease in value and the value of your investment would decrease as a result.

Up to 20% of the fund may be invested in shares of 'non-European' companies (including emerging markets and the UK), collective investment schemes and cash. Investment in collective investment schemes (which includes exchange traded funds) can include those operated and/or managed by the ACD or the Investment Manager, and is limited to 10% of the overall fund value. The fund's investment into UK companies may be up to 10% of the fund's net assets, but typically will not exceed 5% of the fund's net assets. Investment can be direct or indirect as noted above.

The fund may use derivatives for the purposes of reducing risk or cost or for generating extra income or growth (known as 'efficient portfolio management'). As an example, the fund may use forward contracts for currency hedging with the intention of reducing the risk arising from currency exposures in a cost-effective way.

The fund is actively managed, meaning the Investment Manager will use their expertise to pick investments to achieve the fund's objectives. The fund will invest in a range of companies by industry sector and size.

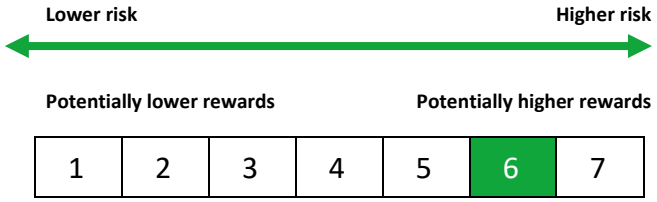
Although its investments are not restricted by reference to a benchmark the fund will invest in a limited number of companies which means that the fund will be concentrated. This absence of any benchmark constraints gives the Investment Manager wider scope to be dynamic in its investment decisions (for example by allowing the Investment Manager to change investments when they believe necessary in line with market circumstances to achieve the fund's objective) than if they were required to invest within such controls.

Dividend income for this share class is paid to investors as detailed in the fund's prospectus.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

The Risk and Reward Indicator demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The shaded area in the table below shows the fund's ranking on the Risk and Reward Indicator.



The fund is ranked at 6 because funds of this type have experienced medium to high rises and falls in value in the past. The risk and reward score is based on past performance and calculated in accordance with European legislation. It may not be a reliable indication of the future risk profile. The risk and reward score is not guaranteed and may change over time. The lowest category does not mean risk free. While the risk indicator takes into account the broader risk profile, the following risks are considered most relevant to this fund:

Equity Securities: Equities can lose value rapidly, and typically involve higher market risks than bonds, money market instruments or other debt instruments. Fluctuation in value may occur in response to activities of individual companies, the general market, economic conditions, or changes in currency exchange rates.

Liquidity: There is a risk that adverse market conditions may affect the fund's ability to sell assets at the price the fund would like, or the fund may have to sell them at a loss.

Overseas investment: Investments by the sub-fund(s) in global equities issued by overseas companies may carry additional risks including exchange rate movements, political and economic upheaval, relative lack of information, relatively low market liquidity and the potential lack of strict financial controls and standards.

Emerging Markets: The Fund may hold investments in emerging markets which may be more volatile than investments in more developed markets. Emerging markets may have relatively unstable governments, economies based on only a few industries and securities markets that trade only a limited number of securities. Many emerging markets do not have well developed regulatory systems and disclosure standards may be less stringent that those of developed markets. The risks of expropriation, nationalisation and social, political and economic instability are greater in emerging markets than in more developed countries.

Concentrated portfolio: the Fund invests in a concentrated portfolio of equities, and as a result, may experience a higher degree of volatility than funds which invest in more diverse portfolio of investments.

Charges for this Fund

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges that may be taken before or after you invest	
Entry charge	**0.00%**
Exit charge	**0.00%**

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment.

Charges taken from the fund over a year	
Ongoing charge	**0.95%**

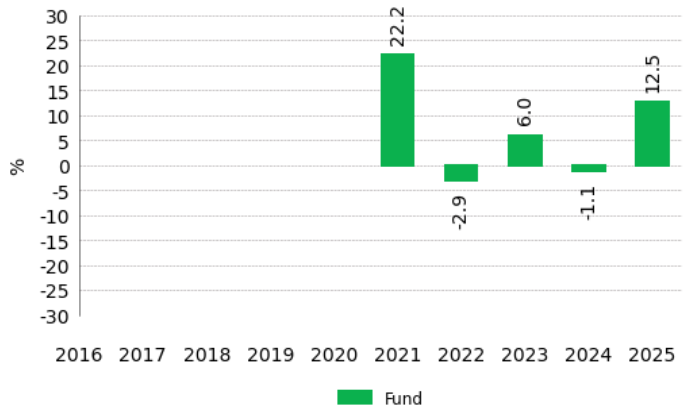
Charges taken from the fund under certain specific conditions	
Performance fee	**None**

The ongoing charges figure is based on the expenses of the fund for the year ending March 2026. This figure may vary from year to year.

All charges and fees, except any investor dealing charges, have been included within the performance.

For more information about charges please refer to the fund's Prospectus which is available from the ACD at https://www.liontrust.com/.

Past Performance



You should be aware that past performance is not a guide to future performance.

Fund launch date: 30/09/2020.

Share/unit class launch date: 16/10/2020.

Performance is calculated in GBP.

The graph shows full calendar year performance in GBP. Performance shown takes into account ongoing charges, but not entry fees, and is calculated in pounds sterling on a Net Asset Value basis with net dividends reinvested.
