Vanguard Global Emerging Markets Fund (the "Fund")

A sub-fund of Vanguard Investments Funds ICVC

A GBP Accumulation Shares

ISIN: GB00BZ82ZY13

Authorised Corporate Director: Vanguard Investments UK, Limited ("VIUK")

Objectives and investment policy

- The Fund seeks to provide an increase in the value of investments over the long-term (more than 5 years).
- The Fund seeks to achieve its investment objective by investing primarily in shares of companies located in emerging markets around the world. Under normal circumstances, at least 80% of the Fund's assets will be invested in shares of such companies. A company is considered to be located in an emerging market country if it is organised under the laws of, or has a principal office in, an emerging country; if it has a class of securities whose principal securities market is in an emerging country; if it derives 50% or more of its total revenue from goods produced, sales made, or services provided in one or more emerging countries; or if it maintains 50% or more of its assets in one or more emerging countries.
- The Fund is actively managed and uses a multi-manager structure with two investment advisers separately managing part of the Fund's assets. Each investment adviser uses their expertise to pick investments to achieve the Fund's objective.
- The Investment Adviser has discretion to determine which countries are regarded as emerging markets, although those classified by the International Monetary Fund (IMF) as emerging or developing economies will typically be included, together with other countries having similar characteristics. Emerging markets are countries that are progressing toward becoming advanced, usually shown by some development in financial markets, the existence of some form of stock exchange and a regulatory body.
- The Fund typically invests in a diverse range of companies representing different economic sectors and industry groups across the spectrum of large, mid and small cap value securities, chosen mainly on the basis of an investment approach that focuses on analysing individual shares rather than stock markets. The Fund's holdings will comprise a mix of investments in companies whose earnings are expected to grow faster than their peers in the market (known as 'growth stocks') and those that are considered to have been undervalued by the market (known as 'value stocks') selected from the world's emerging markets.
- The Fund may also have exposure to bonds and other fixed income securities, other collective investment schemes (which themselves invest in securities which are consistent with the Fund's objective), money market instruments (i.e. investments usually issued by banks or governments that are a short term loan to the issuer by the buyer), deposits, and warrants (which provide the holder with the right, but not the obligation, to purchase a share at a fixed price or amount at a fixed time in the future).
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth (known as "efficient portfolio management"). A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.
- The Fund may engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- The Fund attempts to remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The FTSE Emerging Index (the "Index") serves as a reference benchmark for performance comparison. Whilst the Fund may hold investments that are components of the Index, the Index is not considered during portfolio construction and the investment adviser will not manage the extent to which the Fund's investments differ from the Index.
- The currency of the share class is GBP.
- The Fund invests in securities which are denominated in currencies other than the share class currency. Movements in currency exchange rates can affect the return of investments.
- The Fund is appropriate for long-term investment. You should have an investment horizon of at least 5 years.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus). A list of the days on which shares in the Fund cannot be bought or sold is available on: https://fund-docs.vanguard.com/Vanguard-Investments-Funds-ICVC.pdf

Risk and reward profile

Lower risk ← → Higher risk

Typically lower rewards — Typically higher rewards

1	2	3	4	5	**6**	7

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 6 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

  - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.

  - Movements in currency exchange rates can adversely affect the return of your investment.

  - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfers of assets and failed/delayed delivery of securities or payments to the Fund.

  - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily. This could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.
- Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.

For further information on risks please see the "Risk Factors" section of the Prospectus on our website at https://global.vanguard.com
